### Administrative structure of Bosnia and Herzegovina (BiH)

The Federation of Bosnia and Herzegovina (FBiH)  
Republika Srpska (RS), and  
Brcko District BiH (BD BiH).

The capital of Bosnia and Herzegovina is Sarajevo.  
The Federation of Bosnia and Herzegovina is administratively divided into 10 cantons, and cantons are subdivided into 79 municipalities.  
Republika Srpska is administratively divided into 62 municipalities. The city of Brcko is a separate administrative unit- District.

**In BiH there are three National parks and two Nature parks.**  
National parks are Sutjeska, Kozara and Una. Nature parks are Hutovo Blato and Blidinje.

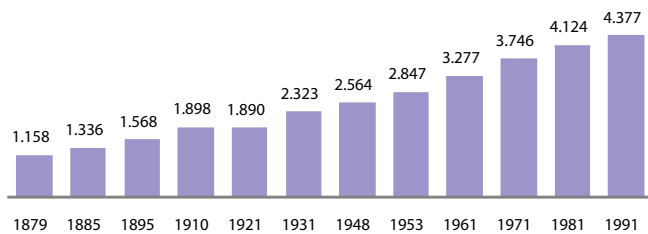

For the census conducted earlier in our country, the official results referred to the so-called resident population, i.e. population who reside in the territory of Bosnia and Herzegovina, regardless of whether at the critical moment of the census, the persons were present at the place of residence or were temporary absent, in the country or abroad, due to some other reasons.

In the Population Census in 1961 and 1971 as a resident population persons were registered at the place where they worked at the Census moment, while in the 1981 and 1991 Census these persons were enumerated as a resident population in the places where their families lived.

## CONSUMER PRICE INDEX IN BIH BY COICOP GROUPS IN 2013

(2010=100)

**Consumer Price Index allows** to measure the consumer price inflation that is the rate of change of the consumer prices of goods and services purchased by the households through monetary transactions in the economic territory of Bosnia and Herzegovina for products that directly satisfy consumers needs.

Consumer Price Index represents a measure of inflation in state. It serves as a guarantee the value of recurrent payments in escalator clauses for contractual relationships, it enables a comparison of inflation in country with inflation in other countries as well as a comparison of price movements within particular country and regions, it can also serve as a base for deflating national accounts data and other purposes.

CPI is calculated on the basis of the representative list of products that consists of 599 items in the year 2013. Each month over 21 000 prices are being collected in accordance with defined sample of outlets on 12

geographical locations (5 towns in Federation of B&H, 6 towns in Republika Srpska and in District Brcko).

In comparison to the year 2012, average price level in the year 2013 was lower by 0,1% due to the average price decrease in divisions of Clothing and footwear (9,0%), Health (1,7%), Transport (1,1%). Other divisions did not register significant increases: Food and non-alcoholic beverages (0,1%), Housing, water, electricity, gas and other fuels (0,8%), Furnishing, house equipment and regular maintenance of the household (0,1%), Communications (0,2%), Recreation and culture (1,0%), Education (1,4%), Restaurants and hotels (0,4%), Other goods and services (0,3%), Alcoholic beverages and tobacco (6,4%).

**Comparative price levels** are expressed in the form of price level indices (PLIs). PLIs provide a comparison of countries' price levels with respect to the EU average: if the PLI is higher than 100, the country concerned is relatively expensive compared to the EU average and vice versa.

**Producer Price Index** is a short-term statistical indicator that represents the measurement of change of prices of industrial products produced and sold by enterprises. This statistical indicator serves as the measure of inflation. It can also serve as the indicator of economical performances, escalator in long-term contracts, deflator for output values, intermediate consumption, and capital consumption in National Accounts, and as an important tool in creating monetary and fiscal politics. PPI in Bosnia and Herzegovina is calculated based on the representative list of products and its producers making a sample of cca.531 producers and 918 products. Each month 1854 prices are collected directly from producers through the unique questionnaire. Since 1/1/2013 published indices are based on the average of 2011.
