UVOD

Podaci o godišnjoj redovnoj tj. vlastitoj industrijskoj proizvodnji u Bosni i Hercegovini su prvi put prikupljeni za 2003-u godinu, kroz godišnje istraživanje industrije IND-21, provedeno tokom 2004 godine, a rezultati su objavljeni početkom 2005 godine. Nakon toga, rezultati ovog istraživanja su uvršteni u redovan program publikovanja Agencije za statistiku BiH.

Godišnje istraživanja industrije IND-21 u Bosni i Hercegovini za 2004 godinu je potpuno usaglašeno među službenim statističkim institucijama BiH, a u značajnoj mjeri i sa međunarodnim, prvenstveno Evropskim, standardima i propisima. Za godišnje istraživanje industrije definisani su sljedeći osnovni ciljevi:

- prikupljanje, obrada i objavljivanje godišnjih podataka o industrijskoj proizvodnji koja se obavlja u BiH, odnosno na teritoriji pojedinih entiteta i njihovih administrativnih jedinica, kao i u Distriktu Brčko, i to na nivou proizvoda iz nomenklature industrijskih proizvoda (zasnovane na PRODCOM listi, odnosno PRODCOM propisu¹⁾ EU-e) tj. provođenje tzv. godišnjeg PRODCOM istraživanja industrije.
- prikupljanje i obrada podataka potrebnih za određivanje strukture pojedinih segmenata nacionalne privrede i analizu promjena po pojedinim elementima ove strukture, te izračunavanje međunarodno harmoniziranih statističkih strukturno-poslovnih pokazatelja za sektor industrije tj. provođenje tzv. strukturno poslovno istraživanja industrije (SPS istraživanje, u skladu sa Propisom EU o Strukturno-poslovnim statistikama (SBS-R)²⁾).
- prikupljanje podataka za određivanje jedinstvenog sistema ponderisanja, na osnovu koga će se kompilirati mjesečni indeks fizičkog obima industrijske proizvodnje na nivou Bosne i Hercegovine, na nivou svakog entiteta i u Distriktu Brčko, saglasno evropskim standardima i propisima,
- diseminacija podataka o industrijskoj proizvodnji (PRODCOM rezultata) domaćim i međunarodnim korisnicima,
- diseminacija podataka o strukturi industrijske proizvodnje (Strukturnih poslovnih indikatora – SPS indikatora) domaćim i međunarodnim korisnicima.

Godišnje istraživanje industrije organizovano je tako da se sastoji od dvije, suštinski dosta različite cjeline: PRODCOM istraživanja i Strukturno poslovno istraživanja.

PRODCOM istraživanje je orijentisano na proizvod i bavi se direktnim podacima vezanim za obim i vrijednost prodaje industrijske proizvodnje na nivou pojedinačnog proizvoda iz nomenklature industrijskih proizvoda. Predmet istraživanja je industrijska proizvodnja u izvještajnoj godini na području Bosne i Hercegovine.

Strukturno poslovno istraživanje je orijentisano na osnovne elemente računa proizvodnje. Predmet istraživanja su poslovne informacije industrijskih preduzeća, vezane za glavnu djelatnost samog preduzeća, kao i za djelatnost njegovih jedinica u sastavu, a sve na nivou razreda klasifikacije djelatnosti (četverocifrena šifra u skladu sa NACE Rev.1.1).

¹⁾ PRODCOM je kratica za nomenklaturu industrijskih proizvoda EU-a tj. izvedeni akronim za "PRODuCts of the European COMmunity". PRODCOM se zasniva na Propisu Vijeća EU broj 3924/91 of 19 Decembra 1991 kojim se utvrđuje obaveza provođenja statističkog istraživanja industrijske proizvodnje. Cilj je dobijanje podataka o industrijskoj proizvodnji preduzeća u zemljama članicama EU

²⁾ Structural Business Statistics Regulations tj. SBS-R (Propisi Vijeća EU No 58/97 i 2700/98)

Ova publikacija sistematizuje podatke prikupljene kroz godišnje PRODCOM istraživanja industrije i daje pregled obima proizvodnje i prodaje industrijskih proizvoda i usluga u Bosni i Hercegovini, koje su rezultat redovne proizvodnje izvještajnih jedinica.

