PREGOVOR

Bilten "Nacionalni računi - Bruto domaći proizvod za Bosnu i Hercegovinu" urađen je u okviru redovnih aktivnosti Agencije za statistiku Bosne i Hercegovine na agregiranju i publikovanju podataka za nivo Bosne i Hercegovine. Podaci publikovani u Biltenu rezultat su zajedničkog rada Agencije za statistiku Bosne i Hercegovine, Federalnog zavoda za statistiku, Republičkog zavoda za statistiku Republike Srpske i Ekspoziture BHAS-a u Brčko distriktu.

U Biltenu se publikuju osnovni agregati nacionalnih računa za Bosnu i Hercegovinu. Bruto domaći proizvod Bosne i Hercegovine obračunat je prema metodologiji Sistema nacionalnih računa Ujedinjenih naroda - SNA2008 i Evropskog sistema nacionalnih računa - ESA2010. Rad na primjeni ovih preporuka zavisi od obima, kvaliteta i sadržaja baznih statističkih podataka na kojima se Sistem zasniva. Saglasno tome Sistem će se i razvijati u narednom periodu. Krajnji zadatak je uvođenje i dosljedna primjena metodologije i preporuka SNA/ESA, što treba rezultovati zaokruženim Sistemom nacionalnih računa za Bosnu i Hercegovinu.

U prvom dijelu Biltena publikovana je serija podataka o bruto domaćem proizvodu (BDP) za nivo Bosne i Hercegovine po proizvodnom pristupu u tekućim cijenama, stalnim cijenama prethodne godine te u stalnim cijenama referentne godine (2015=100) i bruto domaćem proizvodu po dohodovnom pristupu u tekućim cijenama.

U drugom dijelu Biltena prezentovani su podaci o bruto domaćem proizvodu po rashodnom pristupu kao i osnovne kategorije potrošnje u tekućim cijenama, stalnim cijenama prethodne godine kao i stalnim cijenama referentne godine (2015=100).

Potrebno je imati u vidu da se procjene BDP mogu proizvesti korištenjem tri različita pristupa (proizvodni, rashodni i dohodovni), a svaki od navedenih pokazuje drugačiji pogled na ekonomsku sliku. Premda bi teoretski, mjerenja BDP korištenjem različitih pristupa trebala da se podudare, u praksi se javljaju razlike uslijed razlika u izvorima podataka, kao i korištenim metodama. Uobičajna je praksa da zemlje eksciplitno prezentuju ovu razliku u publikacijama, a u isto vrijeme poduzimaju aktivnosti da se ove razlike zadrže na relativno malom nivou.

Uvjereni smo da će prikazani podaci omogućiti sveobuhvatnije praćenje ekonomske aktivnosti i pružiti najvažnije informacije širokom krugu korisnika.

Velimir Jukić, direktor

FOREWORD

The Bulletin "National Accounts - Gross Domestic Product for Bosnia and Herzegovina" was prepared as a part of the regular activities of the Agency for Statistics of Bosnia and Herzegovina on the aggregation and publication of data at the level of Bosnia and Herzegovina. Data in the Bulletin presents results of the joint work of the Agency for Statistics of BiH, the Federal Office for Statistics, Republic Srpska Institute for Statistics and BHAS Branch Office in Brčko District.

Main aggregates of national accounts for Bosnia and Herzegovina are presented in this publication. Gross domestic product of Bosnia and Herzegovina has been calculated according to the methodology of System of National Accounts – SNA2008 and European System of National Accounts ESA2010. Activities on application of these recommendations depend on volume, quality and content of primary statistical data the system is based on, and directly will reflect on future development of the System. Final task is introduction and consistent application of SNA methodology and recommendations in order to achieve comprehensive system of national accounts for Bosnia and Herzegovina.

Data of gross domestic product (GDP) by production approach at current prices, at constant prices of the previous year and constant prices of reference year (2015=100) and gross domestic product by income approach at current prices are given in the first part.

Data of gross domestic product by expenditure approach as well as the main expenditure categories at current prices, at constant prices of the previous year and constant prices of reference year (2015=100) are given in the second part.

It should be noted that GDP estimates can be produced using three different approaches (production, expenditure, and income), each one showing a different aspect of the economic picture. Although theoretically the measurements of GDP using different approaches should coincide, in practice, discrepancies arise due to the differences in data sources and methods used. It is common practice that countries present these discrepancies explicitly in their publications, at the same time that efforts are made to keep them at a reasonable small relative magnitude. In the case of BiH the official figures of GDP are based on the production approach, thus showing the creation of value and its growth rate from year to year by industrial origin of economic activity, whereas the GDP estimates by final expenditures show how the value created through economic activity is spent by the different economic sectors in consumption, investment or sold abroad as exports.

We are fully convinced that the data presented will facilitate a comprising observance of economic activity and offer the crucial information for a wide range of users.

Velimir Jukić, Director

**BRUTO DOMAĆI PROIZVOD
PREMA PROIZVODNOM I
DOHODOVNOM PRISTUPU**

*GROSS DOMESTIC PRODUCT BY
PRODUCTION AND INCOME APPROACH*

UVODNE NAPOMENE

U obračunu Bruto domaćeg proizvoda za Bosnu i Hercegovinu i entitete primijenjuju se metodologija Ujedinjenih naroda «Sistem nacionalnih računa 2008» – SNA2008 i njena evropska verzija «Evropski sistem nacionalnih računa 2010» – ESA2010.

Za izvođenje obračuna Bruto domaćeg proizvoda, za BiH i entitete, korišteni su administrativni izvori podataka, rezultati zvaničnih statističkih istraživanja, a obuhvaćene su i procjene neobuhvaćenih ekonomskih aktivnosti imputirane rente.

Obračun se izvodi na osnovu podataka poslovnih subjekata registrovanih i raspoređenih prema Klasifikaciji djelatnosti KD BiH 2010, koja je usklađena sa evropskom klasifikacijom NACE – Rev.2. Poslovni subjekti su za obračun BDP-a grupisani u područja djelatnosti kao institucionalne jedinice, prema sjedištu i pretežnoj djelatnosti preduzeća, a ne prema jedinicama homogene aktivnosti (jedinice u sastavu).

Preračunavanje BDP-a u USD, odnosno EUR vrši se po prosječnom godišnjem kursu Centralne banke Bosne i Hercegovine, a obračun BDP-a po stanovniku na osnovu procijenjenog ukupnog broja stanovnika sredinom godine.

Bruto domaći proizvod (BDP) za BiH po proizvodnom pristupu za 2018. godinu nominalno je iznosio 33.444 mil. KM i u odnosu na 2017. godinu nominalno je veći za 6,59 %.

Bruto domaći proizvod po stanovniku iznosio je 9.566KM ili 4.891EUR ili 5.771USD.

Korištenjem podataka Centralne banke BiH (neto primarni dohoci iz inostranstva i neto primljeni transferi iz inostranstva), izračunat je bruto nacionalni dohodak i bruto nacionalni raspoloživi dohodak. Bruto nacionalni dohodak za BiH u 2018. godini iznosio je 33.348 mil. KM, a bruto nacionalni raspoloživi dohodak 37.216 mil. KM.

U proizvodnim djelatnostima (poljoprivreda, šumarstvo i ribarstvo, vađenje ruda i kamena, prerađivačka industrija, proizvodnja i snadbijevanje električnom energijom, snadbijevanje vodom i građevinarstvo) stvara se 35,63% dodane vrijednosti, a u uslužnim djelatnostima 64,37%. Najveće učešće u BDP ima dodana vrijednost stvorena u trgovini (14,02%), prerađivačkoj industriji (13,23%), javnoj upravi (7,37%), kao i u poljoprivredi, šumarstvu i ribolovu (5,89%).

Posmatrano po djelatnostima najveći rast bruto dodane vrijednosti bilježe: proizvodnja i snadbijevanje električnom energijom, plinom, parom i klimatizacija (24,92%), poljoprivreda, šumarstvo i ribolov (11,99%) i administrativne i pomoćne uslužne djelatnosti (10,25%).

Bruto domaći proizvod u stalnim cijenama (cijenama prethodne godine) za 2018. godinu procijenjen je u iznosu od 32.550 mil. KM i realno je veći za 3,74%.

INTRODUCTORY REMARKS

In calculating the gross domestic product for Bosnia and Herzegovina and the entities the methodology of United Nations "System of National Accounts 2008" – SNA2008 and its European version "European System of national accounts 2010" – ESA2010 is used.

For the calculation of gross domestic product administrative sources of data are used, as well as data obtained through official statistical survey, while non-observed economy estimates and imputed rent are also included.

The calculation is based on the data of business enterprises registered and allocated according to the Classification of activities KD BiH 2010, which has been harmonized with the European classification NACE – Rev.2. The business enterprises are at present, for the GDP calculation, grouped, as institutional units, according to the areas of activities, according to the headquarters and main activity, and not according to the units of homogenous activity.

The recalculation of gross domestic product into USD and EUR is based on the average annual exchange rate and the calculation of GDP per capita is computed according to the estimated total population in mid-year.

GDP based on production approach at current prices is estimated at 33,444 millions of KM in 2018. The nominal increase of GDP in relation with 2017 was 6.59%.

Gross domestic product per capita is estimated 9,566 KM or 4,891 EUR or 5.771 USD in 2018.

Data of Central Bank of BiH about net primary income from the rest of the world and net current transfers from the rest of the world are used for calculation gross national income and gross national disposable income. Gross national income for BiH in 2018 is estimated at 33,348 million KM and gross national disposable income is estimated at 37,216 million KM.

In the basic activities (Agriculture, Forestry and fishing, Mining, Manufacturing industry, Electricity, Water supply and Construction) is made 35.63% of value added and in services activities 64.37%. The highest share in GDP has value added of Trade by 14.02%, Manufacturing by 13.23%, Public administration by 7.37% and Agriculture, forestry and fishing by 5.89%.

Observed by activities increase of the gross value added was recorded in: Electricity, gas, steam and air conditioning supply (24.92%), Agriculture, forestry and fishing (11.99%) and Administrative and support service activities (10.25%).

GDP at constant prices (prices of previous year) for 2018 is estimated at 32,550 million KM. In volume terms the increase in GDP was 3.74%.

POSEBNE NAPOMENE KORISNICIMA

Korisnicima podataka želimo skrenuti pažnju na činjenice koje mogu biti korisne za razumijevanje sadržaja i obima pojedinih agregata prezentovanih u Biltenu. Obračun bruto domaćeg proizvoda izvodi se na osnovu administrativnih izvora podataka, kao i na osnovu podataka dobivenih iz zvaničnih statističkih istraživanja koja provode statističke institucije. Broj i sadržaj statističkih istraživanja koja se provode ne zadovoljava potrebe statističara nacionalnih računa da odgovore zahtjevima dosljedne i potpune primjene pomenutih međunarodnih standarda i metodologija. Jedna od općih metodoloških karakteristika nacionalnih računa jeste mogućnost revizije – ne samo u vidu korekcija početnih procjena i preliminarnih rezultata, već i finalnih obračuna i objavljenih statističkih podataka. U sistemu nacionalnih računa, generalno, revizije se provode kao posljedica uvođenja novih i bitnih poboljšanja postojećih izvora podataka, promjena u klasifikacijama i uspostavljanja novih principa, regulativa i međunarodnih preporuka.

