GODINA/ YEAR XIII

SARAJEVO, 20.11.2018.

BROJ/ NUMBER 5

POLJOPRIVREDA, OKOLIŠ I REGIONALNE STATISTIKE AGRICULTURE, ENVIRONMENT AND REGIONAL STATISTICS

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U III TROMJESЕČJU 2018 PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 3rd QUARTER 2018

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u trećem tromjesečju 2018 godine manja je za 2,09% u odnosu na isto razdoblje 2017. godine. Proizvodnja sortimenata četinjača manja je za 0,14%, dok je proizvodnja sortimenata listača manja za 3,92%.

Proizvodnja trupaca četinjača manja je za 4,04%, dok proizvodnja trupaca listača bilježi pad od 5,40%. Pad proizvodnje, u odnosu na treće tromjeseče 2017 bilježi se i kod: ostalog dugog drveta četinjača - 18,18%, ostalog dugog drveta listača - 30,41%, prostornog drva listača - 35,35% i ogrijevnog drveta listača - 1,08%. Rast proizvodnje, u odnosu na treće tromjeseče 2017 bilježi se kod: jamskog drveta četinjača - 14,24% i prostornog drveta četinjača - 8,21%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrijevnog drva četinjača i jamskog drveta listača radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema utjecaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 3rd quarter of 2018 has been decreased for 2,09%, compared to the same period in 2017. Production of coniferous (softwood) assortments is, for 0,14% lower while the production of broadleaf (hardwood) assortments decreases for 3,92%.

Production of coniferous logs is 4,04% lower while production of broadleaf logs records decrease of 5,40%. Production decrease, compared to 3rd quarter of 2017, has also been recorded in production of: coniferous other long wood - 18,18%, broadleaf other long wood - 30,41%, broadleaf cordwood - 35,35% and broadleaf fuelwood - 1,08%. Production increase, compared to 3rd quarter of 2017, has been recorded to: coniferous mining wood - 14,24% and coniferous cordwood - 8,21%. Other roughly worked wood, coniferous fuelwood and broadleaf mining wood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments..

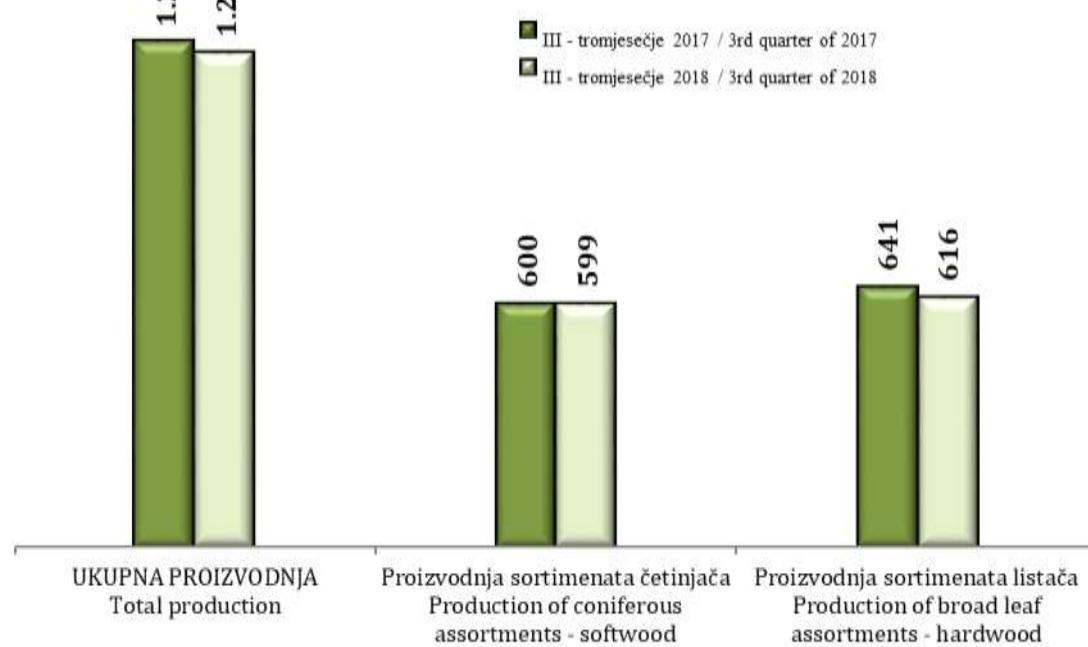

Tablica 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U III TROMJESEĆU 2018

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 3rd QUARTER OF 2018

	Proizvodnja (Production)			Prodaja (Sale)			
	III tromjeseče 3 rd quarter 2017	III tromjeseče 3 rd quarter 2018	Indeksi Indices VII-IX 2018 VII-IX 2017	III tromjeseče 3 rd quarter 2017	III tromjeseče 3 rd quarter 2018	Indeksi Indices VII-IX 2018 VII-IX 2017	
	m³		m³				
UKUPNO	1.240.599	1.214.638	97,91	1.310.190	1.256.905	95,93	TOTAL
ČETINJAČA	599.935	599.068	99,86	628.212	619.109	98,55	CONIFEROUS
LISTAČA	640.664	615.570	96,08	681.978	637.796	93,52	BROAD LEAF

tromjeseče 2017. i 2018. god.**

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 3rd quarter of 2017 and 2018

Graf 2. Postotak sudjelovanja pojedinih sortimenata u ukupnoj proizvodnji
 Percentage participation of different assortments in total production

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom priopćenju, urađeni su na temelju rezultata obrade entitetskih zavoda za statistiku iz redovitog mjeseca istraživanja.

Mjesečno izvješće podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvnu masu sortimenata izraženu u zapreminskim metrima.

Četinjače su vrste drveća iz klase golosjemenica (Gymnospermae), pretežito iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (Abies alba), smrča (Picea abies) te bijeli (Pinus sylvestris) i crni bor (Pinus nigra). Drvo četinjača ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (Abies alba), Spruce (Picea abies), Scots Pine (Pinus sylvestris) and European Black Pine (Pinus nigra). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Listač su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća listača kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih listača iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih listača. Drvo lišćara je složenije građe u odnosu na drvo četinjača i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za daljnju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvaća šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvaća tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvaća drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u kemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog ugljena.

Ostalo grubo obrađeno drvo obuhvaća sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruci, pletarski štapovi, „pruće“ i sl.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood include technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
