PREKOGRANIČNI PROMET NEOPASNOG OTPADA CROSS-BORDER TRAFFIC NON-DANGEROUS WASTE

Analiza podataka o ukupnom prekograničnom prometu neopasnog otpada u periodu 2014.-2021. godine ukazuje generalno na rast prometa sedam grupa otpada (metalni otpad, tekstilni otpad, gumeni otpad, plastični otpad, stakleni otpad, otpad od sagorijevanja i otpad od papira i kartona). Samo za neke vrste otpada zabilježen je umjeren pad.

Ukupna količina izvezenog neopasnog otpada u 2021. godini iznosi 1 100 934 tone, što je za 26,2% više u odnosu na prethodnu godinu. Podaci o izvezenim količinama neopasnog otpada u 2021. godini pokazuju trend rasta, što je uzrokovano povećanim izvozom nekih grupa otpada.

Posmatrajući pojedinačno grupe otpada, u 2021. godini povećan je izvoz staklenog otpada, metalnog otpada, gumenog otpada, tekstilnog otpada i otpada od sagorijevanja, dok je otpad od papira i kartona i plastični otpad zadržao trend postepenog pada.

Ukupna količina uvezenog neopasnog otpada u 2021. godini iznosi 36 909 tona, što je za 27,2% više u odnosu na prethodnu godinu. Analiza podataka o uvozu neopasnog otpada za period 2014.-2021. godine ukazuje na trend pada uvezenih količina metalnog otpada, plastičnog otpada, otpad od sagorijevanja i gumenog otpada, dok je uvoz staklenog otpada i otpada od papira i zadržao trend rasta tokom posmatranog perioda.

The analysis of data on the total transboundary movement of non-hazardous waste in the period 2014-2021 indicates a general increase in the turnover of seven groups of waste (metal waste, textile waste, rubber waste, plastic waste, glass waste, combustion waste and waste paper and cardboard). Only for some types of waste a moderate decline was recorded.

The total amount of exported non-hazardous waste in 2021 is 1,100,934 tons, which is 26.2% more than in the previous year. Data on exported quantities of non-hazardous waste in 2021 show a growth trend, which is caused by increased exports of some groups of waste.

Looking at individual waste groups, in 2021 the export of glass waste, metal waste, rubber waste, textile waste and combustion waste increased, while paper and cardboard waste and plastic waste maintained the trend of gradual decline.

The total amount of imported non-hazardous waste in 2021 is 36,909 tons, which is 27.2% more than in the previous year. Analysis of data on imports of non-hazardous waste for the period 2014-2021 indicates a downward trend in imported quantities of metal waste, plastic waste, combustion waste and rubber waste, while imports of glass and paper waste continued to grow during the observed period.

1. STATISTIKA VANJSKE TRGOVINE – IZVOZ NEOPASNOG OTPADA

FOREIGN TRADE STATISTICS – EXPORT OF NON-HAZARDOUS WASTE

1.1 IZVOZ METALNOG OTPADA

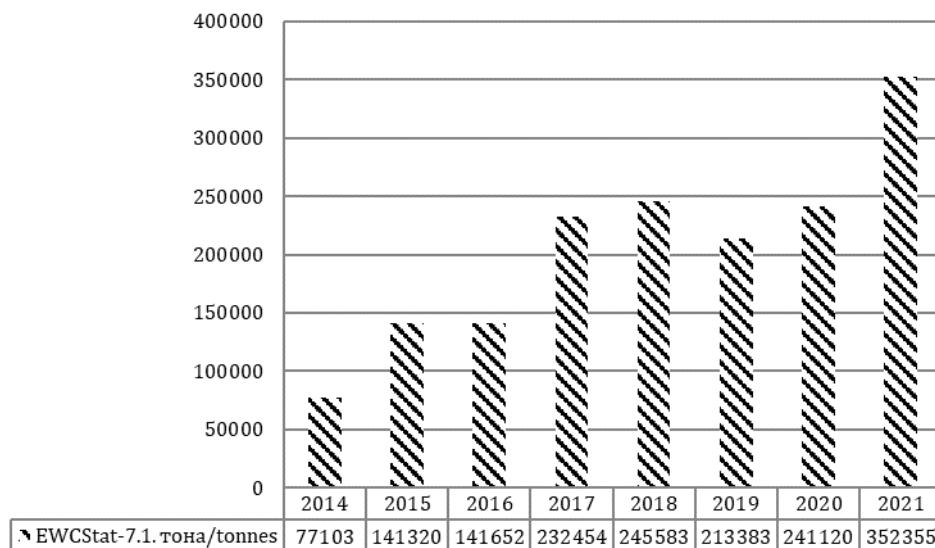

EXPORT OF METAL WASTE

Analiza podataka o izvozu metalnog otpada u periodu 2014. - 2021. ukazuje na rast izvezenih količina otpada. U 2021. godini uočen je rast izvoza, količina izvezenog otpada je za 46,1% veća u odnosu na 2020. godinu. Tokom 2021. godine od ukupno izvezene količine, 76,2% metalnog otpada izvezeno je u Tursku.

