## POLJOPRIVREDA, OKOLIŠ I REGIONALNE STATISTIKE *AGRICULTURE, ENVIRONMENT AND REGIONAL STATISTICS*

### PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U I TROMJESEČJU 2018

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN  
BOSNIA AND HERZEGOVINA IN 1<sup>st</sup> QUARTER 2018*

**Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u prvom tromjesečju 2018. godine manja je za 13,20% u odnosu na isto razdoblje 2017. godine. Proizvodnja sortimenata četinjača veća je za 4,14% dok je proizvodnja sortimenata listača manja za 28,08%.**

Proizvodnja trupaca četinjača veća je za 9,09% dok proizvodnja trupaca listača bilježi pad od 31,87%. Rast proizvodnje od 24,17% u odnosu na prvo tromjesečje 2017. godine bilježi se kod janskog drveta četinjača, kod ostalog dugog drveta četinjača od 5,58% i kod janskog drveta listača od 23,15%. Pad proizvodnje se bilježi kod prostornog drveta četinjača u visini od 15,41%, kod ostalog dugog drveta listača u visini od 13,98% i kod prostornog drveta listača u visini od 45,81%. Pad proizvodnje od 24,42% se bilježi i kod ogrijevnog drveta listača. Kod proizvodnje ostalog grubo obrađenog drveta i ogrijevnog drveta četinjača radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema utjecaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

**Total production of forest assortments in Bosnia and Herzegovina in 1<sup>st</sup> quarter of 2018 decreased for 13,20%, compared to the same period in 2017.**

**Production of coniferous (softwood) assortments is higher for 4,14% while the production of broadleaf (hardwood) assortments decreases for 28,08%.**

Production of coniferous logs is 9,09% higher while production of broadleaf logs records decrease of 31,87%. Increase in production of 24,17%, compared to 1<sup>st</sup> quarter of 2017, was recorded in production of coniferous mining wood, in production of coniferous other long wood of 5,58% and in production of broadleaf mining wood of 23,15%. Production decrease was recorded in production of coniferous cordwood of 15,41%, in production of broadleaf other long wood of 13,98% and in production of broadleaf cordwood of 45,81%. Production fall is also recorded to coniferous fuelwood of 24,42%. Other roughly worked wood and coniferous fuelwood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

**Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u I tromjesečju 2018 god.**

*Percentage participation of different assortments in total production of forest assortments in 1<sup>st</sup> quarter of 2018*

### Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom priopćenju, urađeni su na temelju rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečna izvješća podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

**Četinjače** su vrste drveća iz klase golosjemenica (Gymnospermae), pretežito iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinjača ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

### Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

**Coniferous** are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Included here are domestic commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and it is, in international classification, regardless its mechanical properties, classified as *softwood*.

**Listaće** su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća listaća kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih listaća iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih listaća. Drvo liščara je složenije građe u odnosu na drvo četinjača i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

**Trupci** su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

**Jamsko drvo** obuhvata šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

**Ostalo dugo drvo** obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jabolka i sl.

**Prostorno drvo** obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u kemskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

**Ogrijevno drvo** je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

**Ostalo grubo obrađeno drvo** obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruća i sl.

**Broad leaf** are tree species from systematic class of covered-seed plants (Angiospermae). Included here are domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and it is, in international classification, regardless its mechanical properties, classified as *hardwood*.

**Logs** are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

**Mining wood** include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

**Other long wood** include technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

**Cordwood** include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

**Fuelwood** is wood intended for heating or production of charcoal.

**Other wood, roughly worked** is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