METODOLOŠKA OBJAŠNENJA

1. ORGANIZACIJA ISTRAŽIVANJA

U provođenju godišnjeg istraživanja industrije sudjeluju Agencija za statistiku Bosne i Hercegovine (BHAS), Federalni Zavod za statistiku (FZS) i njegovi kantonalni uredi, Republički Zavod za statistiku Republike Srpske i njegova područna. odjeljenja (RZSRS) i statistički biro Distrikta Brčko (SBDB).

BHAS, FZS i RZSRS su u punoj saradnji usaglasili metodologiju godišnjeg istraživanja industrije za 2004 godinu tj. zajednički su dogovoreni sadržaj i izgled obrasca i uputstvo za popunjavanje obrasca.

FZS, RZSRS i SBDB su organizovali sav terenski rad tj. štampali i distribuirali obrasce i druge materijale potrebne za provođenje istraživanja.

U okviru svoje standardne prakse FZS, RZSRS i SBDB satavljaju i ažuriraju Adresare statističkih jedinica za istraživanje industrije. Ovi su adresari korišteni u godišnjem istraživanju industrije.

FZS, RZSRS i SBDB su održali potrebne instruktaže po pojedinim kantonalnim ili centralnim uredima i zajedno sa statističarima lokalnih ureda za statistiku organizovali neposredni obilazak izvještajnih jedinice, kada je to bilo potrebno, a važnije metodološke poteškoće direktno rješavali sa izvještajnom jedinicom.

Na osnovu upitnika i utvrđenih ciljeva istraživanja u oba entitetska zavoda za statistiku i SBDB su razvijene aplikacije za unos, kontrolu i obradu podataka godišnjeg istraživanja industrije.

Agencija za statistiku Bosne i Hercegovine je sa FZS, RZSRS i SBDB dogovorila sadržaj i formu dostavljanja podataka i razvila aplikaciju za prihvatanje, agregiranje i obradu podataka za nivo Bosne i Hercegovine.

FZS, RZSRS i SBDB su prikupili popunjene upitnike i obavili unos, analizu i kontrolu podataka. Ovako prečišćeni podaci su dostavljeni Agenciji za statistiku Bosne i Hercegovine u dogovorenoj formi.

BHAS je izvršila agregiranje, pripremu i objavljivanje PRODCOM rezultata za nivo Bosne i Hercegovine. Podaci za nivo BiH su kompilirani i publikovani iz prečišćenih i kontrolisanih podataka entitetskih zavoda i SBDB.

2. KONCEPTI I DEFINICIJE

2.1 Pojam industrije

Pojam industrije koji se koristi u godišnjem istraživanju industrije IND-21, definisan je s tri područja klasifikacije djelatnosti (saglasno NACE Rev.1.1):

C - VAĐENJE RUDA I KAMENA,

D - PRERAĐIVAČKA INDUSTRIJA i

E - PROIZVODNJA I SNABDIJEVANJE ELEKTRIČNOM ENERGIJOM, GASOM I VODOM

Definicija pojma industrije je potpuno saglasna definiciji industrije EU-a.

Koncepti i definicije svih osnovnih pojmova korištenih u godišnjem PRODCOM istraživanju industrije (kao što su: glavna, sporedna i pomoćna djelatnost, statističke jedinice, proizvod, proizvodnja, zalihe i sl.), uzeti su iz uvoda u NACE Rev 1.1, iz EU propisa o statističkim jedinicama za promatranje i analizu proizvodnog sistema EU-e³⁾, uvoda u ISIC Rev. 3⁴⁾ i uvoda

³⁾ Propis o statističkim jedinicama za posmatranje i analizu proizvodnog sistema EU-a (Council Regulation (EEC) No 696/93 on the statistical units for observation and analysing within European Community)

PRODCOM liste, a usklađeni su s metodološkim okvirom SNA 93 i ESA 95⁵⁾.

Sva specifična objašnjenja data u ovom poglavlju odnose se samo na PRODCOM dio godišnjeg istraživanja industrije, čiji se rezultati, vezani za redovnu industrijsku proizvodnju, objavljuju u ovoj publikaciji.