Analysis of data on exports of scrap metal in the period 2014 - 2021 indicates an increase in exported quantities of waste. In 2021, an increase in exports was observed, the amount of exported waste is 46,1% higher than in 2020. During 2021, of the total amount exported, 76,2% of scrap metal was exported to Turkey.

Grafikon 1. Izvoz metalnog otpada, 2014.-2021.

Graph 1. Export of metal waste, 2014-2021

1.2 IZVOZ STAKLENOG OTPADA

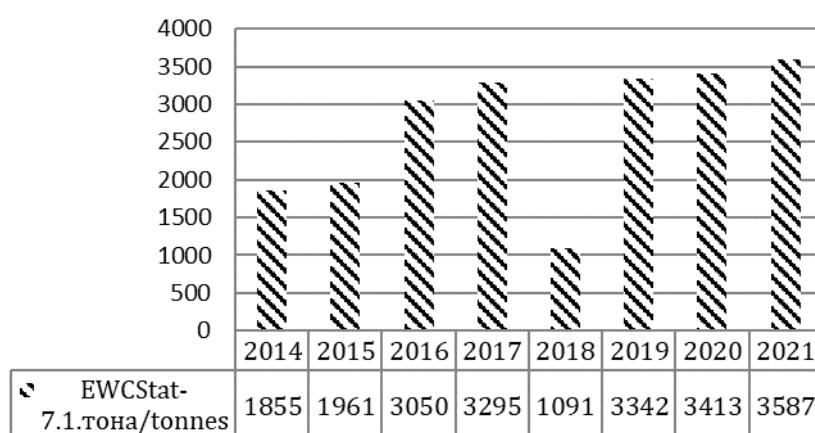

EXPORT OF GLASS WASTE

Analiza podataka o izvozu staklenog otpada u periodu 2019.-2021. ukazuje na trend rasta izvezenih količina. U 2021. godini uočen je rast izvoza, količina izvezenog staklenog otpada je za 5,1% veća u odnosu na 2020. Tokom 2021. godine najveće količine staklenog otpada izvezene su u Hrvatsku.

The analysis of data on the export of glass waste in the period 2019-2021 indicates a growth trend in exported quantities. In 2021, an increase in exports was observed, the amount of exported glass waste was 5.1% higher than in 2020. During 2021, the largest quantities of glass waste were exported to Croatia.

Grafikon 2. Izvoz staklenog otpada, 2014.-2021.

Graph 2. Export of glass waste, 2014-2021

1.3. IZVOZ TEKSTILNOG OTPADA

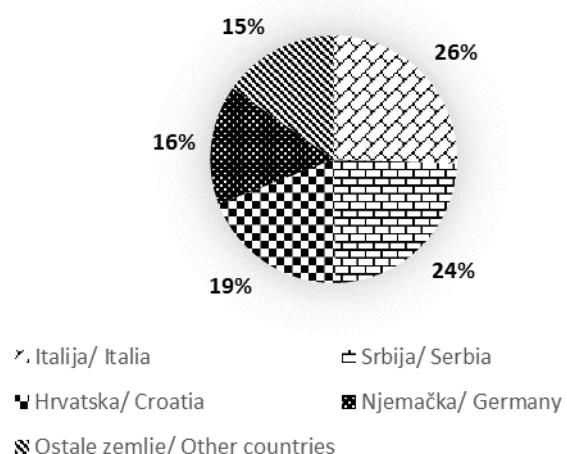

EXPORT OF TEXTILE WASTE

U 2021. godini tekstilni otpad iz BiH se izvozio širom svijeta. Izvezeni otpad obuhvata materijale kao npr. strugotina i ostali otpad kože, otpaci od svile, otpaci od vune, pamučni otpad, lan i otpad, rabljena odjeća. Tokom 2021. godine najveće količine tekstilnog otpada izvezene su u Italiju.

In 2021, textile waste from BiH was exported worldwide. Exported waste includes materials such as sawdust and other leather waste, silk waste, wool waste, cotton waste, linen and waste, used clothing. During 2021, the largest quantities of textile waste were exported to Italy.

Grafikon 3. Izvoz tekstilnog otpada, 2021.

