## OPCI PODACI O BOSNI I HERCEGOVINI

**Službeni naziv:** Bosna i Hercegovina (B i H)  
**Geografska lokacija:** Bosna i Hercegovina se nalazi na zapadnom dijelu Balkanskog poluotoka

**Pogranične zemlje:** Srbija i Crna Gora na istoku, Republika Hrvatska na sjeveru, zapadu i jugu.

**Administrativna podjela:** BiH je podjeljena na dva entiteta: Federaciju Bosne i Hercegovine (FBiH) i Republiku Srpsku (RS) i distrikt Brcko.

**Entitetska struktura:** FBiH je administrativno podjeljena na 10 kantona-županija .Kantoni-županije su podjeljeni na općine. Na području FBiH je 79 općina.

Republika Srpska je administrativno podjeljena na 62 općine. Grad Brcko je zasebna administrativna jedinica - Distrikt.

### Površina:

Bosna i Hercegovina ukupno	
pokriva	51 209,2 km <sup>2</sup>
Kopno	51 197 km <sup>2</sup>
More	12,2 km <sup>2</sup>

**Klima:** Pretežno kontinentalna, mediteranska na jugu

**Broj stanovnika:** Procjena prisutnog stanovništva (30.06.2004) 3.842.527

**Struktura stanovnika:** Bošnjaci, Hrvati i Srbi i pripadnici ostalih naroda

**Glavni grad:** Sarajevo

**Službeni jezici:** Bosanski, Hrvatski i Srpski  
Službena pisma: latinica i cirilica

**Zvanična valuta:** Konvertibilna marka (KM),  
(1KM = 0,511292 Euro)

## GENERAL DATA ABOUT BOSNIA AND HERZEGOVINA

**Official name:** Bosnia and Herzegovina (BiH)  
**Geographical location:** Bosnia and Herzegovina is situated in the west part of the Balkan Peninsula

**Border countries:** Serbia and Montenegro on the east, Republic of Croatia on the north, west and south

**Administrative distribution:** B&H is divided on two entities: Federation of Bosnia and Herzegovina (FB&H) and Republika Srpska (RS) and district Brcko

**Entity's structure:** FB&H is administratively divided on 10 cantons/districts. These cantons/districts are divided into municipalities. There are 79 municipalities in Fed. BiH. The Republika Srpska is administratively divided into 62 municipalities. The city Brcko is a separated administrative unit -District.

### Surface:

Bosnia and Herzegovina covers totally	51 209,2 km <sup>2</sup>
Land	51 197 km <sup>2</sup>
Inland	12,2 km <sup>2</sup>

**Clime:** In the majority continental, mediterranean on south

**Number of habitants:** Estimation of current population (30.06.2004) 3.842.527

**The structure of population:** Muslims, Croats, Serbs and other participants of others nations

**Capital city:** Sarajevo

**Official languages:** Bosnian, Croatian and Serbian and two alphabets: Latin and Cyrillic)

**Official value:** Konvertible mark (KM),  
(1KM = 0,511292 Euro)

*INTRODUCTION*

## **PREDGOVOR**

Bilten o stanovništvu je publikacija Agencije za statistiku Bosne i Hercegovine, koja na sveobuhvatan nacin prikazuje službene statisticke podatke o stanovništvu za nivo Bosne i Hercegovine.

Prema Zakonu o statistici BiH ( «Službeni glasnik BiH»,broj 26/2004) Agencija za statistiku BiH nadležna je da u skladu sa medunarodno prihvacenom metodologijom izraduje i objavljuje statisticke podatke za Bosnu i Hercegovinu, a na temelju podataka zavoda za statistiku entiteta, distrikta Brcko i drugih institucija na razini BiH.

Skrecemo pažnju korisnicima da je ovo šesti bilten koji prikazuje podatke o stanovništvu za Bosnu i Hercegovine.