Makroekonomski agregati obračunati po proizvodnom i dohodovnom pristupu za period 2005-2018. godina iskazani su prema KD BiH 2010 koja je usklađena sa NACE Rev.2. Bruto domaći proizvod, kao najvažniji makroekonomski agregat, prikazan je u tekućim cijenama, cijenama prethodne godine i u cijenama referentne godine (2015=100).

Obračun BDP u stalnim cijenama je veoma važan pokazatelj dinamike i nivoa ekonomskog razvoja i pokazuje ekonomski rast između različitih perioda kada se eliminiše uticaj promjena cijena. Zbog ograničenja u pogledu adekvatnih deflatora međufazne potrošnje obračun BDP u stalnim cijenama, rađen je metodom jednostrukih indikatora (indikator outputa). Primjena jednostrukih indikatora implicira pretpostavku fiksnih I/O koeficijenata. Metod jednostruke **ekstrapolacije** predstavlja ekstrapolaciju bruto vrijednosti proizvodnje bazne godine odgovarajućim indeksima fizičkog obima. Metod jednostruke **deflacije** predstavlja deflacioniranje bruto vrijednosti proizvodnje tekuće godine sa odgovarajućim indeksima cijena. Procijene su rađene u cijenama prethodne godine. Vrijednost obima u cijenama prethodne godine dopušta poređenje podataka samo između dvije uzastopne godine. Da bi se dobila dugoročna serija, procjene mjera obima u cijenama prethodne godine su lančano povezane sa utvrđenim fiksnim referentnim periodom, čime se omogućava poređenje između bilo kojih odabranih perioda. Odabrani referentni period za BiH je 2015. godina. Lančano povezane vrijednosti nisu aditivne tj. agregirani nivoi se ne mogu dobiti direktno kao zbir komponenti. U obračun bruto domaćeg proizvoda uključena je vrijednost imputirane rente kao i procjene neobuhvaćenih ekonomskih aktivnosti. Ilegalne aktivnosti nisu uključene u obračun BDP-a.

Agencija za statistiku BiH obračunava komponente računa proizvodnje i računa formiranja dohotka za institucije Bosne i Hercegovine i Centralnu banku BiH. Dobiveni rezultati su raspoređeni u entitetske obračune kao i Brčko distrikt koristeći koeficijente za raspored prikupljenih indirektnih poreza sa jedinstvenog računa. Usluge finansijskog posredovanja indirektno mjerene (FISIM) predstavljaju kamatnu maržu i dio su vrijednosti proizvodnje finansijskog sektora, a izračunavaju se kao razlika između potraživanja po kamatama (aktivne kamate) i obaveza po kamatama (pasivne kamate) za institucionalne jedinice finansijskog posredovanja. FISIM nije alocirano po djelatnostima, njime je korigovana dodana vrijednost na nivou ekonomije. U tom slučaju cjelokupna vrijednost proizvodnje FISIM-a smatra se kao intermedijarna potrošnja sa nultom proizvodnjom te negativnom dodanom vrijednošću u jednakom iznosu. U računu stvaranja dohotka vrijednost FISIM-a je uključena u bruto dodanu vrijednost odnosno poslovni višak.

A NOTE OF EXPLANATION FOR DATA USERS

The attention of data users is drawn to some facts that could be useful in understanding the content and the size of the aggregates presented in the Bulletin. The calculation of the gross domestic product has been determined based on the existing data sources, as well as based on official statistical surveys, which had been done in the statistical institutions. The number of and the content of the surveys do not yet satisfy the needs of the national accounts statisticians in order to meet the demands of full implementation of the above-mentioned international methodologies.

One of the general methodological characteristics of National Accounts is possibility of making revisions – performing corrections not only to original estimates and preliminary results, but also to final calculations and published statistical data. In the System National Accounts, revisions generally occur due to the introduction of new data sources, the essential improvements to the existing ones, the changes of classifications or establishment of new principles, regulations and international recommendations.

Macroeconomic aggregates calculated by production and income approach for period 2005-2018 presented are according to the Classification of activities KD BiH 2010, which is harmonized with the NACE Rev.2. Gross Domestic Product, as the most important macroeconomic aggregate, is presented at current prices, at previous year prices and at prices of the reference year (2015=100).

Calculation of gross domestic product at constant prices is very important indicator of measuring of the dynamics and level of economic development deprived from the influence of prices. For the calculation of GDP at constant prices the concept of the single indicator method is used, due to the lack of adequate deflators of intermediate consumption. The most common single indicator used is a volume index of output. Applying a single indicator has implicit the assumption of fixed I/O coefficients. Single extrapolation method presents **extrapolation** of output in the base year by adequate volume index. Single **deflation** method presents deflation of output in current year by adequate price indices. The estimates were compiled at prices of previous year. However, volume value at prices of a previous year allows the comparison of the data only between two successive years. In order to obtain long-term series, estimates of volume measures at prices of previous year are chain-linked to produce series at a fixed reference period, thus allowing the comparison between any chosen different periods. The selected fixed reference period in BiH is 2015. Chain linked values are not additive.

Non observed economy (NOE) estimations are included in calculation of GDP. Illegal activities are not included. The estimate of imputed rental of owner-occupied dwellings is included in the GDP.

Agency for Statistics of Bosnia and Herzegovina calculates components of production account and income account for the Institutions of General Government of Bosnia and Herzegovina and the Central Bank of B&H. The components of the production account compiled by BHAS are allocated to the entities and the Brcko District using the coefficients of the distribution of indirect taxes from single account of Indirect Tax Authorities of BiH to the entities.

Financial intermediation services indirectly measured (FISIM) presents an interest margin and it is part of output of financial sector, is calculated as the difference between the claims of interest (active interest) and interest obligations under (passive interest) for the institutional units of financial intermediation. FISIM is not allocated by activities; value added on total economy is corrected by FISIM. In such a case the whole of the value of the output of FISIM is treated as intermediate consumption with zero output and negative value added equal in size but opposite in sign from the intermediate consumption. Value of FISIM is included in the gross value added and net operating surplus in generation of income accounts.

METODOLOŠKA OBJAŠNJENJA KONCEPTI I DEFINICIJE

Sistem makroekonomskih računa je makroekonomski sistem prezentacije podataka koji pruža uvid u cjelokupnu ekonomiju. Računi imaju centralno mjesto u statističkom sistemu i nezaobilazna su osnova za vođenje ekonomske politike i donošenje odluka na svim nivoima jer omogućavaju mjerenje nivoa ekonomske razvijenosti, stope ekonomskog rasta, promjena u proizvodnji, potrošnji, štednji, investicijama, izozu i uvozu.

Sistem nacionalnih računa se bazira na jedinstvenom konceptu, definicijama, konvencijama, klasifikacijama i pravilima za izradu računa koji su detaljno opisani u dva priručnika: Sistem nacionalnih računa 2008 (SNA2008) i Evropski sistem nacionalnih računa 2010 (ESA2010). SNA2008 pruža više teoretski okvir, dok ESA2010 obuhvata i dodatne detalje u cilju približavanja evropskom okruženju i praksi.

Integrirani nacionalni računi daju opsežnu ekonomsku sliku, koja olakšava shvatanje ekonomskih odnosa između privrednih subjekata kao i strukture i dinamike najvažnijih agregata koji opisuju ekonomski razvoj.

Sistem nacionalnih računa je međunarodno usvojen standard za makroekonomske račune, koji polazi od šireg koncepta proizvodnje. Prema ovom konceptu, proizvodnja, pored materijalne proizvodnje i materijalnih usluga, obuhvata i nematerijalne usluge u djelatnostima obrazovanja, zdravstva i socijalne zaštite, kulture, usluge bankarskih i osiguravajućih organizacija, usluge državnih organa na svim nivoima i sve ostale usluge koje nisu u vezi s materijalnom proizvodnjom.

U sistemu nacionalnih računa postoje vrijednosne kategorije koje se nazivaju agregati i koje imaju široku primjenu u svakodnevnoj praksi. Agregati su važni makroekonomski indikatori koji mjere rezultate aktivnosti ekonomije jedne zemlje i koji se koriste za makroekonomske analize. Osnovni i najvažniji makroekonomski agregat u sistemu nacionalnih računa jeste bruto domaći proizvod (BDP).

Bruto domaći proizvod je indikator ekonomskih aktivnosti na nivou cijele zemlje. Postoje tri metode obračuna BDP: proizvodna, rashodna i dohodovna metoda.

Prema proizvodnom pristupu bruto domaći proizvod je zbir bruto dodanih vrijednosti svih rezidentnih institucionalnih jedinica uvećan za iznos poreza na proizvode i umanjen za iznos subvencija i za FISIM.

NOTES ON METHODOLOGY CONCEPTS AND DEFINITIONS

System of National Accounts is a system of macroeconomic data presentation that provides insight into the economy as a whole. The National Accounts have a central place in the statistical system and of course are the basis for economic policy and decision making at all levels, enabling the measurement of the level of economic development, the rate of economic growth, changes in production, consumption, saving, gross fixed capital formation, export and imports.

SNA is based on a unique concept, definitions and rules international standard which are described in detail in two reference manuals: the "System of national Accounts 2008" (SNA2008) and the "European System of National Accounts 2010" (ESA2010). The SNA2008 provides more theoretical frame while the ESA2010 includes additional details in order to come closer to the European environment and practices.

Integrated national accounts provide a comprehensive picture of the economy, which facilitates understanding of the economic relations among economic subjects and the structure and dynamic of the main aggregates describing the economic development.

System National Accounts is an internationally accepted standard for macroeconomic accounts based on border concept of production. According to this concept the production covers, besides material production and material services, also, non-material services in education, health and social care, culture, banking and insurance organizations, services of government organizations on all levels and all other services that are not in connection with material production.

The System National Accounts contains value categories called aggregates. The Aggregates are important macroeconomic indicators that measure the results of the activities of the economy of the country and used for economic analysis. The main and the most important macroeconomic aggregates in the System of National Accounts is the Gross Domestic Product (GDP).

Gross domestic product is the indicator of economic activity in the whole country. There are three methods of calculating gross domestic product: production, expenditure and income methods.

According to the production approach, gross domestic product is the sum of gross value added generated in all activities, calculated according to basic prices and corrected for net taxes on products and for FISIM. Gross

Bruto dodana vrijednost, kao povećanje vrijednosti proizvodnje jednaka je razlici između bruto vrijednosti proizvodnje i međufazne potrošnje.

Prema rashodnom pristupu bruto domaći proizvod je zbir: a) finalne potrošnje (potrošnja domaćinstava, neprofitnih institucija koje služe domaćinstvima i vladina potrošnja), b) bruto investicija (bruto investicije u stalna sredstva, promjene u stanju zaliha i neto nabavke dragocjenosti) i c) neto izvoza roba i usluga (izvoz roba i usluga manje uvoz roba i usluga).

Prema dohodovnom pristupu bruto domaći proizvod je zbir potrošnje fiksnog kapitala, sredstava zaposlenih, neto poreza na proizvodnju, poslovnog viška i mješovitog dohotka.

Računom proizvodnje prikazuju se rezultati proizvodnih aktivnosti po pojedinim djelatnostima i sektorima. Osnovne stavke u računu proizvodnje su: bruto vrijednost proizvodnje, međufazna potrošnja i bruto dodana vrijednost kao njihova razlika i rezultat proizvodnih aktivnosti. Bruto dodana vrijednost u sebi sadrži: sredstva zaposlenih, bruto poslovni višak ili mješoviti dohodak i ostale poreze na proizvodnju.

