GODINA / YEAR I

SARAJEVO, 20.02.2018.

BROJ / NUMBER 1

POLJOPRIVREDA, OKOLIŠ I REGIONALNE STATISTIKE

AGRICULTURE, ENVIRONMENT AND REGIONAL STATISTICS

PROIZVODNJA JUŽNOG VOĆA I MASLINA, 2017

PRODUCTION OF SUBTROPICAL FRUIT AND OLIVES, 2017

Prema podacima u 2017. godini u odnosu na podatke u istom razdoblju u 2016. godini ukupan prinos je smanjen kod svih vrsta južnog voća i kod maslina.

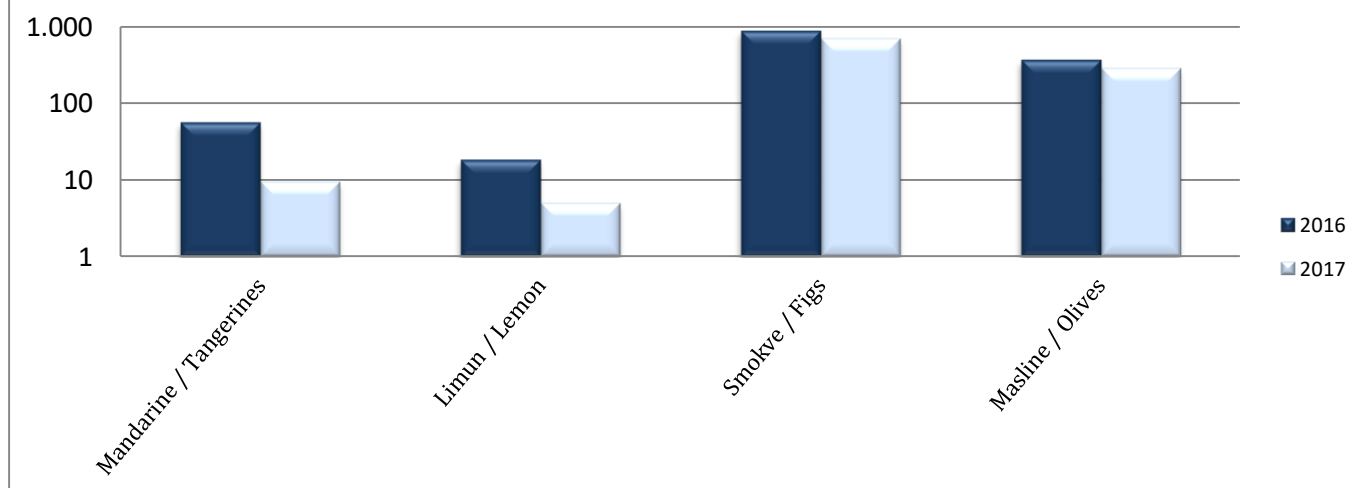

According to data in 2017 in relation with data in the same period in 2016 the total yield has been decreased in all kinds of species of subtropical fruit and olives.

PROIZVODNJA JUŽNOG VOĆA I MASLINA U 2017

METODOLOŠKA OBJAŠNENJA

Izvori i metode prikupljanja

Podaci o proizvodnji južnog voća i maslina u Bosni i Hercegovini dobiveni su agregiranjem podataka dobivenih redovitim statističkim istraživanjima u entitetskim zavodima za statistiku i podružnici Agencije za statistiku BiH iz Brčko distrikta. Pravni subjekti dostavljaju podatke na temelju knjigovostvene i druge evidencije, dok se za individualna poljoprivredna gazdinstva vrše procjene od strane statističkih procjenitelja po pojedinim općinama.

Definicije

Rodna stabla su stable koja su prema svojoj fiziološkoj zrelosti sposobna da pod normalnim uvjetima za vegetaciju zametnu plod, bez obzira da li su u odnosnoj godini rodila ili ne.

Prinos/prirod južnog voća i maslina je iskazan kao hambarski prinos/prirod normalne vlažnosti po odbitku svih gubitaka prilikom berbe i transporta.

Prinosi/prirodi po stablu/čokotu obračunati su na rodna stabla.

NOTES ON METHODOLOGY

Sources and collection methods

Data on production of subtropical fruit and olives in Bosnia and Herzegovina are aggregated from the regular statistical surveys conducted by the entity statistical institutions and branch of Agency for statistics of B&H from Brcko District. Legal entities are submitting data based on book-keeping and other records whereas the municipal statistical estimators are making estimations for the individual agricultural holdings.

Definitions

Trees of bearing age are those trees capable of bearing fruit under standard conditions, regardless of whether or not they bear fruit during reporting year.

Yield of subtropical fruit and olives is shown as the granaries yield of standard humidity after deductions all losses during the harvest and transportation.

Yield per tree or per vine is computed for the bearing trees.