2.2 Statističke jedinice

Statističke jedinice u poslovnoj statistici su autonomne institucije ili njihovi dijelovi koji se bave nekim ekonomskim djelatnostima. One se bave ekonomskim transakcijama roba i usluga pri čemu angažuju vlastitu radnu snagu za proizvodnju roba i usluga koje se mogu prodati, davati drugima bez naknade ili koristiti za daljnju proizvodnju. Važna karakteristika je to da mogu stvarati finansijske obaveze i mogu posjedovati materijalna i nematerijalna sredstva.

Jedinice posmatranja su one jedinice za koje se kompiliraju statistički rezultati u cilju praćenja njihovih karakteristika. Osnovno ograničenje koje se postavlja na jedinicu posmatranja je njena autonomnost u odnosu na finansiranje i proces proizvodnje.

Ovo kao rezultat ima dva tipa jedinica posmatranja:

1. jedinice koje su potpuno autonomne u odnosu na sve funkcije vezane za finansiranje i proces proizvodnje (preduzeće) i
2. jedinice koje su autonomne samo u odnosu na proces proizvodnje (jedinice u sastavu preduzeća). Autonomija u donošenju odluka znači da takve jedinice imaju administrativnu evidenciju o svim osnovnim karakteristikama procesa.

Izveštajne jedinice (Reporting units) su jedinice od kojih se traži da dostave podatke. To mogu biti same jedinice posmatranja ili sasvim odvojene jedinice.

U PRODCOM dijelu godišnjeg istraživanja industrije izveštajne jedinice su pravna lica i njihove jedinice u sastavu, koji su u Registru poslovnih subjekata FZS, RZSRS i SBDB razvrstani u područja C, D i E klasifikacije djelatnosti (industrija), kao i ona pravna lica koja nisu razvrstana u područja industrije, ali imaju jedinice u sastavu koje se bave industrijskom djelatnošću.

U PRODCOM dijelu godišnjeg istraživanja industrije jedinice posmatranja su preduzeća i njihove jedinice u sastavu, koje se bave industrijskom djelatnošću. Rezultat industrijske djelatnosti su proizvodi i usluge definisani u nomenklaturi industrijskih proizvoda.

Preduzeće je najmanja kombinacija pravnih jedinica koja čini organizacionu jedinicu za proizvodnju dobara i usluga i ima određeni stepen autonomije pri odlučivanju, posebno pri raspoređivanju vlastitih resursa. Preduzeće obavlja jednu ili više djelatnosti na jednoj ili više lokacija.

Jedinica u sastavu preduzeća je dio preduzeća (radionica, pogon, odjeljenje, i sl.) koji obavlja istu ili različitu djelatnost kao i preduzeće u čijem je sastavu, na istoj ili različitoj lokaciji. Djelatnost se određuje na nivou podrazreda klasifikacije djelatnosti. Ovo je statistička jedinica koja nije u potpunosti u skladu sa definicijama propisa o statističkim jedinicama za posmatranje i analizu proizvodnog sistema EU-a (Council Regulation (EEC) No 696/93 on the statistical units for observation and analysing within European Community).

2.3 Podaci

U PRODCOM dijelu godišnjeg istraživanja industrije prikupljaju se podaci o ostvarenoj proizvodnji, internoj potrošnji, zalihama i prodaji industrijskih proizvoda. Na taj su način, za neki konkretan proizvod, prikazani proizvodnja kao izvor raspoloživih količina, a potrošnja, prodaja i završne zalihe, kao rashodna strana bilansa raspoloživih količina.

⁴⁾ ISIC Rev. 3 - International Standard Industrial Classification (Međunarodna standardna industrijska klasifikacija svih ekonomskih djelatnosti)

⁵⁾ Sistem nacionalnih računa Ujedinjenih Nacija (System of National Accounts) 1993 - SNA 93 (ISBN 92-1-161352-3) i Evropski sistem nacionalnih računa 1995 (European System of Accounts) - ESA 95 (Propis Vijeća EU No 2223/96), usklađen sa SNA 93.