Bruto vrijednost proizvodnje se definiše kao tržišna vrijednost svih proizvedenih roba i usluga koje proizvedu rezidentni proizvođači tokom obračunskog perioda. Razlikuju se tri kategorije proizvodnje: a) tržišna proizvodnja, b) proizvodnja za vlastitu finalnu upotrebu i c) ostala netržišna proizvodnja.

Međufazna potrošnja, po nabavnim cijenama, je vrijednost proizvoda i usluga koje se transformišu, koriste i troše u procesu proizvodnje. Međufazna potrošnja obuhvata: troškove sirovina i materijala, troškove energije i rezervnih dijelova, troškove usluga i ostale troškove poslovanja.

Dodana vrijednost, kao povećanje vrijednosti proizvodnje jednaka je razlici između bruto vrijednosti proizvodnje i međufazne potrošnje. Dodana vrijednost za institucionalne jedinice iskazuje se prema baznim (osnovnim) cijenama, tj. cijenama koje ne obuhvaćaju poreze na proizvode, a obuhvaćaju subvencije na proizvode.

Bruto domaći proizvod u tržišnim cijenama iskazuje vrijednost svih proizvedenih dobara i usluga rezidentnih jedinica. Bruto domaći proizvod jednak je: bruto vrijednosti proizvodnje u baznim cijenama minus međufazna potrošnja u tekućim cijenama plus porezi na proizvode minus subvencije na proizvode.

Bruto nacionalni dohodak je jednak zbiru bruto domaćeg proizvoda i salda primarnih dohodaka (od rada i kapitala) iz inostranstva.

Bruto nacionalni raspoloživi dohodak je jednak

value added, as the output value increase equals to the difference between gross output and intermediate consumption..

According to the expenditure approach, gross domestic product is the sum of the final consumption (households, NPISH and general government consumption), gross capital formation (gross fixed capital formation, changes in inventories and net acquisition of valuables) and the external balance of goods and services (exports of the goods and services less imports of goods and services).

According to the income approach, gross domestic product is the sum of the consumption of fixed capital, compensation of employees, net taxes on products and operating surplus or mixed income.

The results of the production activities according to the particular activities and sectors are shown in the production account. The basic items in the production account are: the gross output, intermediate consumption and gross value added as their derivation and result of the production activities. The gross value added consists of: compensation of employees, gross operating surplus or mixed income and other taxes on production.

The gross output is defined as the market value of all produced goods and services that are generated by resident producers during an accounting period. There are three categories of production: a) market production, b) production for own final use and c) other non-market production.

Intermediate consumption, according to purchaser's prices, is the value of products and services that are transformed, used and spent in the production process. Intermediate consumption includes: costs of raw material and equipment, energy costs and spare parts, costs of services, other business costs.

Value added, as the increase in the value of production is equal to the difference between gross output and intermediate consumption. Value added for institutional units is expressed according to basic prices that are prices that do not include taxes on products, but also include subsidies on products.

Gross domestic product at market prices expresses the value of all goods and services of resident units. GDP by production method equals gross output at basic prices less intermediate consumption at market prices plus taxes on products and minus subsidies on products.

Gross national income equals the sum of gross domestic product and balance of primary incomes (from labor and capital) with the rest of the world.

Gross national disposable income equals the sum

zbiru bruto nacionalnog dohotka i salda tekućih transfera iz inostranstva.

Porezi na proizvode i usluge su porezi koji se plaćaju po proizvedenom ili proslijeđenom dobru i usluzi. Ovi porezi obuhvataju uvozne i izvozne dadžbine, porez na dodanu vrijednost, posebne poreze (akcize), sl.

Ostali porezi na proizvodnju uključuju sve poreze koji mogu teretiti preduzeća zbog angažovanja u proizvodnji nezavisno o količini ili vrijednosti proizvedenih ili prodatih dobara i usluga (npr. porez na firmu, naknade, takes i slično).

Subvencije na proizvode i usluge su nepovratna plaćanja državnih institucija tržišnim proizvođačima namjenjena za proizvodni proces preduzeća ili za prodaju ili izvoz proizvoda. Subvencije na proizvode se isplaćuju po jedinici dobra ili usluge.

Ostale subvencije na proizvodnju sastoje se od subvencija koje rezidentne proizvođačke jedinice mogu dobiti na osnovu angažovanja u proizvodnji i ne mogu se iskazati po jedinici proizvoda ili usluge.

FISIM (usluge finansijskog posredovanja indirektno mjerene) predstavlja vrijednost usluga finansijskog posredovanja koje se izračunavaju indirektno. FISIM se izračunava kao razlika između potraživanja po kamatama (aktivne kamate) i obaveza po kamatama (pasivne kamate) za institucionalne jedinice finansijskog posredovanja.

Potrošnja fiksnog kapitala predstavlja vrijednost iskorištenih stalnih sredstava, u toku obračunskog perioda, koja se u procesu proizvodnje prenese na nove proizvode i usluge. U sistemu nacionalnih računa svaka izravnavajuća stavka može se iskazati u bruto i neto izrazu. Iskazivanje u «bruto» izrazu znači da nije oduzeta potrošnja fiksnog kapitala, dok «neto» iskazivanje znači prikaz podatka nakon oduzimanja potrošnje fiksnog kapitala.

Sredstva zaposlenih obuhvaćaju sva primanja zaposlenih u novcu i naturi, koja su zaposleni primili kao naknadu za svoj rad i sve uplate na ime socijalnog osiguranja zaposlenih.

Bruto poslovni višak je rezidualna kategorija dodane vrijednosti po djelatnostima, koja se dobije kada se bruto dodana vrijednost umanji za sredstva zaposlenih i neto ostale poreze na proizvodnju (od ostalih poreza na proizvodnju oduzmu se subvencije na proizvodnju).

Mješoviti dohodak je alternativni izraz za poslovni višak neinkorporiranih preduzeća u vlasništvu domaćinstava, jer za njih nije moguće razdvojiti naknade po osnovu vlasništva od naknada po osnovu rada.

of gross national income and the balance of current transfers with the rest of the world.

Taxes on products and services are taxes paid according to the produced or delivered goods and service. All taxes on products and import duties, value added tax (VAT), special taxes-excise, etc.

Other taxes on production consist of all taxes that enterprises incur as a result of engaging in production, independently of the quantity or value of goods and services produced or sold.

Subsidies on products and services are non-returnable payments of government institutions to market producers, provided for the production process of enterprises or for the sale or import of products. Subsidies on products are paid per unit of produced goods and services.

Other subsidies on production consist of subsidies except subsidies on products which resident producer units may receive as a consequence of engaging in production. Subsidies on production could not be calculated by unit of goods or services.

FISIM (financial intermediation services indirectly measured) presents the value of services of financial intermediation, which are indirectly measured. FISIM is calculated as the difference between the claims according to interest (active interest) and obligations according to interest (passive interest) for the institutional units for financial intermediation.

Consumption of fixed capital is the value of used fixed capital, during an accounting period, which is used, during the process of production of new products and services. In the national accounts system, every aggregate is expressed in gross and net form. Expressing it in "gross" form means that the consumption of fixed capital had not been subtracted, while "net" form means that the data is shown after the consumption of fixed capital had been subtracted.

Compensation of employees includes all remuneration to employees, both in cash or in kind, that the employees receive in return for their work done, as well as all payments to the compulsory social security schemes of employees.

Gross operating surplus is a residual category of gross value added by the activities that remain after reducing gross value added by compensation of employees and net other taxes on production (subsidies on production have been subtracted from other taxes).

Mixed income is an alternative term for the operating surplus of unincorporated enterprises owned by households, since it is impossible to separate their remuneration for work carried out from their profits as entrepreneur.

Imputirana renta predstavlja vrijednost usluga korištenja stambenih objekata nastanjenih njihovim vlasnicima. Procjena imputirane rente rađena je prema troškovnoj (user-cost) metodi, a zasnovana na podacima Ankete o potrošnji domaćinstava iz 2004. godine.

Implicitni deflator je indeks dobiven djeljenjem podataka u tekućim cijenama s podacima u stalnim cijenama.

***Imputed rent** refers to value of services to owner-occupied dwellings. The estimates of imputed rent according to the user-cost approach are based on the Household Budget Survey (HBS) data from 2004.*

***Implicit deflator** is an index calculated as dividing data at current prices by data at constant prices.*

UVODNE NAPOMENE ZA KORISNIKE

S ciljem unapređenja statistike nacionalnih računa Bosne i Hercegovine, Agencija za statistiku BiH je 2006. godine počela kompilaciju bruto domaćeg proizvoda prema rashodnom pristupu. Kao referentni period, za uspostavljanje serije odabrana je 2004. godina, kao prva godina u kojoj su bili raspoloživi novi izvori podataka, koji su omogućili kompiliranje procjena bruto domaćeg proizvoda prema rashodnom pristupu. Procjene su sačinjene u tekućim i cijenama prethodne godine, čime je omogućeno poređenje procjena između dvije godine na kvantitativnoj osnovi. Imajući u vidu činjenicu, da kvalitet statistike nacionalnih računa zavisi, prvenstveno, o raspoloživosti i kvalitetu velikog broja različitih izvora podataka, značajne praznine koje su postojale, a i još uvijek postoje, obavezuju nacionalne račune, da u slučaju kada bolji izvori podataka postanu dostupni, revidira objavljene podatke.

Agencija za statistiku BiH, u ovoj publikaciji predstavlja revidirane godišnje procjene Bruto domaćeg proizvoda (BDP) po rashodnom pristupu za period 2007 – 2018. i finalnu procjenu Bruto domaćeg proizvoda za 2018. Procjene su sačinjene prema metodologiji Evropskog sistema računa 2010 (ESA 2010). Pored procjena osnovnih rashodnih komponenti, date su i procjene o izdacima za krajnju potrošnju domaćinstava prema Klasifikaciji individualne potrošnje prema namjeni (COICOP), kao i podaci o ulaganjima u bruto investicije.

Najznačajnije metodološke izmjene u ESA 2010, a koje imaju direktan uticaj na procjenu BDP-a prema rashodnom pristupu su: prikazivanje izdataka za istraživanje i razvoj kao investicije, proizvodnja softvera u vlastitoj režiji, implementacija sektorske klasifikacije.

Poseban tabelarni dio publikacije daje prikaz nominalnih i realnih promjena između dvije uzastopne godine.

Bruto domaći proizvod prema rashodnom pristupu, procijenjen je za 2018. godinu u iznosu od 34.023 miliona KM, što predstavlja nominalni porast od 5,22% u odnosu na 2017. Posmatrano u cijenama prethodne godine rast BDP-a je bio 3,29%, što predstavlja rast cijena u iznosu od 1,87%.

Izdaci za potrošnju domaćinstava, koji čine 74% BDP-a, iznosili su 25.144 miliona KM u 2018. što predstavlja nominalni rast od 3,9%, u poređenju sa prethodnom godinom. Posmatrano u realnim vrijednostima, potrošnja je porasla za 2,21%, dok je prosječan rast cijena iznosio 1,66%. Posmatrano prema osnovnim grupama potrošnje, sve grupe su zabilježile nominalni i realni rast. Najznačajniji rast ostvarile su: grupa 07 Transport nominalno 10,64% i realno 5,26% i grupa 02 Alkoholna pića, duhan i narkotici nominalno 8,81% i realno 0,34%.

