OPĆI PODACI O BOSNI I HERCEGOVINI

GENERAL DATA ABOUT BOSNIA AND HERZEGOVINA

Službeni naziv: Bosna i Hercegovina (BiH)

Geografska lokacija: Bosna i Hercegovina se nalazi na zapadnom dijelu Balkanskog poluotoka

Pogranične zemlje: Srbija i Crna Gora na istoku, Republika Hrvatska na sjeveru, zapadu i jugu.

Administrativna podjela: BiH je podjeljena na dva entiteta: Federaciju Bosne i Hercegovine (FBiH) i Republiku Srpsku (RS) i Distrikt Brčko.

Entitetska struktura: FBiH je administrativno podjeljena na 10 županija. Županije su podjeljene na općine. Na području FBiH je 79 općina.

Republika Srpska je administrativno podjeljena na 62 općine. Grad Brčko je zasebna administrativna jedinica - Distrikt.

Površina:

Bosna i Hercegovina ukupno

| | |
|---------|--------------------------|
| pokriva | 51 209,2 km ² |
| Kopno | 51 197 km ² |
| More | 12,2 km ² |

Klima: Pretežno kontinentalna, mediteranska na jugu

Broj stanovnika: Procjena nazočnog stanovništva (30.06.2008.) 3,842,265

Struktura stanovništva: Bošnjaci, Hrvati i Srbi i pripadnici ostalih naroda

Glavni grad: Sarajevo

Službeni jezici: bosanski, hrvatski i srpski i dva pisma latinica i ćirilica.

Zvanična valuta: Konvertibilna marka (KM), (1KM = 0,511292 Euro)

Official name: Bosnia and Herzegovina (BiH)

Geographical location: Bosnia and Herzegovina is situated in the west part of the Balkan Peninsula

Border countries: Serbia and Montenegro on the east, Republic of Croatia on the north, west and south

Administrative distribution: B&H is divided on two entities: Federation of Bosnia and Herzegovina (FB&H) and Republika Srpska (RS) and District Brčko

Entity's structure: FB&H is administratively divided on 10 cantons. These cantons are divided into municipalities. There are 79 municipalities in Federation of BiH. The Republika Srpska is administratively divided into 62 municipalities. The city Brčko is a separated administrative unit -District.

Surface:

Bosnia and Herzegovina

| | |
|----------------|--------------------------|
| covers totally | 51 209,2 km ² |
| Land | 51 197 km ² |
| Inland | 12,2 km ² |

Clime: In the majority continental, mediterranean on south

Number of habitants: Estimation of current population (30.06.2008.) 3.842.265

The structure of population: Bosniacs, Croats, Serbs and other participants of others nations

Capital city: Sarajevo

Official languages: Bosnian, Croatian and Serbian and two alphabets Cyrillic and Latin.

Official value: Convertible mark (KM), (1KM = 0,511292 Euro)

PREDGOVOR

FOREWORD

Bilten o stanovništvu je publikacija Agencije za statistiku Bosne i Hercegovine, koja na sveobuhvatan način prikazuje službene statističke podatke o stanovništvu za razinu Bosne i Hercegovine.

Prema Zakonu o statistici BiH («Službeni glasnik BiH», broj 34/2002) Agencija za statistiku BiH nadležna je da sukladno međunarodno prihvaćenom metodologijom izrađuje i objavljuje statističke podatke za Bosnu i Hercegovinu, a na temelju podataka zavoda za statistiku entiteta, Distrikta Brčko i drugih institucija na razini BiH.

Izražavam zahvalnost Federalnom zavodu za statistiku, Republičkom zavodu za statistiku Republike Srpske i Distriktu Brčko koji su omogućili Agenciji za statistiku BiH da na temelju njihovih statističkih podataka pripremi ovu publikaciju.

Na svim primjedbama i sugestijama za poboljšanje slijedećeg Biltena, Agencija za statistiku biće zahvalna.

Sarajevo, prosinac 2009.

Ravnatelj

Demographic Statistics is a publication of the Agency for Statistics of Bosnia and Herzegovina that contains a comprehensive overview of official statistical data on the population for the territory of the Bosnia and Herzegovina.