Graph 3. Export textile waste, 2021

1.4 IZVOZ OTPADNOG PAPIRA I KARTONA

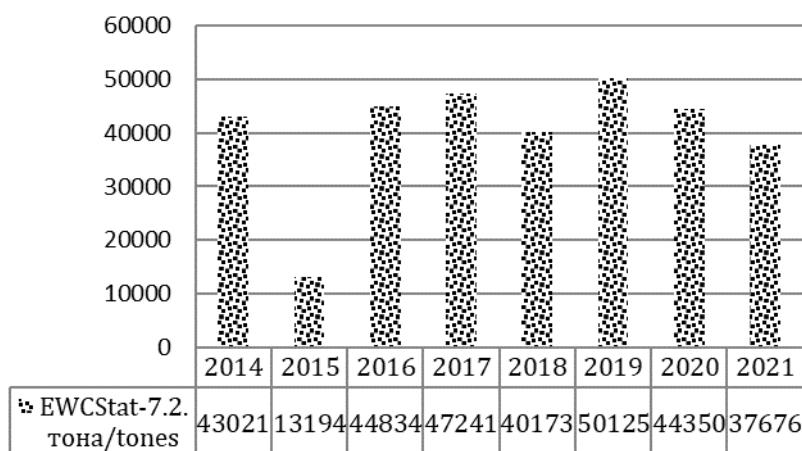

EXPORT OF WASTE PAPER AND CARDBOARD

Analiza podataka o izvozu otpadnog papira i kartona u periodu 2019.-2021. ukazuje na trend pada. U 2021. godini uočen je pad izvoza, količina izvezenog otpada je za 15,1% manja u odnosu na 2020. godinu. Tokom 2021. godine od ukupno izvezene količine otpadnog papira i kartona, 55,3% otpadnog papira i kartona izvezene su u Republiku Srbiju.

Analysis of data on exports of waste paper and cardboard in the period 2019-2021 indicates a downward trend. In 2021, a decline in exports was observed, the amount of exported waste is 15.1% lower than in 2020. During 2021, out of the total exported amount of waste paper and cardboard, 55.3% of waste paper and cardboard were exported to the Republic of Serbia.

Grafikon 4. Izvoz otpadnog papira i kartona, 2014.-2021.

Graph 4. Export of waste paper and cardboard, 2014-2021

1.5 IZVOZ PLASTIČNOG OTPADA

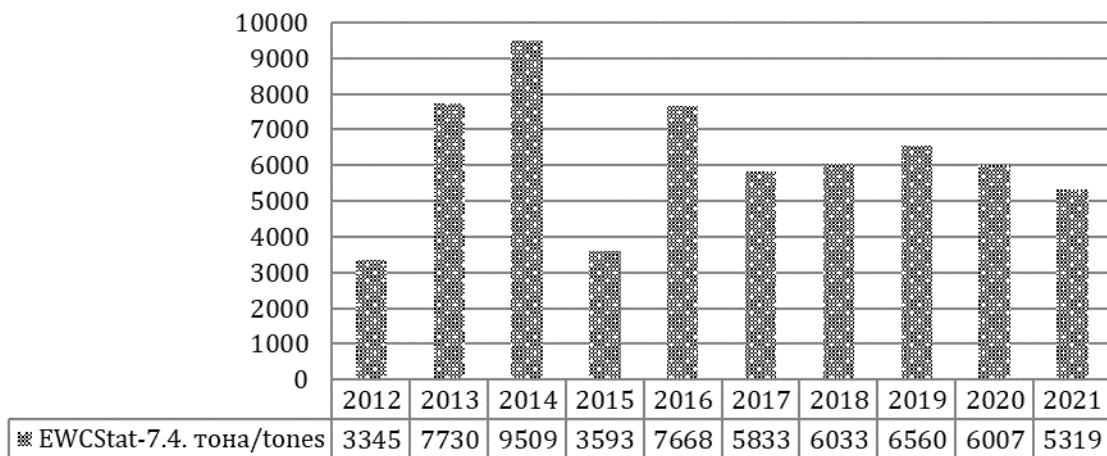

EXPORT OF PLASTIC WASTE

Analiza podataka o izvozu plastičnog otpada u periodu 2012.-2021. generalno ukazuje na promjenjiv trend rasta i pada rast izvezenih količina. U 2021. godini uočen je pad izvoza, količina izvezenog otpada je za 11,4% manja u odnosu na 2020. godinu. Tokom 2021. godine, od ukupno izvezene količine plastičnog otpada 38,8% plastičnog otpada izvezeno je u Srbiju.

Analysis of data on plastic waste exports in the period 2012-2021 generally indicates a changing growth trend and declining growth in exported quantities. In 2021, a decline in exports was observed, the amount of exported waste was 11.4% lower than in 2020. During 2021, out of the total amount of exported plastic waste, 38.8% of plastic waste was exported to Serbia.

Grafikon 5. Izvoz plastičnog otpada, 2014.-2021.