Izražavamo zahvalnost Federalnom zavodu za statistiku, Republickom zavodu za Statistiku Republike Srpske i Distriktu Brcko koji su omogucili Agenciji za statistiku BiH da na temelju njihovih statistickih podataka pripremi ovu publikaciju.

Na svim primjedbama i sugestijama za poboljšanje slijedeceg Biltena, Agencija za statistiku bice zahvalna.

Sarajevo, studeni/novembar 2005.

Ravnatelj

## **FOREWORD**

*Demographic Statistics is a publication of the Agency for Statistics of Bosnia and Herzegovina that contains a comprehensive overview of official statistical data on the population for the territory of the Bosnia and Herzegovina.*

*According to the Statistical Law of Bosnia and Herzegovina («Official Gazette B&H», number 26/2004) the Agency for Statistics of Bosnia and Herzegovina is in charge «of the production and publishing, of aggregated statistics for Bosnia and Herzegovina in accordance with the International accepted methodology, based on data submitted by the Entity Statistical Institutes .»*

*We would like to point out to users that the sixth Bulletin presents data on the population for the territory of the Bosnia and Herzegovina.*

*We would like to take this opportunity to express our gratitude to the Institute of Statistics of the Federation of Bosnia and Herzegovina, the Republic Institute of Statistics of the Republika Srpska and the Distrikt Brcko who provided data for this publication.*

*All suggestions by users of statistical data, which lead to further improvement of this publication, will be gratefully accepted.*

*Sarajevo, November 2005.*

*Director*

# **1. STANOVNIŠTVO**

## *POPULATION*

## **STANOVNIŠTVO**

### **Metodološka objašnjenja**

Podaci o radanjima, umiranjima i sklopljenim brakovima dobijaju se preko maticara, a o razvedenim brakovima od sudova nadležnih za razvode brakova.

Prema pravnim propisima o vodenju maticnih knjiga, slučajevi rođenja, smrti i zaključenja braka obavezno se upisuju u maticne knjige područja na kome su se desili, bez obzira da li osobe na koje se odnose stanuju na tom području ili ne.

Obradeni podaci o živorodenim i mrtvorodenim se daju prema mjestu stalnog stanovanja majke, o umrlim prema mjestu stalnog stanovanja umrle osobe, za sklopljene brakove prema mjestu stalnog stanovanja mladoženje, a o razvedenim brakovima prema poslednjem zajednickom prebivalištu.

U statistici rođenih jedinica posmatranja je rođeno, odnosno živorodeno i mrtvorodeno dijete.

**Živorodenim** se djetetom smatra svako dijete koje prilikom rođenja diše i pokazuje druge znakove života kao što su kucanje srca, pulsiranje pupcane vrpce i nesumljivo kretanje voljnih mišića.

Ako dijete ubrzo nakon poroda umre, najprije se registruje kao živorodeno, a zatim kao umrlo dojence.

Od 2001 godine prema preporukama Skupštine Svjetske zdravstvene organizacije i Medunarodnog udruženja ginekologa (FIGO) **mrtvorodenim** se smatra dijete rođeno, odnosno izvadeno iz tijela majke bez ikakvih znakova života, tj. ako nije disalo niti pokazivalo neki drugi znak života, a nošeno je duže od 22 sedmice (približno 6 mjeseci) i koje ima porodajnu težinu 500 gr i više. Izbacivanje mrtvog ploda koji je nošen manje od 22 sedmice, smatra se pobacajem (abortusom), bez obzira na to da li je riječ o prirodnom ili namjernom prekidu trudnoće, i ne registruje se u maticnim knjigama, niti su ti podaci iskazani u ukupnom broju mrtvorodenih.

U statistici umrlih jedinica posmatranja je svaka umrla osoba.