According to the Statistical Law of Bosnia and Herzegovina («Official Gazette B&H», number 34/2002) the Agency for Statistics of Bosnia and Herzegovina is in charge «of the production and publishing, of aggregated statistics for Bosnia and Herzegovina in accordance with the International accepted methodology, based on data submitted by the Entity Statistical Institutes .»

We would like to take this opportunity to express our gratitude to the Institute of Statistics of the Federation of Bosnia and Herzegovina, the Republic Institute of Statistics of the Republika Srpska and the Distrikt Brčko who provided data for this publication.

All suggestions by users of statistical data, which lead to further improvement of this publication, will be gratefully accepted.

Sarajevo, December 2009.

Director

STANOVNIŠTVO
POPULATION

Metodološka objašnjenja

Izvori i metode prikupljanja podataka:

Podaci o stanovništvu i domaćinstvima prikupljaju se popisima svakih deset godina sukladno jedinstvenoj metodologiji na cjelokupnom području Bosne i Hercegovine.

Definicije

Podaci iz popisa odnose se na stalno stanovništvo na području Bosne i Hercegovine. Stalno stanovništvo jednog mjesta čine sve osobe koje u tom mjestu stalno stanuju, tj. imaju prebivalište, bez obzira na to da li su se u trenutku popisa nalazile u mjestu prebivališta ili su bile privremeno odsutne, bilo u zemlji ili inozemstvu. Osobe na privremenom radu kod inozemnih poslodavaca ili na samostalnom radu, kao i članovi obitelji koji s njima borave u inozemstvu popisani su kao stalni stanovnici odgovarajućih naselja u zemlji u kojima je njihovo prebivalište.

Kućanstvom se smatra obiteljska ili druga zajednica osoba koje su izjavile da zajednički stanuju i troše prihode za podmirenje osnovnih životnih potreba, kao i svaka osoba koja živi sama (samačko domaćinstvo) ili stanuje sa drugim osobama s kojima ne troši svoje prihode. U popisima 1961. i 1971. kao stalni stanovnici popisane su sve osobe koje su se zatekle u mjestu rada ukoliko se nisu svakodnevno vraćale u mjesto stanovanja obitelji, dok su 1981. i 1991. te osobe popisane kao stalni stanovnici mjesta u kojima su nastanjene njihove obitelji, čime je smanjen broj samačkih domaćinstava.

Podaci o **etničkim grupama** rezultat su slobodno izražene **etničke** pripadnosti stanovnika preko deset, odnosno petnaest godina starosti, odnosno roditelja (staratelja) kada su u pitanju djeca mlađa od 10, odnosno 15 godina u popisima 1971, 1981. i 1991.

U popisima prije 1981. godine Muslimani su iskazivani pod različitim nazivima. U popisu 1953. godine osobe koje su izjavile da su Muslimani svrstane su u grupu „Jugoslaveni-neopredjeljeni“ zajedno sa ostalim osobama jugoslovenskog porijekla/podrijetla koje su izjavile da su Jugoslaveni, dok su u popisu 1961. godine iskazani pod nazivom „Muslimani u etničkom smislu“, a 1971. godine kao „Muslimani u smislu narodnosti“.

Podaci po starosti iskazuju se po navršenim godinama života. Svaka skupina starosti obuhvaća osobe koje su navršile godine života unutar granica raspona. Tako su npr. u skupini 10-14 godina obuhvaćene osobe koje imaju 10 i više godina, ali još nisu navršile 15 godina života.

Pismenost Podaci o pismenosti stanovništva odnose se samo na stanovništvo staro 10 i više godina. Pismenim se smatra ona osoba koja zna pročitati i napisati sastav (tekst) u vezi sa svakidašnjim životom, bez obzira na kojem jeziku čita i piše. Sve ostale osobe, uključujući i one koje samo čitaju smatrane su nepismenim.

Školska sprema je najviši stupanj obrazovanja koji je osoba stekla po okončanju redovitog školovanja ili škole koje zamjenjuju redovite polaganjem privatnih ispita u nekoj redovitoj školi, ili pohađanjem tečaja za skraćeno završavanje neke škole kojim se po postojećim propisima stječe određena školska sprema.