Izdaci za krajnju potrošnju vlade porasli su između 2017. i 2018. za 3,79% nominalno, te za 0,87%, posmatrano u cijenama prethodne godine. Udio izdataka vlade u ukupnom Bruto domaćem proizvodu je opao sa 20% u 2017. na 19% u 2018.

Bruto investicije u stalna sredstva zabilježile su nominalni rast od 11,62% u 2018. u poređenju sa 2017. i realni rast od 9,22%. Posmatrano prema vrsti ulaganja, između 2017. i 2018. ulaganja u mašine i opremu su zabilježila nominalni rast od 10,84% dok su ulaganja u građevinske objekte porasla za 12,22% nominalno. Posmatrano u realnim vrijednostima (isključujući uticaj cijena) ulaganja u mašine i opremu su porasla 11,23%, a u građevinske objekte za 7,02%.

Udio investicija u Bruto domaćem proizvodu iznosi 19% u 2018, što predstavlja povećanje sa 17% koliko je iznosilo u 2017.

Izvoz roba i usluga u 2018. u odnosu na 2017. zabilježio je rast od 9,96% nominalno i 6,13% realno, što ukazuje na rast cijena od 3,61%. U istom periodu uvoz roba i usluga je porastao za 6,70% nominalno i 3,69% realno, što ukazuje na rast cijena od 2,91%.

INTRODUCTORY NOTES FOR USERS

With a view to improving National Accounts statistics of Bosnia and Herzegovina, Agency for statistics BiH started compilation of Gross domestic product by expenditure in 2006.

The year 2004 was chosen as the starting reference period for the construction of the series, as the first year in which new data sources were available, enabling compilation of the Gross domestic product by expenditure approach. The estimates were calculated at current and at prices of the previous year, thus allowing the comparison of the data between two consecutive years on a quantitative basis. Having in mind the fact that the quality of the national accounts statistics depends primarily on the availability and quality of a large number different data sources, significant gaps that existed, and still exist, oblige national accounts to revise published data when better sources of data become available.

In this publication Agency for statistics of BiH, presents the revised annual estimates of Gross domestic product by the expenditure approach for period 2007 – 2018 and finally estimate of GDP for 2018. The estimates have been compiled according to the methodology of European System of Accounts 2010 (ESA 2010). In addition to the estimates of the main expenditure components, the Household final consumption expenditure by Classification of individual consumption and Gross fixed capital formation by main groups are presented as well.

The most significant methodological changes in the ESA 2010, with a direct impact on the estimation of GDP according to the expenditure approach, are: the capitalization of research and development expenditure, calculation of own-account software and implementation of sector classification.

The tabular part of the publication gives an overview of the nominal and real changes between two consecutive years.

Gross domestic product by expenditure approach is estimated at 34,023 million of KM in 2018 representing a nominal increase of 5.22% in comparison to 2017. At constant prices (at prices of previous year) the increase in GDP was 3.29%, which implies an increase in prices of 1.87%.

Household final consumption expenditure, representing 74% of GDP, reached the amount of 25,144 million of KM in 2018. This represents a nominal growth rate of 3.9% in comparison with previous year. In real terms, consumption increased for 2.21%, while an increase in prices was 1.66%. A breakdown of household consumption expenditure by purpose shows nominal and real increase in all categories. The most significant increase is recorded at 07 Transport nominally 10.64% and in real terms 5.26% and 02 Alcoholic beverages, tobacco and narcotics nominally 8.81% and in real terms 0.34%.

General government final consumption expenditure increased between 2017 and 2018 by 3.79% nominally and 0.87% in real terms. The share of government expenditure in the total GDP decreased from 20% in 2017 to 19% in 2018.

Gross fixed capital formation increased between 2017 and 2018 by 11.62% in nominal terms and 9.22% in real terms. The breakdown of gross fixed capital formation by type of assets shows increase in purchases by producers of machinery and equipment by 10.84% while capital formation in construction assets increased by 12.22% nominally. In real terms (excluding price increase) investment in machinery and equipment increased by 11.23% and in construction assets increased by 7.02%.

The gross fixed capital formation share in GDP is 19% and represents an increase from 17% recorded in 2017.

Export of goods and services in 2018 registered an increase by 9.96 % in nominal terms and 6.13% in real terms, which implies an increase in price of 3.61%. Imports of goods and services in 2018 registered the increase 6.70% in nominal terms and 3.69% in real terms, which implies an increase in prices of 2,91%.

METODOLOŠKA OBJAŠNJENJA **NOTES OF METHODOLOGY**

KONCEPTI I DEFINICIJE

Bruto domaći proizvod (BDP) prema rashodnom pristupu, definiše se kao ukupna domaća krajnja potrošnja, korigovana vanjskim bilansom roba i usluga sa ostatkom svijeta. Osnovne komponente BDP-a po rashodnom pristupu su:

- Izdaci za krajnju potrošnju domaćinstava,
- Izdaci za krajnju potrošnju neprofitnih institucija koje usluge pružaju domaćinstvima,
- Izdaci za krajnju potrošnju vlade,
- Bruto investicije,
- Izvoz i uvoz roba i usluga.

Izdaci za krajnju potrošnju domaćinstava sastoje se od izdataka rezidentnih domaćinstava na potrošnju roba i usluga za direktno zadovoljenje ljudskih potreba i želja. Izdaci za krajnju potrošnju domaćinstava odnose se na izdatke rezidentnih domaćinstava, bez obzira da li su izdaci nastali unutar ekonomske teritorije ili u inostranstvu.

Izdaci se bilježe kada je dospijeće plaćanja nastalo, odnosno kada je kupac stvorio obavezu prema prodavcu. To znači da se izdaci za robe bilježe u vrijeme promjene vlasništva, dok se izdaci za usluge bilježe u vrijeme kada je isporuka usluga kompletirana.

Izdaci domaćinstava se vrednuju u kupovnim cijenama plaćenim od strane domaćinstava. Kupovna cijena uključuje sve poreze na proizvode koji mogu biti plaćeni u vrijeme kupovine.

Izdaci za krajnju potrošnju domaćinstava uključuju slijedeće osnovne komponente:

- Nabavku roba i usluga,
- Dohodak u naturi, kao što su robe i usluge primljene kao dohodak dat od strane poslodavca,
- Robe i usluge proizvedene kao output neinkorporisanih preduzeća u vlasništvu domaćinstava, a koje su zadržane za potrošnju od strane članova domaćinstava,
- Usluge proizvedene od strane plaćenog pomoćnog osoblja,
- Usluge stanovanja za stanove nastanjene njihovim vlasnicima,
- Eksplicitne i imputirane usluge finansijskog posredovanja banaka, osiguravajućih društava, penzionih fondova, pružene domaćinstvima,
- Plaćanja domaćinstava za licence, dozvole itd, koje se smatraju kupovinom usluga,
- Kupovina output-a po ekonomski značajnim cijenama.

Izdaci krajnje potrošnje domaćinstava isključuju

CONCEPTS AND DEFINITIONS

Gross domestic product (GDP) by expenditure approach is defined as total domestic final consumption corrected by external trade balance with the rest of the world. The main components of GDP by expenditure are:

- Household final consumption expenditure,
- Final consumption of non-profit institutions serving households,
- Final consumption of general government,
- Gross capital formation,
- Export and import of goods and services.

Household final consumption expenditure consists of expenditure incurred by resident households on consumption goods and services for the direct satisfaction of human needs and wants. Final consumption expenditure refers to the expenditures incurred by resident households, whether these expenditures are incurred within the economic territory or abroad.

Expenditure should be recorded when the payable is created, that is when the purchaser incur a liability to the seller. This implies that expenditures on goods are to be recorded at the time their ownership changes while expenditures on services are recorded when the delivery of the services is completed.

Household expenditure is recorded at purchasers' prices paid by households including any taxes on products which may be payable at the time of purchase.

Household final consumption expenditure includes the following main components:

- The purchase of goods and services,
- Income in kinds, like goods and services received as income in kind from the employer,
- Goods and services produced as outputs of unincorporated enterprises owned by household that are retained for consumption by members of the household,
- Services produced by domestic paid staff,

- Services of owner-occupied dwellings,

- Explicit and imputed services charges on household uses of financial intermediation services provided by bank, insurance companies, pension funds etc.,

- Payments by households for licenses, permits, etc. which are regarded as purchases of services,

- The purchase of output at not economically significant prices.

Household final consumption expenditure excludes the

slijedeće osnovne komponente:

- Socijalne transfere u naturi,
- Izdatke domaćinstava koja posjeduju neinkorporisana preduzeća, kada nastaju za poslovne svrhe,
- Kupovinu stambenih jedinica,
- Izdatke za dragocjenosti,
- Sticanje ne-proizvedene imovine,
- Sva plaćanja koja se smatraju porezima,
- Dobrovoljne transfere u gotovini ili naturi date u korist ne-profitnih institucija koje usluge pružaju domaćinstvima (NPISH).

Izdaci za krajnju potrošnju neprofitnih institucija

koje usluge pružaju domaćinstvima, sastoje se od roba i usluga koje neprofitne institucije pružaju domaćinstvima bez naknade, ili u cijenama koje nisu ekonomski značajne.

Njihovi osnovni izvori finansiranja, osim povremenih prodaja, vode porijeklo iz dobrovoljnih doprinosa u gotovini ili naturi, datih od strane vlade, javnosti ili korporacija. NPISH također mogu primati i transfere od nerezidenata.

Ne-profitne institucije koje pružaju ne-tržišne robe i usluge domaćinstvima uključuju slijedeće osnovne vrste institucija:

- Sindikate, profesionalna ili naučna društva, udruženja potrošača, političke partije, crkve ili religijska udruženja, socijalne, kulturne, rekreacijske i sportske klubove,
- Dobrotvorne organizacije i organizacije za pružanje pomoći finansirane dobrovoljnim transferima u gotovini ili naturi od strane drugih institucionalnih jedinica.

Izdaci za krajnju potrošnju NPISH uključuju dvije odvojene kategorije:

- Ne-tržišni output, osim investicija za vlastiti račun, koji se mjeri prema troškovima proizvodnje umanjnim za povremenu prodaju,
- Izdatke za tržišnu robu i usluge koje se bez transformisanja isporučuju domaćinstvima besplatno.

Izdaci za krajnju potrošnju vlade – Sektor vlade se sastoji od svih institucionalnih jedinica, koje, uz ispunjavanje njihovih političkih obaveza i uloge ekonomskog regulisanja, u principu proizvode ne-tržišne usluge (moguće i robe) za individualnu ili kolektivnu potrošnju, te redistribuišu dohodak i bogatstvo.

Izdaci za krajnju potrošnju vlade uključuju dvije kategorije izdataka:

following main components:

- Social transfers in kind,
- Expenditures by households owning unincorporated enterprises when incurred for business purposes,
- The purchase of dwellings,
- Expenditure on valuables,
- Acquisitions of a non-produced assets,
- All payments which are to be regarded as taxes,
- Voluntary transfers in cash or in kind by households to NPISHs.

Final consumption expenditure of non-profit institutions serving households consist of goods and services which non-profit institutions provide to households free or at prices that are not economically significant.