## **POPULATION**

### **Notes on methodology**

*Data on birth, deaths and marriages are taken from the registration officers, on divorces from the municipal courts in charge.*

*According to the legal regulations on registration, events of births, deaths and marriages are obligatory registered in population registers of area that took place, irrespective of residence of persons which events are refer to.*

*Processed data on live births and stillbirths are shown by place of permanent residence of mother, on deaths by the last permanent residence of the deceased, on marriages by the permanent residence of the bridegroom, and on divorces by the last common residence of the husband and wife.*

*In statistics of births the unit of observation is new-born, i.e. live born and still born child. A live-born child is every child who exhibits signs of life at birth.*

**Live birth** is the complete expulsion or extraction from its mother of a product of conception, which, after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movements of voluntary muscles. If a product of such a birth dies, it is first registered as live-born and then as died.

As of 2001 following the recommendations of the World Health Assembly and the International Federation of Gynecology and Obstetrics (FIGO), a **stillborn child** is considered a child born or taken out from mother's body who exhibits no signs of life (not breathing, not moving, no heartbeat) where pregnancy has lasted more than 22 weeks (approximately 6 lunar months) and weight at childbirth has been 500 gr or more. Expulsion of a dead fetus carried less than 22 weeks considered a miscarriage (abortion), irrespective of whether natural or artificial. These cases are not registered in population registers, nor shown in the tables on stillborn.

*In statistics of deaths the unit of observation is every deceased person.*

**Umrlji** je svaka živorodena osoba kod koje je nastupio trajni prestanak svih vitalnih funkcija koje zapocinju rođenjem bez mogućnosti ponovnog oživljavanja. Ovdje nisu uključeni mrtvorodeni.

**Umrlom dojencadi** smatraju se djeca koja su umrla prije navršene prve godine života.

U statistici sklopljenih brakova jedinica posmatranja je svaki zakonito sklopljen brak ,a kod statistike razvoda brakova svaki brak koji je pravosnažnom presudom nadležnog suda razveden, poništen odnosno proglašen nevažećim.

**Bracno stanje** Bracnim stanjem se smatra zakonski status osoba na koje se dogadaji odnose. To znači da se oženjenim odnosno udatim smatraju samo one osobe koje su se u trenutku dešavanja, odnosno dogadaja nalazile u braku zaključenim u skladu sa odredbama Osnovnog zakona o braku, a kao razvedena smatrane su osobe ciji je brak sudski (zakonski) razveden.

**Red rođenja djeteta** Za određivanje reda rođenja uzimaju se u obzir sva djeca koju je majka rodila, uključujući dakle, i mrtvorodenu djecu, bez obzira da li su rođena u braku ili izvan braka.

**Strucna pomoc** kod rođenja je pomoc doktora medicine ili diplomirane babice. Da bi se dobio ukupan broj rođenih sa stručnom pomoci, treba sabrati rođene u zdravstvenoj ustanovi i rođene "na drugom mjestu" sa stručnom pomoci.

**Mjesto i utvrđivanje smrti** Po ovom obilježju razvrstana su umrla lica, prema tome da li je smrt nastupila u zdravstvenoj ustanovi ili na drugom mjestu (u stanu, polju, itd). Ako je smrt nastupila u zdravstvenoj ustanovi, ujedno se smatra da je smrt utvrdio liječnik, a ako je smrt nastupila van zdravstvene ustanove, onda se umrli razvrstavaju još i prema tome da li je smrt utvrdio liječnik ili neka druga osoba.

#### Postupak izrade osnovnih demografskih pokazatelja

**Opća stopa nataliteta** predstavlja odnos između broja živorodenih i procjenjenog broja stanovnika, računato na 1000 stanovnika.

**Opća stopa mortaliteta** predstavlja odnos između broja umrlih i procjenjenog broja stanovnika, računato na 1000 stanovnika.

**A dead person** is every live-born person in which there is a permanent disappearance of all evidence of life at any time after live birth has taken place, without capability of resuscitation. Stillbirths are not included here.

**Dead infants** are considered children who died under one year of age.

In statistics of marriages the unit of observation is every marriage that is recognised by law.