Notes on methodology

Sources and methods of data collection

The data on population and households have been collected by Census every ten years and by unified methodology on all areas of B&H.

Definitions

The data of the population census relate to the resident population in B&H territories. Permanent residents are considered all those who are usual residents of one place, that is, those having permanent residence there, irrespective of their presence or temporary absence at the census moment, and also in the case when he/she was absent from the place due to any reason: travel, education or field work, temporary at the Census date work abroad, medical treatment etc. Data on these persons were furnished their households.

A household is any family or other community of people residing and living together who share their income to cover the basic costs of living. A household is also considered every person who lives alone or with other persons but does not share income with them. In the Population Census for 1961 and 1971 as a resident population enumerated every person where he/she happened to be at the Census date, while in 1981 and 1991 Census these persons enumerated as a resident population in the places where their families live.

The data on ethnic groups are the result of freely expressed ethnicity of population over 10 or over 15 years of age, respectively parents (guardians) in the case of children under 10 or under 15 years of age in the 1971, 1981, 1991 census.

Muslims are grouped under different groups in the Censuses preceding 1981 Census. Persons who stated they are Muslims were grouped in the „Yugoslavs-unstated“ together with the other persons Yugoslav's origin stated they are Yugoslavs in the 1953 Census. They are grouped as „Muslims in the ethnic affiliation sense“ in the 1961 Census, and as „Muslims in the sense of ethnicity“ in the 1971 Census.

Data by age are expressed by completed years of age. Each age group includes persons who turned the years put as the limits of one interval. For example, the age group of 10-14 years includes all persons who have reached 10 years and more, but have not yet turned 15.

Literacy Data on literacy of population relate to population aged 10 years and over. A person was considered literate if, according to own statement, able to read and write an ordinary text regardless of the language. All other persons including also those who only could read, were considered as illiterate.

Educational attainment (school completed) is considered the highest level of completed education, i.e. a regular school that a person completed or an equivalent substitute school, passing of exams in a regular school or completing a course of a ridged education, by which, according to valid regulations, a respective school level recognised.

Prema aktivnostima stanovništvo je razvrstano na aktivno, stanovništvo sa osobnim prihodom i izdržavane osobe. Aktivno je ono stanovništvo koje obavlja neko zanimanje i tako osigurava sredstva za život. Aktivnim se smatraju i osobe koje traže zaposlenje, služe vojni rok, kao i osobe na izdržavanju kazne. Osobama sa osobnim prihodom smatraju se penzioneri svih kategorija, osobe koje primaju socijalnu skrb ili imaju prihode od davanja u zakup zemljišta, kuće, radnje i druge imovine. Izdržanim osobama (djeca, učenici, studenti, kućanice i dr.) smatraju se osobe koje nemaju vlastitih prihoda ni po kojem osnovu, nego ih izdržavaju roditelji, rođaci ili druge osobe, kao i osobe s prihodima koji im ne obezbjeđuju gospodarsku neovisnost.

Poljoprivredno stanovništvo u popisima 1981. i 1991. godine čine sve osobe čija se zanimanja nalaze u skupini „poljoprivrednici“ i „ribari“ i „lovci“, kao i sve osobe koje oni izdržavaju.

Podaci o rađanjima, umiranjima i sklopljenim brakovima dobijaju se preko matičara, a o razvedenim brakovima od sudova nadležnih za razvode brakova.

Prema pravnim propisima o vođenju matičnih knjiga, slučajevi rođenja, smrti i zaključenja braka obavezno se upisuju u matične knjige područja na kome su se desili, bez obzira da li osobe na koje se odnose stanuju na tom području ili ne.

Obrađeni podaci o živorođenim i mrtvorodenim se daju po mjestu stalnog stanovanja majke, o umrlim po mjestu stalnog stanovanja umrle osobe, za sklopljene brakove po mjestu stalnog stanovanja ženika o razvedenim brakovima po posljednjem zajedničkom prebivalištu.

U statistici rođenih jedinica posmatranja je rođeno, odnosno živorođeno i mrtvorodeno dijete.

Živorodenim se djetetom smatra svako dijete koje prilikom rođenja diše i pokazuje druge znakove života kao što su kucanje srca, pulsiranje pupčane vrpce i nesumljivo kretanje voljnih mišića.