Za publikovanje su izabrani podaci o ostvarenoj redovnoj proizvodnji i tržišnim efektima proizvodnje (ostvarena prodaja po količini i vrijednosti i izvedena prosječna vrijednost jedinice gotovog proizvoda). Ostvarena prodaja obuhvata i one količine koje su u izvještajnom periodu prodane sa zaliha.

Proizvod Proizvod je posljedica neke industrijske djelatnosti, a definisan je Nomenklaturom industrijskih proizvoda. Ovaj se termin koristi kao opšti naziv za robe i dobra koji imaju fizičku dimenziju i za industrijske usluge.

Gotov proizvod Pod pojmom gotov proizvod smatra se svaki proizvod koji je u procesu proizvodnje dostigao odgovarajući stepen prerade ili dorade tako da je u Nomenklaturi industrijskih proizvoda naveden pod posebnom šifrom i nazivom. Pojam tako definisanoga gotovog proizvoda obuhvata i sve radove dovršavanja proizvoda kojima pripadaju čišćenje, pakovanje, ispitivanje kvaliteta, klasiranje i slično. Količine neispravnih proizvoda ("škart") ne smatraju se u gotovim proizvodima.

Intermedijarni proizvod Ovo je proizvod, koji je dostigao određeni stepen prerade ili dorade tako da je definisan u nomenklaturi industrijskih proizvoda, a koji je proizvelo preduzeće ili jedna od jedinica u sastavu preduzeća, ali koji se u istom preduzeću, u istoj ili drugoj jedinici u sastavu tog preduzeća dalje prerađuje ili obrađuje i takvim se postupcima pretvara u novi proizvod iz nomenklature industrijskih proizvoda (ili se ugrađuje u novi proizvod). Proizvodi kupljeni od trećih osoba radi preprodaje u istom obliku u kojem su i kupljeni ne smatraju se intermedijarnim proizvodima, kao ni proizvodi koji se koriste za bruto investicije u vlastiti fiksni kapital preduzeća ili njihovih jedinica u sastavu.

Ukupna proizvodnja Ukupna proizvodnja je ukupna količina određenog proizvoda definisanog Nomenklaturom industrijskih proizvoda, proizvedena u jedinici posmatranja u izvještajnoj godini, bez obzira na to da li je prodana trećim licima u zemlji ili inostranstvu (izvoz), stavljena na zalihe gotovih proizvoda (namijenjenih prodaji) ili se koristila za daljnju internu preradu (intermedijarni proizvodi), ili kombinovano.

Prodana proizvodnja Pod pojmom prodana proizvodnja podrazumijevaju se količine i ukupna vrijednost proizvoda koji su bilo kada proizvedeni, a koji su prodani (fakturisani) u izvještajnoj godini.

Vrijednost prodane proizvodnje – (*Value of production sold*) treba obračunati na temelju prodajne cijene na izlazu iz preduzeća (*ex-works*) u toku izvještajnog perioda. Vrijednost prodane proizvodnje uvijek uključuje i troškove pakovanja, čak i kada su ovi troškovi fakturirani zasebno. Međutim, vrijednost prodane proizvodnje ne obuhvata:

- nikakve poreze na promet ili takse koje se naplaćuju od potrošača
- posebno obračunate i fakturirane troškove
- popuste potrošačima

Jedinična vrijednost prodatih proizvoda Predstavlja prosječnu vrijednost jedinice proizvoda, a ne pravu prosječnu cijenu tih proizvoda. Ovaj se podatak ne prikuplja direktno već se dobije računanjem (dijeljenjem vrijednosti prodatih proizvoda, s prodanim količinama tih proizvoda, a izražena je u KM).

2.4 Proizvodnja

Redovna proizvodnja je proizvodnja koju obavlja jedinica posmatranja koristeći kupljene ili vlastite sirovine.

Proizvodnja odnosno prerada na temelju ugovora - (*Contract processing*) je uslužna proizvodnja industrijskih proizvoda koja se obavlja s onda kada poslovni subjekat na osnovu ugovora od sirovina čiji je vlasnik naručilac, proizvodi ili prerađuje određeni proizvod definisan nomenklaturom. Podatke o ovoj proizvodnji daje poslovna jedinica koja vrši proizvodnju na bazi ugovora (ona je izvještajna jedinica), a vrijednost proizvodnje je iznos koji naručilac plaća za ovu uslugu. Ni u kakvom ugovornom sporazumu naručilac i izvršilac ne mogu biti preduzeće i

jedinice u sastavu istog preduzeća, tj. ugovorna proizvodnja među različitim pogonima istog preduzeća nije moguća.