Graph 5. Export of plastic waste, 2014-2021

1.6 IZVOZ NEOPASNE ŠLJAKE I PEPELA

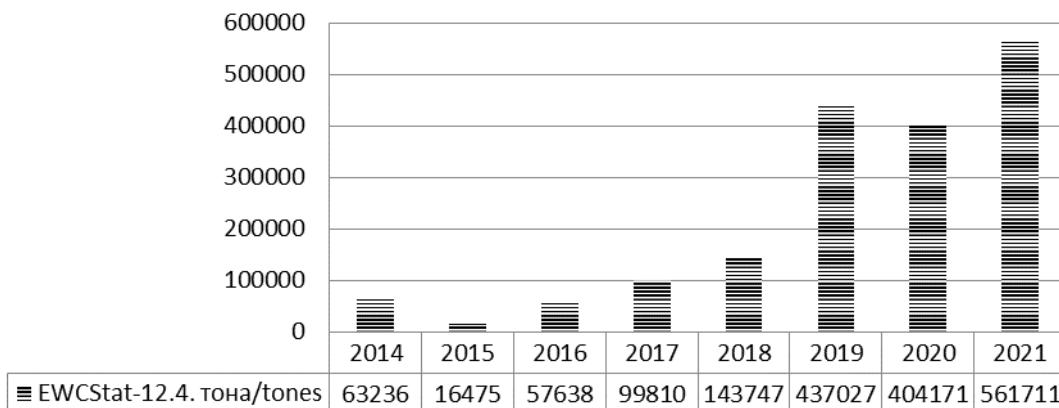

EXPORT OF WASTE SLUDGE AND ASH

Analiza podataka o izvozu neopasne šljake i pepela iz toplinskih procesa u periodu 2019.-2021. ukazuje na promjenjiv rast izvezenih količina. 2021. godina bilježi rast od 38,9% u odnosu na prethodnu godinu. Tokom 2021. godine od ukupno izvezene količine neopasne šljake i pepela, 55,9% neopasne šljake i pepela izvezeno je u Hrvatsku.

Analysis of data on the export of non-hazardous slag and ash from thermal processes in the period 2019-2021 indicates a variable growth in exported quantities. 2021 records a growth of 38.9% compared to the previous year. During 2021, out of the total exported amount of non-hazardous slag and ash, 55.9% of non-hazardous slag and ash was exported to Croatia.

Grafikon 6. Izvoz neopasne šljake i pepela, 2014.-2021.

Graph 6. Export of non-hazardous waste sludge and ash, 2014-2021

1.7 IZVOZ GUMENOG OTPADA

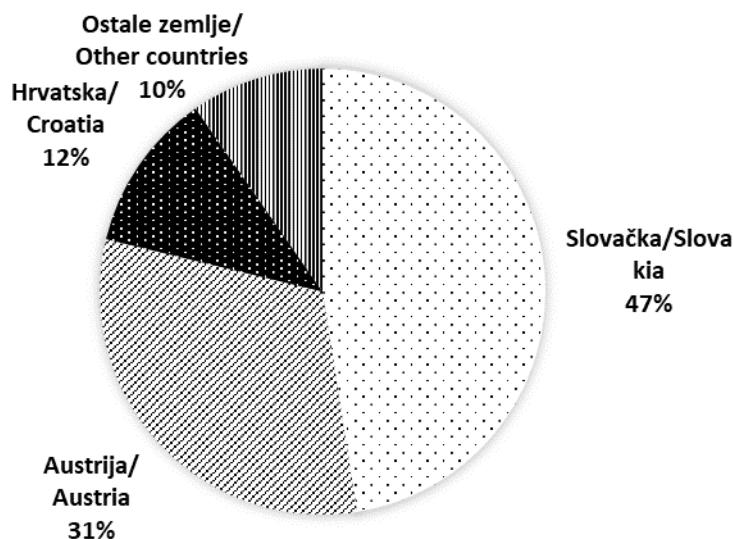

EXPORT OF RUBBER WASTE

U 2021. godini uočen je rast izvoza, količina izvezenog otpada je za 11,5% veća u odnosu na 2020. godinu. U 2021. godini od ukupno izvezene količine gumenog otpada, 47,5% gumenog otpada izvezeno je u Slovačku.

In 2021, an increase in exports was observed, the amount of exported waste is 11.5% higher than in 2020. In 2021, of the total amount of rubber waste exported, 47.5% of rubber waste was exported to Slovakia.

Grafikon 7. Države u koje se izvozio gumeni otpad, 2021.