Ako dijete ubrzo nakon poroda umre, najprije se registrira kao živorođeno, a zatim kao umrlo dojenče.

Od 2001 godine po preporukama Skupštine Svjetske zdravstvene organizacije i Međunarodnog udruženja ginekologa (FIGO)

Mrtvorodenim se smatra dijete rođeno, odnosno izvađeno iz tijela majke bez ikakvih znakova života, tj. ako nije disalo niti pokazivalo neki drugi znak života, a nošeno je duže od 22 sedmice (približno 6 mjeseci) i koje ima porođajnu težinu 500 gr i više. Izbacivanje mrtvog ploda koji je nošen manje od 22 sedmice, smatra se pobačajem (abortusom), bez obzira na to da li je riječ o prirodnom ili namjernom prekidu trudnoće, i ne registrira se u matičnim knjigama, niti su ti podaci iskazani u ukupnom broju mrtvorodenih.

U statistici umrlih jedinica promatranja je svaka umrla osoba.

Umrli je svaka živorođena osoba kod koje je nastupio trajni prekid svih vitalnih funkcija koje započinju rođenjem bez mogućnosti ponovnog oživljavanja. Ovdje nisu uključeni mrtvorodeni.

Umrlo dojenčadi smatraju se djeca koja su umrla prije navršene prve godine života.

U statistici sklopljenih brakova jedinica promatranja je svaki zakonski sklopljen brak, a kod statistike razvoda brakova svaki brak koji je pravosnažnom presudom nadležnog suda razveden, poništen odnosno proglašen nevažećim.

Bračnim stanjem se smatra zakonski status osoba na koje se događaji odnose. To znači da se oženjenim odnosno udanim smatraju samo one osobe

Population is divided into **economically active** persons with income of their own and dependants. Under economically active population are shown all employment persons. Also active are shown persons who do not practice their occupation, because they are temporarily unemployed, than persons who were economically active, and are currently doing military service or are imprisoned and finally, persons seeking work for the first time. The group „persons with income of their own“ covers those persons who do not have an active occupation, but live on income accruing from their farmer work or activity (pensioners, disabled men) or from work respectively activity of member of their nucleus family. Here are also included the persons receiving social aid or deriving income from private property. „Dependants“ are the persons who do not have own income but are supported by parents, relatives or other persons. This group covers children, pupils, students, housewives.

Agricultural population in the 1981 and 1991 censuses include persons whose occupation is found in the group „agriculturist“ and „fishermen and hunters“ and their dependents.

Data on birth, deaths and marriages are taken from the registration officers, on divorces from the municipal courts in charge.

According to the legal regulations on registration, events of births, deaths and marriages are obligatory registered in population registers of area that took place, irrespective of residence of persons which events are refer to.

Processed data on live births and stillbirths are shown by place of permanent residence of mother, on deaths by the last permanent residences of the deceased, on marriages by the permanent residence of the bridegroom, and on divorces by the last common residence of the husband and wife.

In statistics of births the unit of observation is new-born, i.e. live born and still born child. A live-born child is every child who exhibits signs of life at birth.

Live birth is the complete expulsion or extraction from its mother of a product of conception, which, after such separation, breaths or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movements of voluntary muscles. If a product of such a births dies, it is first registered as live-born and then as died.

As of 2001 following the recommendations of the World Health Assembly and the International Federation of Gynecology and Obstetrics (FIGO),

A stillborn child is considered a child born or taken out from mother's body who exhibits no signs of life (not breathing, not moving, no heartbeat) where pregnancy has lasted more than 22 weeks (approximately 6 lunar months) and weight at childbirth has been 500 gr or more. Expulsion of a dead fetus carried less than 22 weeks considered a missearriage (abortion), irrespective of whether natural or artificial. These cases are not registered in population registers, nor shown in the tables on stillborn.

In statistics of deaths the unit of observation is every discased person.

A dead person is every live-born person in which there is a permanent disappearance of all evidence of life at any time after live birth has taken place, without capability of resuscitation. Stillbirths are not included here.

Dead infants are considered children who died under one year of age.