In statistics of divorces the unit of observation is every marriage that is dissolved or cancelled by a valid decision of the municipal court in charge.

**Marital status** Marital status is considered the legal status of interviewed person. Married persons are only considered the persons who are, in moment of event, legally married according to regulations of basic law on marriage. Divorced are considered persons who are legally divorced.

**Birth order** In establishing birth order all children are taken into account (live births and stillbirths), irrespective of whether born in or out of wedlock.

**Medical assistance at birth** is the assistance by a medical doctor or a qualified midwife. The total data of live births with medical assistance includes the number of children born in medical facility and those born in "in some other place" but with medical assistance.

**Place of death and establishing of death** By this characteristic, the deceased are classified in consideration of whether the person died in health institution or some other place (house, field, etc). If the place of death is health institution it is considered that death is established by a physician. If place of death is some other place then are dead persons classified by whether of death was established by physician or some other person.

### **Procedure of making basic demographic indicators**

**General natality rate** is the ratio between the number of live-born children and the estimated number of inhabitants per 1000 population.

**General mortality rate** is the ratio between a number of dead and an estimated number of inhabitants per 1000 population.

**Opcu stopa prirodnog priraštaja** predstavlja razliku izmedu stope nataliteta i stope mortaliteta za godinu promatranja.

**Stopa smrtnosti dojencadi** predstavlja odnos izmedu broja umrle dojencadi i broja živorodenih iste godine, racunato na 1000 živorodenih.

**Stopa nupcijaliteta** predstavlja odnos izmedu broja sklopljenih brakova, u toku jednogodišnjeg perioda, i procjenjenog broja stanovnika, racunato na 1000 stanovnika.

**Stopa divorcijaliteta** predstavlja odnos izmedu broja razvedenih brakova, u toku jednogodišnjeg perioda, i procjenjenog broja stanovnika, racunato na 1000 stanovnika.

Osnovni materijal statistike prirodnog kretanja stanovništva priprema se i obraduje u Federalnom zavodu za statistiku Federacije BiH , Republickom zavodu za statistiku Republike Srpske i Distriktu Brcko.

**General rate of natural increase** is the difference between the natality and mortality rates in given year.

**Infant mortality rate** is the ratio between the number of dead infants and the number of live-born children a given year per 1000 population.

**Marriage rate** is the relation between the number of marriage in one year period and the estimated number of inhabitans per 1000 population.

**Divorce rate** is the relation between the number of divorces in one year period and the estimated number of inhabitans per 1000 population.

Basic material on demographics statistics is being prepared and procesed in the Entity Statistical Institutes and District Brcko.

2004 <sup>2)</sup>	17,9	0,1	17,2	81,1	76,6	46,0	18,7	3,7	0,2	0,0

<sup>1)</sup>Specificne stope fertiliteta predstavljaju odnos izmedu broja živorodene djece od majke odredene starosti prema 1000 žena te iste starosti

<sup>1)</sup> Fertility rates represent a ratio between a number of live born children by a mother of certain age by 1000 women of the same age

<sup>2)</sup> Za godine 1996,1997 i 1998 stope su radene na bazi projekcije broja stanovnika za BiH za 1995 koju je uradio odjel za stanovništvo Ujedinjenih Nacija,Revizija 1998

<sup>2)</sup> Za godine 1999,2000 i 2001 stope su radene na bazi projekcije broja stanovnika za BiH za 2000 koju je uradio odjel za stanovništvo Ujedinjenih Nacija,Revizija 2000

<sup>2)</sup> Za godine 2002,2003 i 2004 stope su radene na bazi procjene broja stanovnika za BiH za 2002 koja je uradena u Agenciji za statistiku BiH

<sup>2)</sup> For the years 1996,1997 and 1998 the rates are based on the projections on a number of population in B&H for 1995 prepared by the UN Population Division,Revision 1998