Graph 7. Countries to which rubber waste was exported, 2021

2. STATISTIKA VANJSKE TRGOVINE – UVOZ NEOPASNOG OTPADA

FOREIGN TRADE STATISTICS – IMPORT OF NON-HAZARDOUS WASTE

2.1 UVOZ METALNOG OTPADA

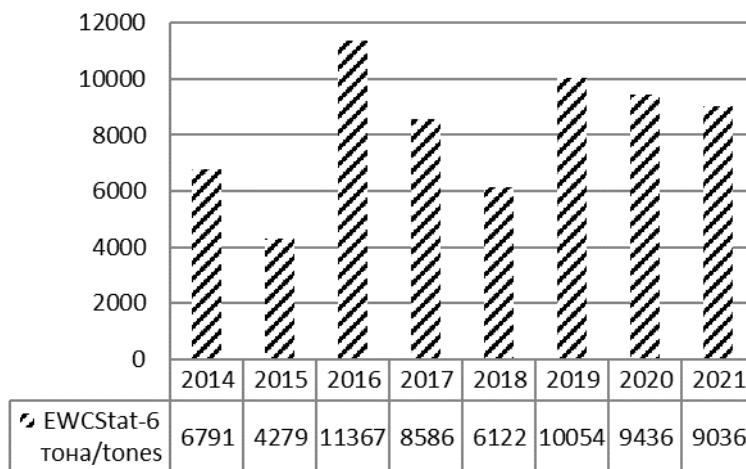

IMPORT OF METAL WASTE

Analiza podataka o uvozu metalnog otpada u periodu 2014.-2021. ukazuje na promjenjiv trend rasta i pada uvezenih količina. U 2021. godini uočen je pad uvoza, količina uvezenog metalnog otpada je za 4,2% manja u odnosu na 2020. godinu. Tokom 2021. godine od ukupno uvezene količine metalnog otpada, 37,1% metalnog otpada uvezeno je iz Švicarske.

Analysis of data on imports of scrap metal in the period 2014-2020 indicates a changing upward and downward trend in imported quantities. In 2020, a decline in imports was observed, the amount of imported waste is 6.1% more than in 2019. During 2020, out of the total imported amount of scrap metal, 40.4% of scrap metal was imported from Italy.

Grafikon 8. Uvoz metalnog otpada, 2014.-2021.

Graph 8. Import of metal waste, 2014-2021

2.2 UVOZ TEKSTILNOG OTPADA

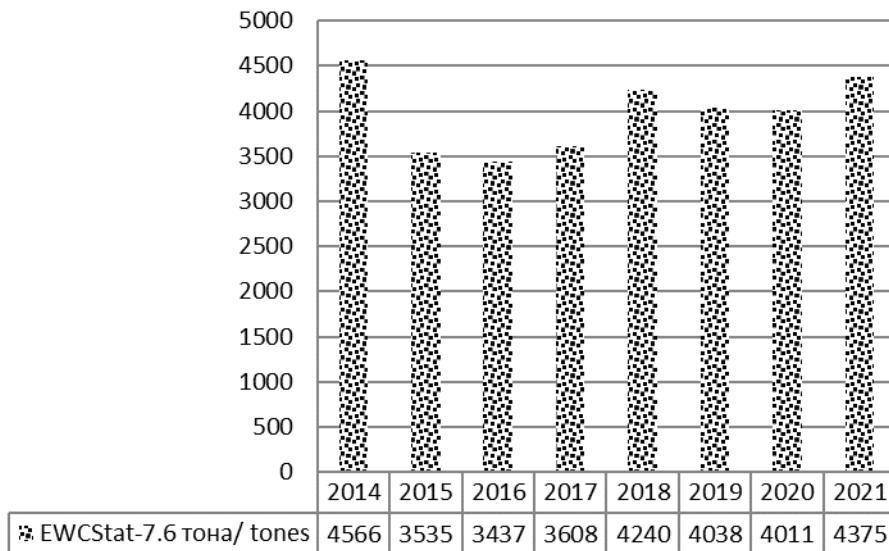

IMPORT OF TEXTILE WASTE

Analiza podataka o uvozu tekstilnog otpada u periodu 2014.-2021. ukazuje na promjenjiv trend rasta i pada uvezenih količina ovog otpada. U 2021. godini uočen je rast uvoza, količina uvezenog tekstilnog otpada je za 9,1% veća u odnosu na 2020. godinu. Tokom 2021. godine od ukupno uvezene količine tekstilnog otpada, 52,5% metalnog otpada uvezeno je Njemačke.

Analysis of data on imports of textile waste in the period 2014-2021 indicates a changing trend of growth and decline in imported quantities of this waste. In 2021, an increase in imports was observed, the amount of imported textile waste is 9.1% higher than in 2020. During 2021, of the total amount of imported textile waste, 52.5% of metal waste was imported from Germany.

Grafikon 9. Uvoz tekstilnog otpada, 2014.-2021.