In statistics of marriages the unit of observation is every marriage that is recognised by law.

In statistics of divorces the unit of observation is every marriage that is dissolved or cancelled by a valid decision of the municipal court in charge.

Marital status Marital status is considered the legal status of inter-

obe koje su se u trenutku dešavanja, odnosno događaja nalazile u braku zaključnim sukladno odredbama Osnovnog zakona o braku, a kao razvedene smatrane su osobe čiji je brak sudski (zakonski) razveden.

Red rođenja djeteta Za određivanje reda rođenja uzimaju se u obzir sva djeca koju je majka rodila, uključujući dakle, i mrtvorodenu djecu, bez obzira da li su rođena u braku ili izvan braka.

Stručna pomoć kod rođenja je pomoć doktora medicine ili diplomirane primalje. Da bi se dobio ukupan broj rođenih sa stručnom pomoći, treba zbrojiti rođene u zdravstvenoj ustanovi i rođene "na drugom mjestu" sa stručnom pomoći.

Mjesto i utvrđivanje smrti Po ovom obilježju razvrstana su umrla lica, po tome da li je smrt nastupila u zdravstvenoj ustanovi ili na drugom mjestu (u stanu, polju, itd). Ako je smrt nastupila u zdravstvenoj ustanovi, ujedno se smatra da je smrt ustvrdio liječnik, a ako je smrt nastupila izvan zdravstvene ustanove, onda se umrli razvrstavaju još i po tome da li je smrt ustvrdio liječnik ili neka druga osoba.

Postupak izrade osnovnih demografskih pokazatelja

Opća stopa nataliteta predstavlja omjer između broja živorođenih i procjenjenog broja stanovnika, računato na 1000 stanovnika.

Opća stopa mortaliteta predstavlja omjer između broja umrlih i procjenjenog broja stanovnika, računato na 1000 stanovnika.

Opća stopa prirodnog prirasta predstavlja razliku između stope nataliteta i stope mortaliteta za godinu promatranja.

Stopa smrtnosti dojenčadi predstavlja omjer između broja umrle dojenčadi i broja živorođenih iste godine, računato na 1000 živorođenih.

Stopa nupcijaliteta predstavlja omjer između broja sklopljenih brakova, u toku jednogodišnjeg razdoblja, i procjenjenog broja stanovnika, računato na 1000 stanovnika.

Stopa divorcijaliteta predstavlja omjer između broja razvedenih brakova, u toku jednogodišnjeg razdoblja, i procjenjenog broja stanovnika, računato na 1000 stanovnika.

Temeljni materijal statistike prirodnog kretanja stanovništva priprema se i obrađuje u Federalnom zavodu za statistiku Federacije BiH, Republičkom zavodu za statistiku Republike Srpske i Distriktu Brčko.

viewed person. Married persons are only considered the persons who are, in moment of event, legally married according in regulations of basic law on marriage. Divorced are considered persons who are legally divorced.

Birth order In establishing birth order all children are taken into account (live births and stillbirths), irrespective of whether born in or out of wedlock.

Medical assistance at birth is the assistance by a medical doctor or a qualified midwife. The total data of live births with medical assistance includes the number of children born in medical facility and those born in "in some other place" but with medical assistance.

Place of death and establishing of death By this characteristic, the deceased are classified in consideration of whether the person died in health institution or some other place (house, field, etc). If the place of death is health institution it is considered that death is established by a physician, If place of death is some other place then are dead persons classified by whether of death was established by physician or some other person.

Procedure of making basic demographic indicators

General natality rate is the ratio between the number of live-born children and the estimated number of inhabitants per 1000 population.

General mortality rate is the ratio between a number of dead and an estimated number of inhabitants per 1000 population.

General rate of natural increase is the difference between the natality and mortality rates in given year.

Infant mortality rate is the ratio between the number of dead infants and the number of live-born children a given year per 1000 population.

Marriage rate is the relation between the number of marriage in one year period and the estimated number of inhabitants per 1000 population.

Divorce rate is the relation between the number of divorces in one year period and the estimated number of inhabitants per 1000 population.

Basic material on demographics statistics is being prepared and processed in the Entity Statistical Institutes and District Brčko.