Industrijske usluge – (Industrial services) obuhvataju usluge dorade, popravka, održavanja i sastavljanja (montaža odnosno instaliranje i asembliranje) koje vrši jedinica posmatranja, odnosno njena industrijska jedinica u sastavu, a koje su posebno fakturisane. U pravilu, industrijske usluge se iskazuju po svakoj pojedinačnoj vrsti izvršene usluge, kako su one specificirane u Nomenklaturi industrijskih proizvoda, i to u fizičkim mjernim jedinicama – *efektivnim satima*, odnosno hiljadama efektivnih sati. Izuzetak je dorada tekstila (oblast 17 iz Klasifikacije djelatnosti), koja se iskazuje i prati isto kao i vlastita proizvodnja i za koju su utvrđene druge fizičke mjerne jedinice prema Nomenklaturi industrijskih proizvoda. Vrijednost industrijskih usluga iskazuje se u hiljadama KM.

Uslužna proizvodnje na bazi ugovora tj. proizvodnja na osnovu ugovora i industrijske usluge koje se vrše na osnovu ugovora se ne tretiraju kao redovna proizvodnja i nisu obuhvaćene ovom publikacijom.

3. VAŽNE NAPOMENE

Na nivou države Bosne i Hercegovine još nije službeno usvojena jedinstvena klasifikacija djelatnosti, iako je izvršeno njeno potpuno usaglašavanje sa NACE Rev.1.1. (proces donošenja zakona o njenoj obaveznoj primjeni u Bosni i Hercegovini je u toku), tako da su trenutno na snazi zasebne entitetske klasifikacije i klasifikacija Distrikta Brčko, donesene posebnim entitetskim zakonima i zakonom distrikta. Ove se klasifikacije razlikuju samo terminološki i to je razlog zbog kojeg se nazivi određenih nivoa klasifikacije razlikuju među entitetima.

Za prikazivanje rezultata na nivou BiH korišteni su nazivi djelatnosti koji su već usaglašeni u okviru klasifikacije djelatnosti BiH.

U PRODCOM dijelu godišnjeg istraživanja industrije korištena je jedinstvena Nomenklatura industrijskih proizvoda koja se bazira na PRODCOM listi iz 1994 godine. Iako je to vrlo zastarjela verzija PRODCOM liste, ipak se ona dosta dobro podudara sa novijim PRODCOM listama. Proces utvrđivanja i usvajanja jedinstvene nomenklature industrijskih proizvoda u Bosni i Hercegovini je u toku i planira se njeno korištenje u godišnjem istraživanju industrijske proizvodnje u 2005 godini.

Obuhvat PRODCOM istraživanja nije potpun i nije usaglašen ni među entitetima, ni sa Distriktom Brčko. Obuhvat je određen adresarima statističkih jedinica za godišnje istraživanje industrije, koji se zasebno vode u FZS, RZSRS i SBDB. U FZS su obuhvaćene izvještajne jedinice iz adresara sa 10 i više zaposlenih. U RZSRS i SBDB su obuhvaćene sve statističke jedinice iz adresara. U ovom trenutku nije urađeno nikakvo usaglašavanje obuhvata.

INTRODUCTION

Data on regular (own) industrial production in Bosnia and Herzegovina is collected for the first time for the year 2003, using harmonized annual statistical survey on industry IND-21, carried out in 2004. The results were published in the beginning of 2005. From that point onward such results have been included in the publishing plan of the Agency for statistics of Bosnia and Herzegovina, on regular basis.