Graph 9. Import of textile waste, 2014-2021

2.3 UVOZ OTPADNOG PAPIRA I KARTONA

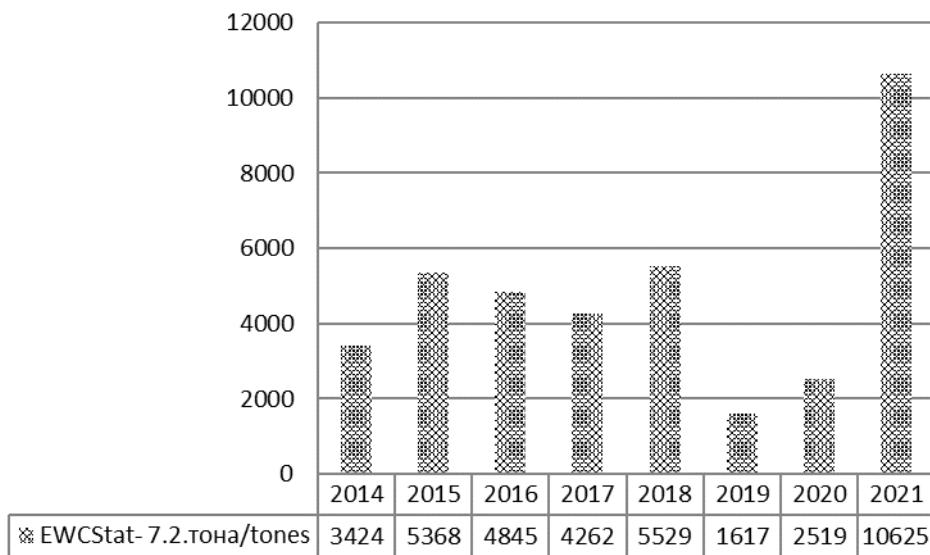

IMPORT OF WASTE PAPER AND CARDBOARD

Analiza podataka o uvozu otpadnog papira i kartona u periodu 2014.-2021. ukazuje na promjenjiv trend rasta i pada uvezenih količina tokom posmatranog perioda. U 2021. godini količina uvezenog otpadnog papira i kartona je veća u odnosu na 2020. godinu. Tokom 2021. godine od ukupno uvezene količine otpadnog papira i kartona, 48,6% otpadnog papira i kartona uvezeno je s Kosova.

The analysis of data on imports of waste paper and cardboard in the period 2014-2021 indicates a changing trend of growth and decline of imported quantities during the observed period. In 2021, the amount of imported waste paper and cardboard is higher than in 2020. During 2021, out of the total imported amount of waste paper and cardboard, 48.6% of waste paper and cardboard was imported from Kosovo.

Grafikon 10. Uvoz otpadnog papira i kartona, 2014.-2021.

Graph 10. Import of waste paper and cardboard, 2014-2021

2.4 UVOZ PLASTIČNOG OTPADA

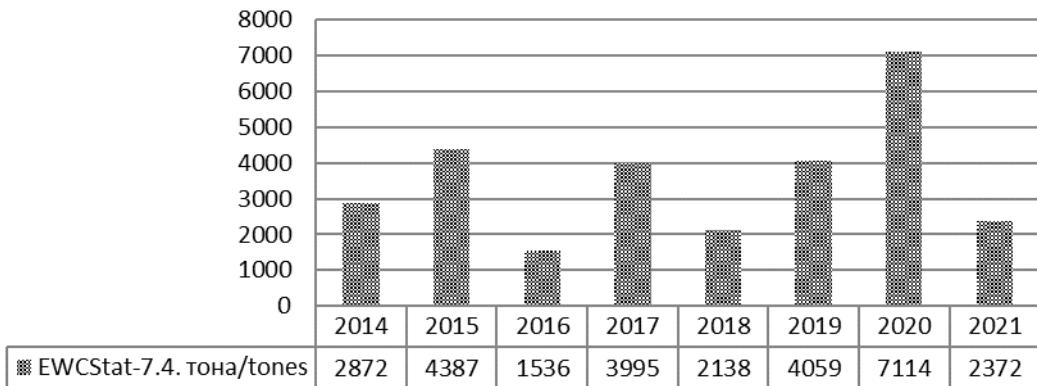

IMPORT OF PLASTIC WASTE

U 2021. godini količina uvezenog plastičnog otpada je za 33,3% manja u odnosu na 2020. godinu. Tokom 2021. godine od ukupno uvezene količine plastičnog otpada, 66,7% plastičnog otpada uvezeno je iz Hrvatske.

In 2021, the amount of imported plastic waste is 33.3% lower than in 2020. During 2021, of the total amount of imported plastic waste, 66.7% of plastic waste was imported from Croatia.

Grafikon. 11. Uvoz plastičnog otpada, 2014.-2021.

