YEAR XVII

SARAJEVO, 05. 06. 2023.

NUMBER 3

TOURISM STATISTICS

Cumulative data, January - April 2023

In the period January - April 2023, tourists realised 401 582 arrivals, which represent an increase of 26,2%, and 877 244 overnight stays, which represent an increase of 24,0% compared to the same period of 2022.

The number of domestic tourist nights decreased by 1,5% and the number of foreign tourist nights increased by 41,9% as compared to the same period in 2022. Domestic tourists' share of the total number of overnight stays was 32,8%, and foreign tourists share was 67,2%.

Concerning the structure of foreign tourist nights, most of them (68,4%) were realised by tourists from Croatia (26,9%), Serbia (19,2%), Slovenia (9,5%), Turkey (5,0%), Montenegro (4,0%), Germany (3,8%). Tourists from other countries accounted for 31,6% of tourist nights.

Regarding the average detention of foreign tourist stays, Estonia comes in first with an average stay of 3,8 nights, followed by Kuwait with 3,6 nights, United Kingdom and Malta with 3,0 nights, Latvia and Ireland with 2,9 nights.

According to the type of accommodation facility, the highest number of nights was recorded in hotels and similar accommodations, with a share of 95,2%.

Noćenja turista u periodu Januar - April 2022. i 2023.

1)The Classification of Economic Activities of BiH 2010

*final data

Methodology

The purpose of the statistical survey

The purpose of the statistical survey is to monitor the tourist activity realised in commercial accommodation establishments and to provide internationally comparable BiH's tourism statistics in accordance with current EU Regulations for tourism statistics.

Observation units

Observation units are all business entities /legal units that are, by their main activity, registered in accommodation activity (division 55, KD BiH 2010), persons as well as households that rent accommodation establishments to tourists. For the purpose of the survey, the Classification of Activities in Bosnia and Herzegovina - KD BiH 2010 was used, and it is fully compliant with the European Classification of Economic Activities - NACE Rev. 2.

Coverage

Reporting units are all business entities (enterprises, craftsmen, cooperatives, institutions, associations, etc.) and their constituent units that are registered according to KD BiH 2010 under section: 55.1 (hotels and similar accommodation), 55.2 (holiday and other short - stay accommodation), 55.3 (camps and camping grounds), 55.9 (other uncategorised accommodation), health care institutions in which persons themselves bear the fee for medical rehabilitation or their stay: business entities that deal with the mediation of accommodation of guests in: households, houses, camps, apartments, and rooms that are directly rented by private persons/households. The survey covers the entire territory of Bosnia and Herzegovina.

Source and methods of data collection

Data on tourist turnover (number of tourist arrivals and tourist nights) is collected from the regular monthly report (TU-11 form). Reports are usually made on the basis of reception records in guest books for entities and their parts engaged in organising and arranging tourists.

Data revision

Regular press releases on tourism are published monthly and contain preliminary / first results until the final data are published. The first regular revision of data implies that, when publishing data for the next month, the published data from the previous month (t-1) are revised in accordance with the information submitted by the reporting unit. The second regular revision of previously published data is the annual revision, which includes all changes in the data submitted after the first revision in order to ensure the accuracy of the published data.

The press release clearly indicates what the data are, so that users of the statistics can interpret them correctly. If new statistical standards and concepts are introduced, changes in the research methodology are made, it is necessary to revise the data to ensure the consistency and comparability of data from previous historical series and new data series. Users will be informed about changes in data and reasons in an appropriate and transparent manner, in regular monthly press releases and other publications for the public, as well as on the website of the BiH Agency for Statistics (www.bhas.gov.ba).

Definitions

Tourism means the activity of visitors taking a trip to a main destination outside their usual environment for less than a year for leisure, business, or other personal purposes other than to be employed by a resident entity in the place visited.

A tourist is every person who, outside his place of permanent residence, spends one night in a hotel or some other accommodation facility for reasons of rest, recreation, health, study, sport, religion, family, business, public tasks, or meeting. A tourist is registered in every place or establishment where he stays, and, therefore, in case of a change of place or establishment, he must register again, which results in data ambiguity. Consequently, the statistics register the number of tourist arrivals, not the number of tourists.

A residence is a place where a person comes with the intention of staying permanently. A tourist is registered in every place or establishment where he stays, and if he or she changes the place or establishment, he or she must register again, which results in data ambiguity. Consequently, the statistics register the number of tourist arrivals and not the number of tourists.

A domestic tourist is a person with permanent residence in the BiH who spends at least one night in a hotel or other accommodation establishment outside their place of residence.

A foreign tourist is every person with permanent residence outside in BiH who temporarily resides in BiH and who spends at least one night in a hotel or other accommodation establishment.

Tourist arrivals refer to the number of persons (tourists) who arrived and registered their stay in an accommodation establishment.

Tourist nights refer to every registered overnight stay of a person (tourist) in an accommodation establishment.

Accommodation capacities are presented as the number of rooms, apartments, and camping sites and the number of permanent beds.

Permanent beds are those that are regularly ready-made for renting to guests.

The occupancy rate of permanent beds (net) in the reference period is obtained by dividing the total number of nights by the number of beds on offer and the number of days when the beds are actually available for use during the reference period. The data is expressed as a percentage.

The occupancy rate of bedrooms (net) in the reference period is obtained by dividing the total number of bedrooms used during the reference period by the number of bedrooms available for use during the reference period. The data is expressed as a percentage.

The organization of tourist arrivals represents a way of organising tourist arrangements. Depending on the way of organising, tourist arrangements can be individual or organised (travel agencies).