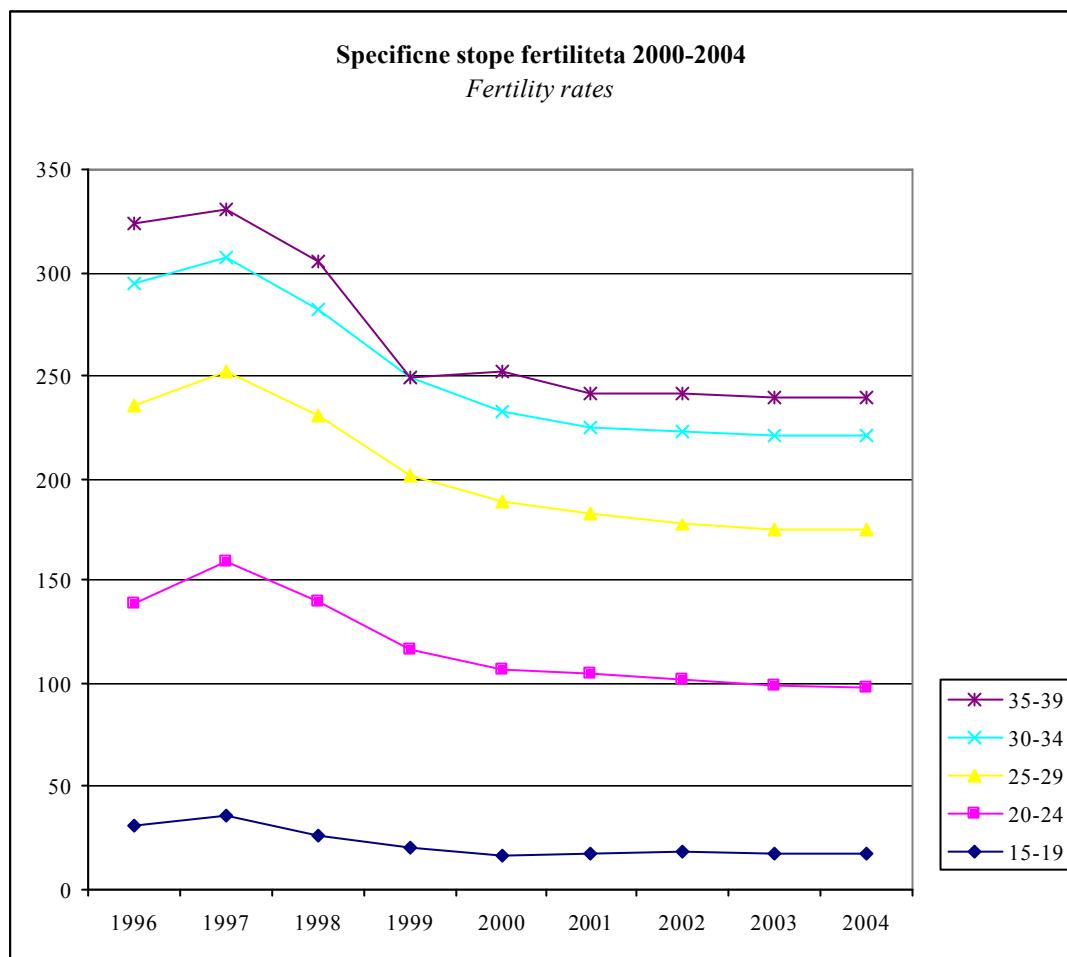

<sup>2)</sup> For the years 1999,2000 and 2001 the rates are based on the projections on a number of population in B&H for 2000 prepared by the UN Population Division,Revision 2000

<sup>2)</sup> For the years 2002,2003 and 2004 the rates are based on the estimate on a number of population in B&H for 2002 prepared by Agency for statistics of B&H

<sup>3)</sup> Stopa ukupnog fertiliteta predstavlja ukupan broj živorodene djece na jednu ženu

<sup>3)</sup> Total fertility rate represents the total number of live births by a female