Their principal resources, apart from occasional sales, are derived from voluntary contributions in cash or in kind from the general public, corporations, and government. They may also receive transfers from non-residents.

The non-profit institutions include the following main kinds of NPISHs that provide non-market goods and services to households:

- Trade unions, professional or learned societies, consumers' associations, political parties, churches or religious societies, social, cultural, recreational and sports clubs,
- Charities, relief and aid organizations financed by voluntary transfers in cash or in kind from other institutional units.

Final consumption expenditure of NPISHs includes two separate categories:

- Non-market output other than own-account capital formation, which is measured by production costs less incidental sales,
- Expenditure on market goods and services that are supplied without transformation and free of charge to households.

Final consumption of general government - The general government sector consists of the totality of institutional units, which, in addition to fulfilling their political responsibilities and their role of economic regulation, produce principally non-market services (possibly goods) for individual or collective consumption and redistribute income and wealth.

Final consumption expenditure of general government includes two categories of expenditure:

- Ne-tržišni output; osim investicija za vlastiti račun; koji se mjeri troškovima proizvodnje, umanjen za povremenu prodaju,
- Vladine nabavke roba i usluga od tržišnih proizvođača, koje se bez bilo kakvog transformisanja plasiraju domaćinstvima, kao socijalni transfer u naturi.

Izdaci za krajnju potrošnju vlade se mjere kao razlika između ne-tržišnog output-a i povremenih prodaja na tržištu, uvećanog za nabavku roba i usluga za besplatnu distribuciju.

Izdaci za individualnu potrošnju vlade se sastoje od plaćanja za ne-tržišne usluge vlade (obrazovanje, zdravstvo, socijalna zaštita, kultura, sport, itd.) i tržišnih roba i usluga plasiranih direktno domaćinstvima kao socijalni transfer u naturi.

Izdaci za kolektivnu potrošnju vlade se sastoje uglavnom od pružanja usluga sigurnosti i odbrane, održavanja javnog reda i mira, legislative i propisa, zaštite okoliša, istraživanja i razvoja itd. Od pružanja ovih usluga koriste imaju svi članovi zajednice.

Bruto investicije

Bruto investicije obuhvataju:

- Bruto investicije u stalna sredstva,
- Promjene na zalihama,
- Neto sticanje dragocjenosti.

Bruto investicije u stalna sredstva se sastoje od neto sticanja stalnih sredstava rezidentnih proizvođača tokom određenog vremenskog perioda, uvećanih za vrijednost ne-proizvedenih sredstava koja su nastala kao rezultat proizvodne aktivnosti proizvođača ili institucionalne jedinice. Stalna sredstva mogu biti opipljiva ili neopipljiva, proizvedena kao output iz procesa proizvodnje, koja se koriste kontinuirano u procesu proizvodnje duže od jedne godine; uključujući značajnija poboljšanja opipljive ne-proizvedene imovine, kao i troškove prijenosa vlasništva nad ne-proizvedenom imovinom. Bruto investicije u stalna sredstva se bilježe u vrijeme kada se vlasništvo nad stalnim sredstvom prenese na institucionalnu jedinicu, koja ima namjeru da sredstvo koristi u proizvodnji.

Bruto investicije u stalna sredstva se vrednuju u kupovnim cijenama, uključujući naknade za montažu, kao i ostale troškove prijenosa vlasništva.

Promjene na zalihama se mjere kao vrijednost ulaza na zalihe umanjnim za vrijednosti povlačenja sa zaliha i vrijednosti bilo kakvih ponavljajućih gubitaka na robama držanim na zalihama.

- Non-market output other than own-account capital formation, which is measured by production costs, less incidental sales

- Purchases by general government of goods and services produced by market producers that are supplied to households, without any transformation, as social transfer in kind.

Final consumption expenditure of general government is measured as difference between non-market output and occasional sales on the market plus purchase of goods and services for free distribution.

Individual government consumption expenditure comprises payments for non-market government services (education, health, social care, culture, sport, etc.) and market goods and services supplied directly to households as social transfer in kind.

Collective government consumption expenditure consists mostly of the provision of security and defense, the maintenance of law and order, legislation and regulation, the protection of environment, research and development etc. All members of the community can benefit from such services.

Gross capital formation

Gross capital formation consists of:

- Gross fixed capital formation,
- Changes in inventories,
- Acquisitions less disposals of valuables.

Gross fixed capital formation consists of producers' acquisitions less disposals of fixed assets during the reference period plus certain additions to the value of non-produced assets realized by the productive activity of producers or institutional units. Fixed assets are tangible or intangible assets produced as outputs from processes of production that are themselves used repeatedly, or continuously, in processes of production for more than one year; including major improvements to tangible non-produced assets and costs associated with the transfers of ownership of non-produced assets.

Gross fixed capital formation is recorded when the ownership of the fixed assets is transferred to the institutional unit that intends to use them in production. Gross fixed capital formation is valued at purchasers' prices including installation charges and other costs of ownership transfer.

Changes in inventories are measured by the value of the entries into inventories less the value of withdrawals and the value of any recurrent losses of goods held in inventories.

Zalihe se sastoje od slijedećih kategorija:

- Sirovine i materijal,
- Nedovršena proizvodnja,
- Gotovi proizvodi,
- Roba za preprodaju.

Promjene na zalihama bi trebale biti vrednovane u vrijeme ulaska na zalihu, ili u vrijeme povlačenja sa zalihama. Cijena koja se koristi treba biti konzistentna sa vrednovanjem output-a, međufazne potrošnje i krajnje upotrebe.

Neto sticanje dragocjenosti – dragocjenosti predstavljaju ne-financijska sredstva koja se ne koriste primarno za proizvodnju ili potrošnju, ne iskazuju propadanje (fizičko) pod normalnim uslovima tokom vremena, a koja se nabavljaju i drže u vlasništvu primarno kao pohrana vrijednosti. Dragocjenosti obuhvataju slijedeće vrste roba: plemenite metale i drago kamenje; antikvitete i druga umjetnička djela; ostale dragocjenosti kao što je nakit od dragog kamenja i plemenitih metala, te vrijedne kolekcije. Sticanje dragocjenosti se vrednuje u kupovnoj cijeni plaćenju za njih, a plasman dragocjenosti se vrednuje u cijeni koju je prodavac dobio nakon odbijanja bilo kakvih naknada plaćenih posrednicima.

Izvoz i uvoz roba se pojavljuje kada postoji promjena vlasništva nad robom između rezidenata i nerezidenata, bez obzira na to da li je došlo do fizičkog pomjeranja robe preko granice. Izvoz i uvoz isključuju sve transakcije koje se odnose na zemljište, zgrade i nepokretnu ne-proizvedenu imovinu, te financijska sredstva.

Izvoz i uvoz robe se bilježi kada se prenese vlasništvo nad robom. Izvoz i uvoz robe treba vrednovati "free on board", na granici zemlje izvoznice (fob).

Ova vrijednost se sastoji od:

- Vrijednosti robe u baznim cijenama;
- Plus troškovi koji se odnose na transportne i distributivne usluge do tačke na granici, uključujući troškove pretovara na prijevozno sredstvo za dalji transport, ukoliko je to primjenjivo.

Izvoz i uvoz usluga se sastoji od svih usluga pruženih od strane rezidenata prema nerezidentima i obratno. Usluge, koje pripadaju izvozu i uvozu, moraju biti proizvedene kao output iz procesa proizvodnje. U izvoz i uvoz usluga se ne uključuju tokovi primarnog dohotka i tokovi dohotka od vlasništva. Najvažnije vrste uvoza i izvoza usluga su: građevinske usluge, ugradnja opreme, transport, turizam, osiguranje, finansijske usluge i naknade za licenciranje.

Inventories consist of the following categories:

- *Materials and supplies,*
- *Work in progress,*
- *Finished goods,*
- *Goods for resale.*

Changes in inventories should be valued at the time of entering the inventories or at the time of withdrawal. The price used should be consistent with valuation of output, intermediate consumption and final uses.

Acquisition less disposals of valuables – *Valuables are non-financial assets that are not used primarily for production or consumption, do not deteriorate (physically) over time under normal conditions and that are acquired and held primarily as stores of value. Valuables encompass the following types of goods: precious stones and metals; antiques and other art objects; other valuables such as jewellery of precious stones and metals and collectors' items.*

Acquisitions of valuables are valued at the purchasers' prices paid for them and disposals of valuables are valued at the prices received by sellers, after deducting any fees paid to intermediaries.

Exports and imports of goods occur when there are changes of ownership of goods between residents and non-residents, regardless of whether there are corresponding physical movements of goods across borders. Exports and imports exclude all transaction in land, buildings and non-movable non-produced assets, and in financial assets.

Exports and imports of goods should be recorded when the ownership of the goods is transferred.

Exports and imports of goods are to be valued free on board at the border of the exporting country (fob). This value consist of:

- *The value of the goods at basic prices;*
- *Plus related transport and distributive services up to that point of the border including the cost of loading on to a carrier for onward transportation, where appropriate.*

Exports and imports of services consist of all services rendered by residents to non-residents or vice versa. The services, which belong to export and import of services, must have been produced as outputs from processes of production. They do not include flows of primary income and flows of property income. The more important types of import and export of services are: construction services, installation of equipment, transportation, tourism, insurance, financial services, and license fees.

Uvoz i izvoz usluga se bilježe u vrijeme kada su nabavljene, što se u većini slučajeva podudara sa vremenom u kojem su i proizvedene. Uvoz usluga se vrednuje u nabavnim cijenama, a izvoz usluga u baznim cijenama.

Exports and imports of services are recorded at the time at which are rendered, which mostly coincides with the time at which the services are produced.

IZVORI I METODE

U nastavku je dat opis osnovnih raspoloživih izvora podataka za kompilaciju BDP-a po rashodnim komponentama, uz opis metoda korištenih za obračunavanje svake komponente:

IZVORI

Podaci o vanjskoj trgovini

Osnovni izvor podataka za statistiku vanjske trgovine su carinske deklaracije prikupljene od strane Uprave za indirektno oporezivanje Bosne i Hercegovine i preuzete od strane BHAS-a. Jedinica posmatranja je svaka uvozna i izvozna isporuka sa ostatkom svijeta za koju je popunjena deklaracija, koja je jedinstvena u pogledu vrste robe, zemlje porijekla ili odredišta. Podaci vanjske trgovine se proizvode i publikuju na mjesečnoj osnovi.

Vanjska trgovina se prati u skladu sa posebnim trgovinskim sistemom (širi koncept), što znači da se osim transakcija redovnog uvoza i izvoza obuhvata i unutrašnja i vanjska obrada, kao i obrada provedena u bescarinskim zonama.

Podaci o uvozu i izvozu su bazirani na Carinskoj tarifi Bosne i Hercegovine koja koristi 10-cifrenu šifru za identifikaciju robe. Prvih šest cifara korespondira harmonizovanom sistemu (HS), međunarodnoj nomenklaturi za klasifikaciju podataka o vanjskoj trgovini. Ostale cifre su harmonizovane sa EU nomenklaturom (kombinovanom nomenklaturom-CN), a dvije cifre se koriste za specifične potrebe Bosne i Hercegovine.

Podaci o uvozu se vrednuju u c.i.f. cijenama, a podaci o izvozu u f.o.b. cijenama.