Graph 11 Import of plastic waste, 2014-2021

2.5 UVOZ NEOPASNE ŠLJAKE I PEPELA

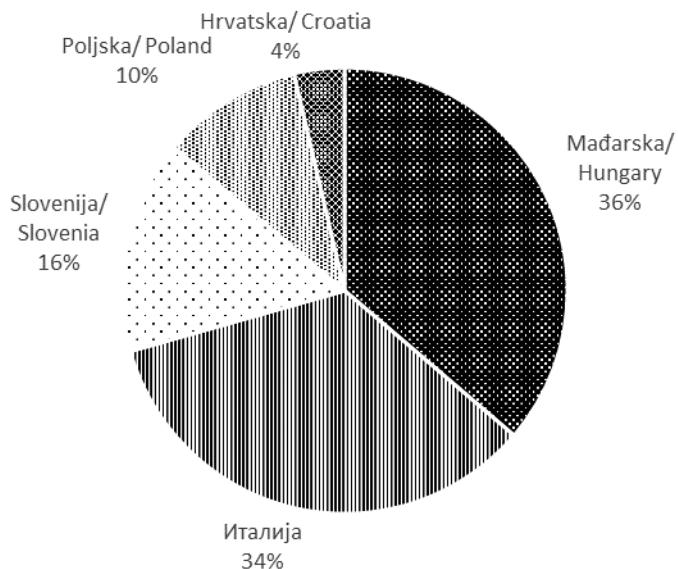

IMPORT OF WASTE SLUDGE AND ASH

Analiza podataka o uvozu neopasne šljake i pepela iz toplinskih procesa u periodu 2014.-2021. ukazuje na pad uvezenih količina. Tokom 2021. godine od ukupno uvezene količine neopasne šljake i pepela, 35,2% neopasne šljake i pepela uvezeno je iz Mađarske.

Analysis of data on imports of non-hazardous slag and ash from thermal processes in the period 2014-2021 indicates a decline in imported quantities. During 2021, out of the total imported amount of non-hazardous slag and ash, 35.2% of non-hazardous slag and ash was imported from Hungary.

Grafikon 12. Uvoz neopasne šljake i pepela, 2021.

Graph 12. Import of non-hazardous waste sludge and ash, 2021

2.6 UVOZ GUMENOG OTPADA

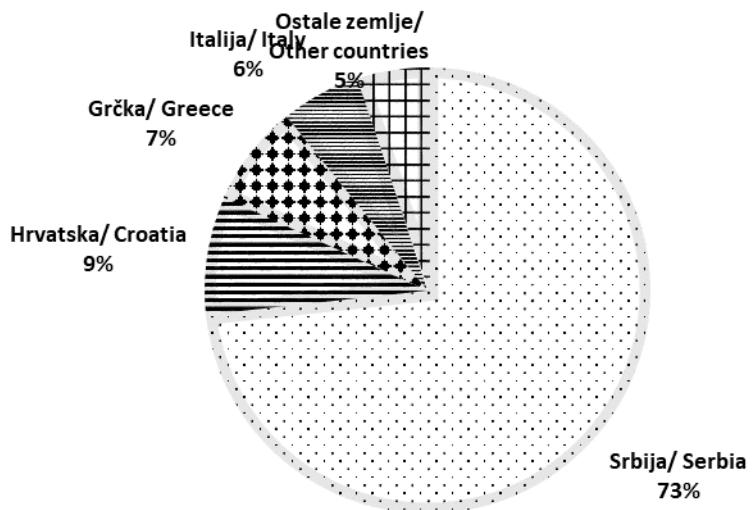

IMPORT OF RUBBER WASTE

U 2021. godini uočen je pad uvoza, količina gumenog otpada. U 2021. godini od ukupno uvezene količine gumenog otpada, 73,3% gumenog otpada uvezeno je iz Srbije.

In 2021, there was a decline in imports, the amount of rubber waste. In 2021, out of the total amount of imported rubber waste, 73.3% of rubber waste was imported from Serbia.

Grafikon 13. Države iz kojih se uvozio gumeni otpad, 2021.

Graph 13. Countries from which rubber waste was imported, 2021

METODOLOŠKA OBJAŠNJENJA

Zbog nedostatka podataka u Bosni i Hercegovini o uvozu/izvozu neopasnog otpada prema Regulativi 259/93/EEC o prekograničnom prometu otpada, Odsjek za statistiku okoliša Agencije za statistiku BiH je poduzeo aktivnosti na obradi dostupnih podataka statistike vanjske trgovine.

Razvoj i proizvodnja statistike vanjske trgovine u BiH se odvija kroz statističke institucije. Osnova razvoja je utvrđena evropskim propisima i stoga je statistika vanjske trgovine u velikoj mjeri uskladjenja sa zemljama EU. Osnovni izvor podataka je Jedinstvena carinska isprava (JCI). Agencija za statistiku BiH dobija potrebne podatke iz Jedinstvenih carinskih isprava od Uprave za indirektno oporezivanje BiH, u skladu sa Protokolom o saradnji potpisanim između ove dvije institucije.

Podaci o izvezenim/uvezenim količinama neopasnog otpada su dobijeni na osnovu obrade baze podataka statistike vanjske trgovine. Baza sadrži podatke koji su relevantni za statistiku o uvozu i izvozu otpada.

Ovi podaci uključuju sljedeće elemente:

- Opis robe
- Količine kojima se trguje u tonama
- Zemlja porijekla i odredište
- Dostupne su i druge informacije kao što je vrijednost robe, ali one nisu relevantne za statistiku uvoza i izvoza otpada u kontekstu Regulative o statistici otpada 2150/2002/EC.