The annual survey on industry for the year 2004 is fully harmonized between all official statistical institutions of Bosnia and Herzegovina, but it is compliant, in great extent, with international, primarily European standards and regulations. The following main objectives were set upon annual survey on industry:

- data collection, processing and publishing of annual statistics on industrial production in B&H, covering the territories of both entities and their administrative units, as well as territory of District Broke, focused on products specified in nomenclature of industrial products (based on PROCOMM list, i.e. PROCOMM regulation of EU¹⁾) - that means carrying out the annual PROCOMM survey on industrial production,
- collection and processing of data necessary to determine the structure of different areas in state economy and to make an analysis of changes that are taking place in each element of the structure, and also compilation of internationally harmonized statistical structural business indicators for industry – that means carrying out the annual Structural Business survey on industry according to EU regulation on Structural Business Statistics (SBS-R)²⁾
- collection of data necessary to establish a unique and harmonized system of weights to be used in compilation of monthly volume indicator of industrial production in Bosnia and Herzegovina, in each entity and in District Brčko, in accordance with European standards and regulations,
- dissemination of data on industrial production (PRODCOM results) to domestic and international users,
- dissemination of data on structure of industrial production (Structural Business Statistical Indicators – SBS Indicators) to domestic and international users.

Annual survey on industry is organized in such a way that it comprises two, in its nature, rather different parts: PRODCOM survey and Structural business survey.

PRODCOM survey is oriented to the product and is dealing with direct data on volume and value of sales of industrial production, at the detailed level of a single product, as it is specified in nomenclature of industrial products. The subject of the survey is industrial production, accomplished at the territory of Bosnia and Herzegovina, in the period of reporting year.

Structural Business survey is currently oriented to basic elements of production accounts. This part of the annual survey on industry is still in the developing and methodology harmonization phase. The subject of the survey is business information on industrial enterprises, referring to principal activity of the enterprise, and also information on activity of the enterprise units

¹⁾ PRODCOM is abbreviation for EU nomenclature of industrial products derived from "PROducts of the European COMmunity". PRODCOM is based on EEC regulation No. 3924/91 dated on December 19. 1991 which imposes obligation on member states to carry out survey on industrial production

²⁾ Structural Business Statistics Regulations i.e. SBS-R (EEC Regulation No 58/97 i 2700/98)

(establishments) that are the part of the enterprise, all at the class level (four digit code of NACE classification of activity).

The publication is presenting, in systematic way, the data collected through 2004 annual PRODCOM survey and gives information on volume of production, volume of sales and value of sales of industrial products and services that are results of regular production carried out in reporting unit (based on own or purchased raw materials).

METHODOLOGICAL EXPLANATIONS

1. ORGANIZATION OF THE SURVEY

Agency for Statistics of Bosnia and Herzegovina (BHAS), Federal Office of Statistics (FZS) together with its cantonal offices, Institute for Statistics of Republika Srpska (RZSRS) and Statistical Office of District Brčko (SBDB) took part in implementation of annual survey on industry.

BHAS, FZS and RZSRS had harmonized, in full coordination, the methodology of annual survey on industry for 2004 and jointly agreed upon the contents and the form of questionnaire and also prepared instructions for filling it up.

FZS, RZSRS and SBDB organized the whole field work i.e. they printed and distributed questionnaires and all accompanying documents, necessary for survey to be carried out.

In the course of their standard works FZS, RZSRS and SBDB used to create and update address lists of statistical units to be followed up through industry surveys. These address lists were used as a basis for annual survey on industry.

FZS, RZSRS and SBDB held all necessary trainings in different cantonal and central statistical offices, and altogether with statisticians from local offices they organized direct visits to reporting units, whenever it was judged as important. All major difficulties they resolved in direct contact with reporting units.

Computer applications for data entry, checking, control and processing were developed in each entity statistical institute and in SBDB, reflecting the objective of the annual survey on industry y and structure and contents of the questionnaire.

Agency for statistics of Bosnia and Herzegovina made the agreement with FZS, RZSRS and SBDB upon the contents, type and form of data to be transmitted for further processing, and developed IT application for taking over, aggregation and compiling of PRODCOM results for the level of Bosnia and Herzegovina.

FZS, RZSRS and SBDB collected completed questionnaires and get done all activities related to data entry, analysis and control.

FZS, RZSRS and SBDB accomplished the first stage processing of collected PRODCOM data such that necessary information, in required form, was submitted to BHAS.

BHAS aggregated the data collected from FZS, RZSRS and SBDB and prepared and published PRODCOM results for Bosnia and Herzegovina. Data for the level of Bosnia and Herzegovina are compiled from clarified, checked and processed data originated from entities' statistical institutes and statistical office of District Brčko.