Anketa o potrošnji domaćinstava

Anketa o potrošnji domaćinstava je anketa na bazi uzorka koja se u Bosni i Hercegovini provodi u nepravilnim vremenskim razmacima i fokusira se uglavnom na izdatke domaćinstava na krajnju potrošnju.

Anketa o potrošnji domaćinstava je prvi puta provedena u Bosni i Hercegovini u 2004, a nakon toga 2007, 2011 i 2015. Osnovna namjena istraživanja je bila da se prikupe informacije o strukturi i nivoima izdataka potrošnje po osnovnim socijalnim, ekonomskim i teritorijalnim karakteristikama domaćinstava putem prikupljanja podataka iz uzorka domaćinstava, upotrebom tehnike intervjua i dnevnika koji domaćinstva vode, da bi zabilježila svoje izdatke i proizvodnju za vlastitu potrošnju.

SOURCES AND METHODS

A description of the main source data available for the compilation of GDP by expenditure components is provided followed by a description of the methods used for the calculation of each of these components:

SOURCES

Foreign trade data

The main data sources for external trade statistics are custom declarations collected by the Indirect Taxation Authority of BH and taken over by Agency for Statistics. The observation unit is each import and exports shipment with the rest of the world and is uniform as regards the type of goods, country of destination or origin, and for which the custom declaration was filled. The external trade statistics data are produced and published on a monthly basis.

The external trade are monitored according to the special trade system (relaxed definition), which means that beside regular import and export transactions also inward and outward processing as well as processing carried out in custom free zones are included.

Data on imports and exports are available based on the Customs Tariff of BH, which uses a 10-digit code system for the identification of the goods. The first 6 digits correspond to the Harmonized System (HS), the international nomenclature for the classification of foreign trade data. The additional two digits are harmonized with the EU nomenclature (Combined Nomenclature-CN), and the last 2 digits are an extension of the classification to meet specific needs of BH.

The import data are valued in c.i.f. prices and export data in f.o.b. prices.

Household budget survey

The household budget survey is a national household based survey conducted in irregular time periods in Bosnia and Herzegovina mainly focusing on final consumption expenditure of households.

The household budget survey was implemented for the first time in Bosnia and Herzegovina in 2004. The main purpose of the survey was collecting information on the structure and levels of consumption expenditure by the main social, economic and territorial characteristics of the households by collecting data from a sample of households by mean of interviews and diaries kept by households on their expenditures and production for self-consumption.

Prikupljeni podaci o izdacima domaćinstava obuhvataju novčane izdatke koje domaćinstva imaju za kupovinu proizvoda i usluga namijenjenih krajnjoj potrošnji. Pored novčanih izdataka u Anketu su uključeni i nenovčani izdaci koji se odnose na potrošnju iz vlastite proizvodnje i usluge stanovanja za stanove nastanjene njihovim vlasnicima. Za analizu strukture potrošnje koristi se Klasifikacija individualne potrošnje prema namjeni (COICOP). Uslijed činjenice da su ukupni izdaci potrošnje domaćinstava u istraživanju izračunati na uzorku podataka, procjena za ukupnu populaciju Bosne i Hercegovine je dobivena preračunom izdataka za svaku stavku po glavi stanovnika uz primjenu zvanične procjene stanovništva BiH. Za svaku stavku, obračunate su greške pri uzorkovanju u cilju pružanja indikacija o tačnosti procjena.

Posljednja anketa je provedena na uzorku od 7400 domaćinstava, pomoću tri upitnika: Dnevnik nabavki, Dnevnik o potrošnji iz vlastite proizvodnje i Završni intervju. U 2011. u anketu su uključena dva dodatna modula: Modul socijalne uključenosti, migracija i doznaka i Modul zdravstvenog stanja i zdravstvenih usluga.

PRODCOM istraživanje

Predmet PRODCOM istraživanja je industrijska proizvodnja, izvršena na teritoriji Bosne i Hercegovine u periodu od jedne kalendarske godine. Istraživanje prikuplja podatke o obimu i vrijednosti proizvodnje i prodaje industrijskih proizvoda, na detaljnom nivou pojedinog proizvoda, specificiranog u nomenklaturi industrijskih proizvoda.

Obuhvat PRODCOM istraživanja nije potpun, i zasnovan je na adresaru statističkih jedinica za godišnje statističko istraživanje o industriji. Obuhvat za Federalni zavod za statistiku je limitiran na izvještajne jedinice koje imaju deset ili više zaposlenika, a Republički zavod za statistiku Republike Srpske i podružnica BHAS-a u Brčko distriktu obuhvataju u istraživanju sve izvještajne jedinice iz adresara. Podešavanja za neobuhvat su načinjena putem korištenja koeficijenata (odnos ukupnog output-a prema output-u obuhvaćenom istraživanjem) na nivou razreda NACE-a. Svi proizvodi koji pripadaju razredu su podešeni sa istim koeficijentom izračunatim na nivou razreda.

Bilans plaćanja

Kompilacija statistike bilansa plaćanja za Bosnu i Hercegovinu je u nadležnosti Centralne banke Bosne i Hercegovine. Za kompilaciju bruto domaćeg proizvoda rashodnim pristupom, korišteni su podaci o uvozu i izvozu roba i usluga.

Collected data on household's final consumption expenditure include monetary expenditure that households spend to purchase products and services for final consumption. In addition to monetary expenditures survey also includes a non-monetary expenditures of households that are related to consumption from own production and housing services for dwellings occupied by their owners. For the analysis purposes the consumption expenditure are classified in accordance to the Classification of Individual Consumption by Purpose (COICOP). Estimates for the total population of BiH were obtained by grossing up the survey's results on national per capita expenditures of each item by the official estimate of the population of the BiH. Sampling errors were calculated for each item to provide an indication of the accuracy of the estimates.

The last survey was conducted on the sample of 7400 households. Data collection is performed using three questionnaires: Diary of purchases, Self-consumption diary and Final interview. In 2011 the survey included two additional modules: Module for social inclusion, migration and remittances and Module for health status and health services.

PRODCOM survey

The subject of the PRODCOM survey is industrial production, accomplished at the territory of Bosnia and Herzegovina in the period of one calendar year. The survey collects data on volume and value of production and sales of industrial production, at the detailed level of a single product specified in the nomenclature of industrial products.

The coverage of the PRODCOM survey is not full, and it is based on the address list of statistical units used for annual statistical surveys on industry. The coverage in the Federal Institute of Statistics is limited to those reporting units that have ten or more employees while in the Statistical Institute of Republic Srpska and the Statistical Branch of District Brcko all reporting units from the address list are included in the survey. An adjustment for non-coverage was made using coefficients (the ratio of total output to the output covered by the survey) at the level of the NACE class. All products belonging to a class were adjusted with the same coefficient calculated at the class level.

Balance of payment

Compilation of the balance of payment statistics in Bosnia and Herzegovina is the responsibility of the Central Bank of Bosnia and Herzegovina. For the compilation of gross domestic product by expenditure data on exports and imports of goods and services were used.

Izvoz i uvoz roba vrednovan je f.o.b. cijenama. F.o.b. cijena (free on board) izvoza i uvoza je tržišna vrijednost roba u tački jedinstvene valorizacije, (carinska granica ekonomije iz koje je izvezena); i jednaka je c.i.f. cijeni umanjenoj za troškove transporta i naknade osiguranja, između carinske granice zemlje izvoznice (uvoznice) i uvoznice (izvoznice).

Izvoz i uvoz usluga se klasifikuje u tri grupe: transport, putovanja i ostale usluge. Transportne usluge sadrže transport roba i putnika.

Istraživanje o Investicijama

Istraživanje o bruto investicijama u stalna sredstva se provodi godišnje od 2004. godine, od strane statističkih institucija u Bosni i Hercegovini. Istraživanje obuhvata sve pravne subjekte i daje detaljne podatke o ulaganju u opipljiva i neopipljiva stalna sredstva; troškove koji su povezani sa sticanjem ne-proizvedene, ne-finansijske imovine (unaprijeđenje zemljišta i troškovi prijenosa vlasništva nad ne-proizvedenom ne-finansijskom imovinom). U istraživanju, bruto investicije u stalna sredstva su podijeljene na sticanje novih sredstava, sticanje polovnih sredstava i dezinvesticiju postojećih sredstava.

Istraživanje prikuplja i informacije o uloznim sredstvima pravnih subjekata u dragocjenosti.

Output po ekonomskoj aktivnosti

Output po ekonomskim aktivnostima je obračunat na nivou 4 cifri NACE klasifikacije, od strane entitetskih statističkih institucija i korišten je za procjenjivanje različitih vrsta usluga.

Promjene na zalihama po ekonomskoj aktivnosti

Obračun promjena na zalihama je baziran na podacima iz računovodstvenih izvještaja. Za potrebe revizije procjena BDP-a rashodnim pristupom, entitetski statistički zavodi su osigurali detaljne podatke o zalihama, na nivou klase (4 cifre NACE). Na raspolaganju su bili podaci samo za preduzeća. Zalihe su se sastojale od slijedećih kategorija: gotovi proizvodi, nedovršena proizvodnja, trgovačka roba, te sirovine i materijal.

Indeks potrošačkih cijena

Indeks potrošačkih cijena (CPI) je mjera prosjeka promjena u cijenama u određenom vremenskom periodu za potrošačku korpu proizvoda i usluga i

Export and import goods are valued by f.o.b. prices. The f.o.b. prices (free on board) of exports and imports is the market value of the goods at the point of uniform valuation, (the custom frontier of the economy from which they are exported); it is equal to the c.i.f. price less the costs of transportation and insurance charges, between the custom frontier of the exporting (importing) country and that of the importing (exporting) country.

Exports and imports of services are classified into three groups: transportation, travel and other services. Transportation services comprise services of transport of goods and passengers.

Investment survey

The survey on the gross fixed capital formation has been carried out annually since 2004 by statistical institutions in Bosnia and Herzegovina. The survey covers all legal units and detailed data on product groups of tangible and intangible fixed assets and costs associated with acquisition of non-produced non-financial assets (land improvement work and transaction costs of ownership of non-produced non-financial assets). In the survey gross fixed capital formation is divided into acquisitions of new assets, acquisition of existing assets and disposals of existing assets.

The survey collects the information on the investment of legal entities in valuables as well.

Output by economic activities *Output by economic activities has been calculated on four-digit level of NACE classification by entities statistical institutions and has been used for estimation of different type services.*

Changes in inventories by economic activity

Calculation of changes in inventories is based on accounting statement data. For the revision of the estimates of GDP by expenditure, the entities statistical offices have provided detailed data on inventories at the class level (4 digits NACE). Only data for enterprises have been available. Inventories consist of the following categories: finished goods, work in progress, trade goods and raw materials and supplies.

Consumer price indices

The Consumer Price Index (CPI) is a measure of the average change in prices over time of a market basket of goods and services and is used as measure

koristi se kao mjera inflacije potrošačkih cijena u entitetima i Bosni i Hercegovini. Indeks potrošačkih cijena je kompiliran sa podacima koji počinju sa januarom 2005. Period koji je usvojen kao bazni za obračunavanje indeksa je decembar 2004. Promjena referentne baze za izračunavanje indeksa je izvršena u 2011.