¹⁾Specifične stope fertiliteta predstavljaju omjer između broja živorođene djece majke određene starosti po 1000 žena te iste starosti

¹⁾Fertility rates represent a ratio between a number of live born children by a mother of certain age by 1000 women of the same age

²⁾Za godine 1996,1997 i 1998 stope su rađene na temelju projekcije broja stanovnika za BiH za 1995 koju je uradio odjel za stanovništvo Ujedinjenih Naroda, Revizija 1998

²⁾For the years 1996,1997 and 1998 the rates are based on the projections on a number of population in B&H for 1995 prepared by the UN Population Division,Revision 1998

³⁾Za godine 1999,2000 i 2001 stope su rađene na temelju projekcije broja stanovnika za BiH za 2000 koju je uradio odjel za stanovništvo Ujedinjenih Naroda,Revizija 2000

³⁾For the years 1999,2000 and 2001 the rates are based on the projections on a number of population in B&H for 2000 prepared by the UN Population Division,Revision 2000

⁴⁾Za godine 2002, 2003, 2004, 2005, 2006, 2007 i 2008. stope su rađene na temelju procjene broja stanovnika za BiH za 2002. koja je urađena u Agenciji za statistiku BiH

⁴⁾For the years 2002, 2003, 2004, 2005, 2006, 2007 and 2008 the rates are based on the estimate on a number of population in B&H for 2002 prepared by Agency for statistics of B&H

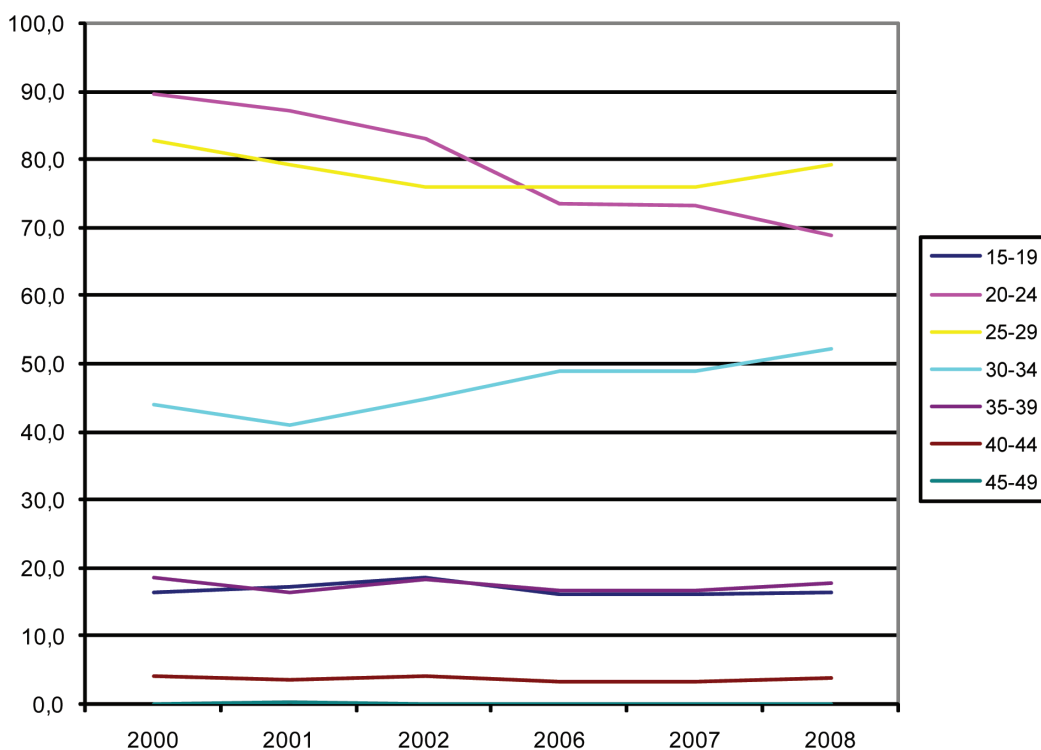

⁵⁾Stopa ukupnog fertiliteta predstavlja ukupan broj živorođene djece na jednu ženu

⁵⁾Total fertility rate represents the total number of live births by a female