2. CONCEPTS AND DEFINITIONS

2.1 *Industry*

The term industry, as it is used in annual survey on industry IND-21, refers to the three sections of the classification of activities (according to NACE Rev.1.1):

C - MINING AND QUARRYING,

D - MANUFACTURING and

E - ELECTRICITY, GAS AND WATER SUPPLY

Definition of industry is just the same as the one used by EU.

Concepts and definitions of all other terms used in annual PRODCOM survey on industrial production (such as principal, secondary and ancillary activity, statistical units, product,

production etc.) are taken from the introduction to NACE Rev1.1, from EU regulation on the statistical units for the observation and analysis of the production system in the Community³⁾, from introduction to ISIC Rev. 3⁴⁾ and from introduction to PRODCOM. Those definitions and concepts are harmonized with methodological frame of SNA 93 and ESA 95⁵⁾.

All specific explanations, given in this chapter, are relates only to the PRODCOM part of annual survey on industry, the results of which, those reflecting regular industrial production, are published in this publication.

2.2 Statistical units

Statistical units in business statistics are autonomous institutions and parts thereof that are contributing in performing the same economic activity. They are undertaking economic transactions of goods and services. In producing goods and services that could be sold, given to other parties without any compensation, or used for further processing and production, statistical units are utilizing their own labor force (manpower). The important attribute of statistical unit is its autonomy in making financial obligations and its right to be owner of tangible and intangible assets.

Observation units are those statistical units that statistics is compiled for, with the aim of monitoring and following up their characteristics and features. The basic limitation set upon statistical unit of observation is its autonomy in regard to financing and production process, what results in two types of observation units:

1. Units that are completely autonomous in regard to financing and production process (enterprise) and
2. Units that are autonomous only in regard to production process (enterprise units, i.e. parts of enterprise, so called establishments). Autonomy in decision-making means that such enterprise units are keeping administrative records on all basic characteristics of the process.

Reporting units are those statistical units that are required to provide data. They could be observation units that are subject of interest, but also they could be completely different units.

Reporting units of the PRODCOM part of annual survey on industry are legal units and their parts that are, in the register of business subjects of FZS, RZSRS and SBDB, classified in the sections C, D and E (industry), as well as those legal units that are not classified in industry sections, but have their parts performing industrial activities

Observation units of the PRODCOM part of annual survey on industry are enterprises and their parts i.e. enterprise units (establishments) that are engaged in industrial activities. Results of the industrial activity are goods and services, as defined in nomenclature of industrial products.

Enterprise is the smallest combination of legal units that makes an organisational unit producing goods or services, which has a certain degree of autonomy in decision-making, especially for the allocation of its current resources. An enterprise carries out one or more activities at one or more locations.

Enterprise unit i.e. establishment is a part of enterprise (e.g. a workshop, factory, department etc) performing the same or different activity as the enterprise comprising it and is situated at the same or different location. The definition of enterprise unit i.e. establishment is not completely comparable with definitions stipulated in Council Regulation (EEC) No 696/93 on the statistical units for observation and analysing within European Community.

³⁾ Council Regulation (EEC) No 696/93 on the statistical units for observation and analyzing within European Community

⁴⁾ ISIC Rev 3 - International Standard Industrial Classification

⁵⁾ System of National Accounts 1993 - SNA 93 (ISBN 92-1-161352-3) and European System of National Accounts 1995 ESA 95 (EEC regulation No 2223/96), harmonized with SNA 93.

2.3 Data

Data on realized i.e. total production, intermediate consumption, stocks and sold production are collected through PRODCOM part of annual survey on industry. In such a way, for some specific product, data on production is presented as the source side and data on consumption, sales and final stocks as expenditure side in the balance of available quantities.

The decision is made and data on total regular production as well as data on market effect of such a production (production sold in terms of quantity and value and derived variable – average unit value of the product sold) were selected for publishing. The production sold comprises also sales of the stocks effected during the reporting period.

Product is the outcome of economic activity and defined as separate item in the Nomenclature of industrial products. It is the generic term applied to goods, that have physical characteristics, and for services.