Indeks jediničnih vrijednosti

Indeks jediničnih vrijednosti (Paasche tip) pruža informacije o trendovima jediničnih uvozno izvoznih vrijednosti koje se ponderišu količinama tekućeg referentnog perioda. Indeks jediničnih vrijednosti nije pravi indeks cijena. Na kvalitet ovog indeksa utiču ne samo promjene cijena koje su uključene u jedinične vrijednosti nego i struktura i kvalitet robe. Za potrebe nacionalnih računa indeks jediničnih vrijednosti je izračunat za period 2005 – 2011.

Procjene stanovništva

U svrhu kompilacije Bruto domaćeg proizvoda prema rashodnom pristupu, korištene su procjene broja stanovnika sačinjene od strane BHAS-a. Važno je napomenuti da ove procjene populacije ne iskazuju istu vrijednost koja se dobije sabiranjem procjena sačinjenih od strane entiteta.

Ostali izvori

Pored navedenih izvora podataka, korišteni su i mnogi drugi izvori kojima smo raspolagali.

METODE

Izdaci potrošnje domaćinstva

Procjene izdataka domaćinstava za potrošnju su djelimično bazirane na rezultatima istraživanja o potrošnji domaćinstava, podacima o vanjskoj trgovini, domaćoj proizvodnji robe i usluga za potrošnju. Procjene za godine za koji nisu bili na raspolaganju podaci iz Ankete o potrošnji domaćinstava su bazirane na podacima o uvozu i domaćoj proizvodnji i/ili ekstrapolaciji procjena za prethodne godine, korištenjem relevantnih indikatora. Potrošnja domaćinstava električne energije, plina i vode bazirana je na izvještajima komunalnih preduzeća. Procjene potrošnje poljoprivrednih proizvoda bazirane su na ekstrapolaciji količina potrošenih u prethodnoj godini sa stopom rasta ponude poljoprivrednih proizvoda i promjena u potrošačkim cijenama za odgovarajuće proizvode.

Procjene potrošnje proizvedenih neprehrambenih i prehrambenih proizvoda bazirane su na podacima

of consumer price inflation in the entities and in Bosnia and Herzegovina as a whole. The CPI has been compiled starting with the data for January 2005. The period adopted as the base of calculation for the indices is December 2004. The reference base year for index calculation was changed in 2011.

Export/Import Unit value indices

Foreign trade unit value index (Paasche type) provides information on the trends in import and export unit values that are weighted with quantities of the current reference period. The unit value index is not a genuine price index. It is affected not only by changes in the prices included in the unit values, but also by the structure and quality of the goods.

For needs of national accounts foreign trade unit value index has been calculated for period 2005 – 2011.

Population estimation

For purposes of GDP compilation by expenditure in final uses, the population estimates made by the BHAS have been used. It is important to mention that these population estimates do not coincide with the aggregate obtained by summing up the respective independent estimates made by the entities.

Other data sources

In addition to above mentioned, also all other available sources of information were used.

METHODS

Household consumption expenditure

Estimates of household consumption expenditure are partially based on the results of the household budget survey, data on foreign trade and domestic production of consumer goods and services. Estimates for the years for which no household budget survey data are available, are based on imports and domestic production statistics and/or extrapolation of the previous year estimates using relevant indicators. The household consumption of electricity, gas and water is based on the reports of the utility enterprises.

Estimates of consumption of agriculture products are based on the extrapolation of the quantities consumed in previous year by the growth rate of the supply of agriculture products and changes in the consumer prices for the respective products.

Estimates of consumption of manufactured non-food and food products are mainly based on data on the

statistike vanjske trgovine, izvještajima preduzeća o proizvodnji te anketama o potrošnji domaćinstava.

Glavni izvor za kompilaciju procjena potrošnje usluga su ankete o potrošnji domaćinstava i odgovarajuće procjene output-a po ekonomskoj aktivnosti kompilirane od strane entitetskih zavoda za statistiku i podružnice BHAS-a u Brčko distriktu. Za godine kada nisu raspoloživi podaci iz ankete o potrošnji domaćinstava procjene su bazirane na ekstrapolaciji procjena prethodne godine sa obimom i indikatorima cijena.

Procjene izdataka rezidenata u inostranstvu i nerezidenata na teritoriji Bosne i Hercegovine su dobijene iz odgovarajućih procjena iz statistike bilansa plaćanja kompiliranih od strane Centralne banke Bosne i Hercegovine - CBBH.

Revizija izdataka potrošnje domaćinstava bila je usmjerena na detaljnu analizu kvaliteta raspoloživih izvora podataka, kao i primjenjenih metoda. Obzirom da su na raspolaganju bili podaci iz tri ankete o potrošnji domaćinstava, revizija je bila usmjerena i na analizu kretanja potrošnje za pojedine komponente u periodu od 2004. do 2007, kada su provedene prva i druga anketa o potrošnji domaćinstava, pa do 2011. kada je provedena treća anketa. Kao dodatni izvori podataka korišteni su podaci istraživanja koja su razvijena u prethodnom periodu.

Za potrebe analize pripremljene su detaljne tabele za period 2004-2010, koje su omogućile praćenje promjena kretanja vrijednosti uvezene robe (cif), domaće proizvodnje, izvoza; promjena obračunatih redovnih i posebnih carina i akciza u skladu sa važećim propisima, promjena u veličini obračunate marže, poreza na promet i poreza na dodanu vrijednost u zavisnosti od propisa koji su bili u primjeni.

S ciljem ocjene kvaliteta realnih promjena u potrošnji domaćinstava posebna pažnja je posvećena procjenama u stalnim cijenama.

Potrošnja ne-profitnih institucija koje usluge pružaju domaćinstvima (NPISH)

Procjene potrošnje NPISH su bazirane na odgovarajućim procjenama output-a za ove institucije kompilirane od strane entitetskih statističkih institucija u okviru njihovih aktivnosti na kompilaciji procjena BDP-a po proizvodnom pristupu. Output ovih institucija je mjereno kao zbir komponenata troškova proizvodnje: naknada zaposlenim, potrošnja roba i usluga za proizvodnju, ostalih poreza na proizvode i potrošnja fiksnog kapitala.

supply of these items to the domestic market derived from the foreign trade statistics and the reports of enterprises on production as well as the household budget survey.

The main sources for the compilation of the estimates of consumption of services are household budget surveys and the respective estimates of output by economic activity compiled by the entities' institute of statistics and the Brcko branch of the BHAS. Estimates for years when data from HBS were not available, were based on the extrapolation of the previous year estimate by volume and price indicators.

Estimates of expenditures of residents abroad and non-residents in the territory of BiH were obtained from the respective estimates of the balance of payments statistics compiled by the CBBH.

The revision of household final consumption expenditure was focused on a detailed analysis of the quality of available data sources, as well as the methods employed. Considering that the data from three household budget surveys were available, the revision focused on the analysis of consumption trends for components of individual consumption in the period from 2004 to 2007, when the first and second survey on household consumption was conducted and from 2007 until 2011 when the third survey was conducted. Data from recently implemented surveys were used as an additional data sources.

For analytical purposes tables with very detailed data were prepared for the period 2004-2010, enabling the monitoring of changes in the movement of imported goods (cif), domestic production, exports, changes in regular and special customs and excise duties in accordance with applicable regulations, changes in the calculated margin, sales tax and value added tax, depending on the laws that have been in use.

In order to evaluate the changes in household consumption in real terms, special attention was paid to the estimates at constant prices.

Consumption of non-profit institutions serving households (NPISHs)

The estimates of consumption of NPISHs are based on the respective estimates of output of these institutions compiled by the entities' statistical institutions within the framework of their work in compiling GDP estimates based on the production approach. Output of these institutions is measured by the sum of the cost components of production, that is, compensation of employees, consumption of goods and services for production, other taxes on production, and consumption of fixed capital)

U procesu revizije, analiza obuhvata neprofitnih institucija ukazala je na potrebu eliminiranja nekih jedinica iz ove procjene, što je kao rezultat imalo smanjenje ranije sačinjenih procjena u periodu 2008-2010.

Izdaci za krajnju potrošnju vlade

Procjene su bazirane na analizama podataka prikupljenih i obrađenih od strane statističkih institucija Bosne i Hercegovine, o izvršenju budžeta za sve vladine institucije koje obuhvataju, državne, entitetske, kantonalne, lokalne jedinice vlasti i vanbudžetske fondove. Uključeni su i izdaci zdravstvenih i penzionih fondova. Potrošnja je mjerena kao zbir troškova proizvodnje (naknade zaposlenim, potrošnja roba i usluga za proizvodnju, ostali porezi na proizvode i potrošnja fiksnog kapitala).

Revizija podataka nije imala uticaj na prethodne procjene izdataka za krajnju potrošnju domaćinstava.

Procjene bruto investicija u stalna sredstva

Procjene investicija u mašine i opremu i motorna vozila su dobijena iz detaljnih analiza uvoza i domaće proizvodnje kapitalnih roba. U postupku revizije implementirana je nova Kombinovana Nomenklatura (CN) i nova Carinska tarifa BiH, što je dovelo do smanjenja procjena investicija u mašine i opremu, sačinjenih ranije.

Procjene investicija u građevinske projekte, zasnovane su na podacima outputa iz računa proizvodnje, korigovanog za vrijednost outputa realizovanog u inostranstvu.

Procjene promjena na zalihama

Postoje različiti izvori podataka o zalihama koje drže proizvođači, ali ni jedan od njih ne obuhvata dovoljno dug vremenski period i sve ekonomske kategorije, osim godišnji finansijski izvještaji preduzeća. Ostali izvori podataka razvijeni su tek nedavno tako da obuhvataju samo dio aktivnosti, odnosno samo podatke o gotovim proizvodima. Zbog toga su ove procjene sačinjene kao razlika između knjigovodstvene vrijednosti zaliha na početku i na kraju izvještajnog perioda, samo za preduzeća.

Uzimajući u obzir da čak i kod skromne inflacije vlasnički dobitci mogu biti dovoljno veliki da iskrive mjerenje različitih kategorija kao što su: proizvodnja, dohodak, potrošnja, štednja i sl; revidirane procjene promjena na zalihama su korigirane eliminiranjem vlasničkih dobitaka (dio promjene u vrijednosti

In the revision process, the analysis of non-profit institutions was focused on the coverage of units in the published estimates. The analysis indicated the necessity of eliminating certain units from existing estimates which resulted in a slight reduction of published data.

General Government consumption expenditure

The estimates are based on the analysis of the data collected and processed by the statistical institutions of BiH on the execution of the budgets by all government institutions comprising the state, the entities, cantons, local authorities, and extra budgetary funds. It also includes the expenditures of the health and pension funds. Consumption is measured as the sum of the production costs (compensation of employees, consumption of goods and services for production, other taxes on production, and consumption of fixed capital).

Data revision did not have any influence on the previous estimates of general government consumption expenditure.

Estimates of gross fixed capital formation

Estimates on investment in machinery and equipment and motor vehicles are obtained from the detailed analysis of imports and domestic production of capital goods. In the revision process the new Combined Nomenclature was implemented as well as the new BH Custom tariff causing reduction of investment in machinery and equipment estimated before.

Estimates of investment in construction projects are based on value of output in production account, adjusted by value of construction abroad.

Estimates of changes in inventories

There are different data sources on inventories held by producers but not all of them cover a sufficiently long period of time and all economic activities, except annual financial reports of enterprises. Other data sources developed in most recent periods has only partial coverage of industries and provide only data on finished goods These estimates were taken as the differences between the opening and closing book values reported by enterprises.