Finished product is each products for which processing have been completed i.e. the product that have undergone some processing and reached such a degree of transformation or treatment that it became a new product and should be assigned specific code and description listed in the Nomenclature of industrial products. Such defined term of finished product also covers all finishing works related to the specific product, such as cleaning, packing, quality testing, sorting etc. The volume of damaged and incorrect products (wastes) are not to be considered as finished products.

Intermediate product is the product, processed in such a degree that is specified in nomenclature of industrial product, produced by enterprise or one of its parts (establishments) and used in the same enterprise, or in the sme or other part of the enterprise, for further processing such to become new product or assembled such to create new product, as defined in nomenclature of industrial products. Goods and product purchased from third parties to be resaled, in the same shape, form and quality as purchased, are not considered as intermediate products. Also, product used for investment in fixed assets of the enterprise or parts of the enterprise are not considered as intermediate products.

Total production is the actual production of the single product, assigned a single code and description in the Nomenclature of industrial products, which has been carried out during the reference period in the reporting unit, irrespective of whether sold to the third parties in the country or abroad (exports), put into stock or used for further processing (intermediate products), or combined.

Production sold is the production, in terms of volume and value, that was carried out at some time and which has been sold (invoiced) during the reference period (year of the report).

Value of production sold should be calculated on the basis of the ex-works selling price obtained during the reporting period. The value of the producton sold always includes packaging costs, even if they are charged separately. However, the following are not included:

- any turnover tax and consumer tax charged
- separately charged freight costs
- any discounts granted to customers

Unit value of the products sold is the average value of the sold production by the unit product, not the exact average price of the sold product. This data is not collected directly, but instead it is derived (calculated by deviding value of production sold by the volume of sold products, expressed in KM)

2.4 Production

Regular production is the production that is acomplished by the observation unit that is utilizing the purchased or its own raw materials.

Contract processing is the type of service processing of industrial that takes place when business subject, based on contract agreement, utilizes material supplied free of charge by the principal and produces or processes certain product defined by the Nomenclature of industrial products. This production must be reported by the business subject (contractor which is the

reporting unit) that is worked on the material supplied by a principal and the value to be recorded is the fee paid by the principal. In any contract processing arrangement, the principal and the contractor must be different undertakings; contract processing between different plants belonging to the same undertaking is not possible.

Industrial services cover treatment, repairs, maintenance and assembly work (mounting, installation and assembling) that are performed by observation unit, or its parts and which is invoiced separately. Each industrial service should be reported separately for each specific type of service, as specified in Nomenclature of industrial products and they, and specific measuring unit should be applied – effective hours, or thousands of effective hours. An exception is textile finishing Division 17 in classification of activities), where the finishing production has to be reported in volume too. The value of industrial services are expressed in thousands of KM

Contract processing and industrial services based on contract are not treated as regular production and they are not covered in this publication.

3. IMPORTANT NOTES

The single state level classification of economic activities has not been officially accepted and introduced in statistical practice all over the country, although it has been harmonized with NACE Rev. 1.1. Currently, each Entity and District Brčko is using, and is obliged to use its own classification enforced by Entity law and District law. Two Entity classifications are not identical, but they differ mainly in terminology. Description of activities that have already been harmonized with NACE Rev. 1.1. for the level of Bosnia and Herzegovina, are used in this publication for the purpose of presenting the results

In the PRODCOM part of annual survey on industry, a single Nomenclature of industrial products was used. It was nomenclature based on PRODCOM list from 1994. Although it is a very outdated PRODCOM list, nevertheless it seems rather compatible with recent PRODCOM lists. The process of establishing and approval of new nomenclature of industrial products for Bosnia and Herzegovina NIP BiH is in its final stage and it is planned to be introduced in annual industrial survey for 2005.

The coverage of the PRODCOM part of annual survey on industry is not full and is not harmonized between entities nor with District Brčko. The coverage is based on the address list of statistical units for annual statistical survey on industry, that is separately kept in FZS, RZSRS and SBDB. The coverage in FZS is limited to those reporting units, out of the complete address list, that have 10 and more employees. In RZSRS and SBDB all reporting units from address list are included in the survey. For the moment no adjustment of the survey coverage has not been done yet.