Taking into account that even with moderate inflation, holding gains can be large enough to distort the measurement of different categories like production, income, expenditure; saving etc. the revised estimates of changes in inventories were adjusted eliminating holding gains (part of the change in value due to

nastala kao posljedica promjene cijena u periodu u kome proizvođač drži zalihe). Za obračun vlasničkih dobitaka korišteni su indeksi proizvođačkih cijena i indeksi potrošačkih cijena.

Procjene dragocjenosti

Procjene ulaganja u u dragocjenosti su preuzete iz podataka koji su prikupljeni istraživanjem o investicijama.

Uvoz i izvoz roba i usluga

Procjene ukupnog uvoza i izvoza roba i usluga su uzete iz odgovarajućih procjena statistike platnog bilansa plaćanja kompilirane od strane Centralne banke Bosne i Hercegovine. Uvoz i izvoz usluga, u skladu sa definicijama nacionalnih računa, ne uključuje plaćanja između rezidenata i nerezidenata, koja se odnose na primarne dohotke (dohodak od imovine i rada).

Statistika platnog bilansa je neravno metodološki unaprijeđena implementacijom novih standarda datih u MMF-om priručniku, šesto izdanje (BPM6) kao i implementacijom preporuka tehničkih misija MMF-a. Implementacija novog priručnika BPM 6 u statistiku platnog bilansa, dovela je do promjena i u kompilaciji, a i u predstavljanju podataka. Novi podaci bilansa plaćanja, nedavno publikovani, razlikuju se značajno od ranije objavljenih i imaju značajan uticaj na kompiliranje Bruto domaćeg proizvoda prema rashodnom pristupu. Među promjenama koje su nastale u statistici platnog bilansa treba istaći implementaciju neto koncepta u bilježenju podataka o robi za doradu i reviziju koje su nastale poboljšanjem izvora i metoda.

Zbog trenutnog nedostatka izvora podataka, revidirane procjene bilansa plaćanja su raspoložive samo od prvog kvartala 2007. Stoga, revidirane procjene BDP-a su kompilirane samo od 2007.

Procjene u stalnim cijenama

Procjene BDP-a rashodnim pristupom obračunate su u cijenama prethodne godine, što omogućava poređenje podataka između dvije godine, na kvantitativnoj osnovi (nakon eliminisanja efekta promjena u cijenama). Implicitni deflatori agregata i njegovih komponenti su Paasche-ove vrste, što ukazuje na to da se ne odlikava samo promjena u cijenama nego i promjena u sastavu rashoda za godine koje se upoređuju. Slijedi opis osnovnih izvora i metoda korištenih za komponente krajnje potrošnje:

changes in prices during the time the inventories are held by producers in the year of reference). For calculation of holding gains Producer price indices and Consumer price indices were used.

Estimates of valuables

The estimates of investment in valuables were taken from the data collected by investment survey.

Imports and exports of goods and services

The estimates of total imports and exports of goods and services were taken from the corresponding estimates of balance of payment statistics compiled by the CBBiH. Imports and exports of services, in accordance with the definitions of the national accounts, do not include payments between residents and non-residents related to primary income (income from property and labour).

Methodological improvements in the balance of payment statistics were recently implemented with adoption of updated standards given by the IMF Balance of Payment Manual, Sixth edition (BMP 6) as well as the implementation and recommendations made by an IMF's technical assistance mission. Implementation of the new Balance of Payment Manual, Sixth edition – BPM6 in the balance of payment statistics caused changes to both the compilation and presentation of the data. The new published data on Balance of payment differ significantly from previously published and have considerable impact on compilation of Gross domestic product by expenditure approach. Among the changes in the balance of payments data it should be noted the implementation of the net concept in recording data on goods for processing and revisions to flows stemming from improved source data and methods.

Due to the lack of source data at present, revised estimates of balance of payment flows are available only from the first quarter of 2007. Consequently, revised estimates of GDP have been compiled only from 2007.

Estimates at constant prices

Estimates of GDP by expenditure were calculated at prices of the previous year, thus allowing the comparison of the data of two consecutive years on a quantitative basis (after eliminating the effect of changes in prices). The implicit deflators of the aggregate and its component are of a Paasche type, which implies that they reflect not only changes in prices but also changes in the composition of the expenditures between the years compared. A description of the main sources and methods by component of final expenditures is as follows:

Izdaci za krajnju potrošnju domaćinstva: procjene potrošnje poljoprivrednih proizvoda u cijenama prthodne godine su dobijene revalorizacijom potrošenih količina, korištenjem prosječnih cijena prethodne godine. Za sve ostale stavke koje čine potrošnju domaćinstva, procjene pri stalnim cijenama su obračunate na nivou 4 cifre COICOP klasifikacije, deflacioniranjem odgovarajućih vrijednosti tekućih cijena sa odgovarajućom komponentom Indeksa potrošačkih cijena (CPI).

Izdaci rezidentnih domaćinstava u inostranstvu su deflacionirani relevantnim komponentama indeksa potrošačkih cijena za zemlje koje su glavne destinacije u turizmu. Potrošnja nerezidenata je deflacionirana sa relevantnim komponentama CPI-a.

Izdaci za krajnju potrošnju NPISH: procjene pri stalnim cijenama su dobijene kao zbir troškova komponenti potrošnje obračunate u cijenama prethodnegodine, pri čemu jekupovina deflacionirana sa općim CPI-em (indeksom potrošačkih cijena), a naknade zaposlenicima pri stalnim cijenama su dobijene ekstrapolacijom podataka iz prethodne godine sa promjenama u broju zaposlenika.

Izdaci za krajnju potrošnju vlada: su dobijeni kao zbir komponenti troškova pri stalnim cijenama. Nabavka roba i usluga je deflacionirana općim CPI-em (indeksom potrošačkih cijena), a naknade za zaposlene promjenama u broju zaposlenih.

Bruto investicije u stalna sredstva: Vrijednost ulaganja u mašine i opremu u stalnim cijenama dobijena je deflacioniranjem tekućih vrijednosti. Procjene za građevinske radove (zgrade i objekte) su obračunate deflacioniranjem, korištenjem implicitnog deflatora output-a za građevinsku djelatnost. Mašine i oprema proizvedeni u BiH su deflacionirani odgovarajućim indeksom proizvođačkih cijena, a mašine i oprema inostranog porijekla su deflacionirani indeksom proizvođača zemalja iz kojih je oprema uvezena, ponderiranog učešćem u ukupnom uvozu opreme.

Dragocjenosti: Vrijednost dragocjenosti u stalnim cijenama dobijena je deflacioniranjem tekuće vrijednosti indeksom potrošačkih cijena.

Izvoz i uvoz roba i usluga: Za obračun izvoza i uvoza roba i usluga u stalnim cijenama korišteni su indeksi jediničnih vrijednosti, Paasche vrste. Ovi indeksi su bazirani na detaljnim podacima vanjske trgovine korišteni za deflaciju odgovarajućih vrijednosti izvoza i uvoza u tekućim cijenama. Izvoz i uvoz usluga je deflacioniran odgovarajućim indeksima cijena.

Household consumption expenditure: estimates of consumption of agriculture products at prices of previous year were obtained by revaluating the quantities consumed using the average prices of previous year. For all other items composing the consumption of households, estimates at constant prices were calculated at the four-digit level of the COICOP classification by deflation of the respective current price values with the most appropriate component of the Consumer Price Index (CPI). Expenditures of resident households abroad were deflated by relevant components of the consumer price indices of the countries of main destination of tourism. The consumption of non-residents was deflated by relevant components of the CPI.

NPISHs consumption expenditure: estimates at constant prices were obtained as the sum of the cost component of consumption recalculated at prices of previous year, where purchases were deflated by the general CPI and remuneration of employees at constant prices are obtained by extrapolation of the previous year data by the change in the number of employees.

General government consumption expenditure: were obtained as the sum of the cost component at constant prices. Purchases of goods and services were deflated by the general CPI and the remuneration of employees was based on the changes in the number of employees.

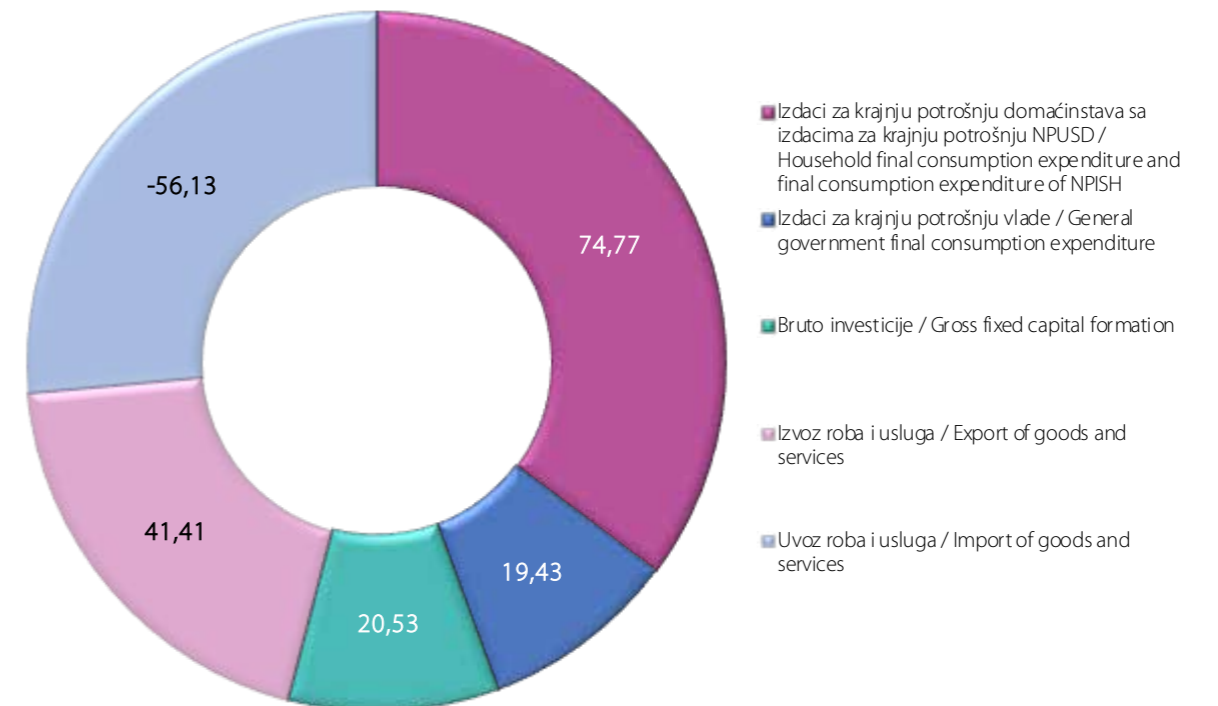

Gross fixed capital formation: Calculations of acquisition of machinery and equipment at constant prices were obtained by deflation of the current values. Estimates of construction assets (buildings and structures) were deflated using the implicit deflator of output of the construction industry. As the deflator for domestically produced equipment corresponding producer price index was used. Imported machinery and equipment was deflated by producer price index from country of origin, weighted by share in total import of machinery and equipment.

Valuables: Estimates of valuables at constant prices were obtained by deflation of the current value by consumer price index.

Exports and imports of goods and services: Unit value indices of a Paasche type for exports and imports were used for the deflation of the respective values of exports and imports at current prices. Exports and imports of services were deflated by price indices.