CN - (Kombinovana nomenklatura - Combined Nomenclature) je klasifikacija roba unutar EU za potrebe prikupljanja carina, statističko praćenje spoljne trgovine, te za primjenu posebnih mjera u okviru trgovinske, poljoprivredne, fiskalne i monetarne politike EU. Ona se zasniva na međunarodnoj klasifikaciji harmonizovanog sistema, koju sastavlja Svjetska carinska organizacija, a Evropska unija dopunjava se svojim potpodjelama tzv. CN

NOTES ON METHODOLOGY

Due to lack of information in Bosnia and Herzegovina on import/export of non-hazardous waste according to 259/93/EEC Regulation on the transboundary movement of waste, the Department of Environmental Statistics of Statistics Agency Bosnia and Herzegovina has taken action to process the available data of external trade statistics.

Development and production of external trade statistics in BiH is done through statistical institutions. Basis for the development is defined by European regulations and therefore the statistics of foreign trade is largely in line with EU countries. The main data source is the Unique Customs Declaration (UCD). Agency for Statistics receives the necessary data from the single administrative document of the Indirect Taxation Authority, in accordance with the Protocol on Cooperation signed between the two institutions.

Data on exported/imported quantities of non-hazardous waste were obtained from processing databases of external trade statistics. The database contains information that is relevant to statistics on import and export of waste.

These data include the following elements:

- Description of goods
- The quantities traded in tons
- Country of origin and destination
- There are also other information such as the value of the goods, but they are not relevant to statistics on imports and exports of waste in the context of Regulation 2150/2002/EC on waste statistics.

CN - (Combined Nomenclature) the classification of goods within the EU for the purpose of collecting customs duties, statistical monitoring of foreign trade, and for the implementation of special measures in the commercial, agricultural, fiscal and monetary policy. It is based on the international harmonized system of classification, compiled by the World Customs Organization and the European Union to complement its subclasses so. CN subheadings.

podnaslovima.

Kombinovana nomenklatura se sastoje od oko 10 000 različitih kodova koji opisuju robu. Od tih kodova, oko 250 su kodovi koji se sastoje od ili sadrže otpad, a koji bi mogli biti osnova za prikupljanje statističkih podataka o uvozu i izvozu otpada za različite materijale. Obradom baze podataka statistike vanjske trgovine su ekstraktirani tarifni brojevi (CN kodovi) koji sadrže otpad.

Izbor tih kodova bio je zasnovan na osnovu procjene i identifikacije koju je uradio Njemački zavod za statistiku, kao i dopuna koje je predložila Savezna Agencija zaštite okoliša UBA (Federal Environment Agency).

Svi izabrani kodovi nisu bili pogodni za prikupljanje statističkih podataka o uvozu i izvozu otpada i taj broj je morao biti smanjen zbog toga što:

- Neki kodovi sadrže i otpad i proizvod u istom kodu
- Neki kodovi sadrže otpad koji je u potpunosti ili djelomično obuhvaćen izvještavanjem u skladu sa Regulativom 259/93/EEC o prekograničnom prometu otpada.

Ovo su neki od zaključaka o prikladnosti korištenja vanjskotrgovinske statistike za potrebe statistike uvoza/izvoza otpada:

1. Za neke vrste otpada kao što je metalni otpad, papir i karton, staklo i plastični otpad, tekstilni otpad i otpad od sagorijevanja (pepeo i šljaka), gumeni otpad, statistika vanjske trgovine omogućava relevantne podatke o uvozu i izvozu otpada, i ti podaci se mogu koristiti kao dopuna podacima zasnovanim na Regulativi o prekograničnom prometu otpada.
2. Za druge vrste otpada kao što su otpad elektronske opreme i otpad iz poljoprivredno-prehrambene industrije, vanjskotrgovinska statistika ne pruža dobru osnovu za statistiku o uvozu i izvozu otpada, budući da se podaci o otpadu i proizvodima obično kombinuju u istom kodu Kombinovane nomenklature.
3. Podaci statistike vanjske trgovine imaju češću frekvenciju proizvodnje podataka u odnosu na frekvenciju koja je zahtjevana u Regulativi o statistici otpada, dostupni su na vrijeme i uz poštovanje rokova.
4. Potrebni podaci o uvozu i izvozu otpada se mogu lako izvaditi iz postojeće baze podataka statistike vanjske trgovine, i stoga korištenje tih podataka za potrebe Regulative o statistici otpada uključuje malo, ili je to bez ikakvih dodatnih troškova.
5. Metodologija koja se primjenjuje u Njemačkoj bi se u načelu mogla koristiti od strane svih država članica EU i šire.

CN - Kombinovana nomenklatura i statistička EWC-Stat klasifikacija su uopćeno klasifikacije koje se zasnivaju na glavnom materijalu ili proizvodu. Kombinovana nomenklatura je mnogo detaljnija od EWC-Stat klasifikacije, i iz toga razloga nije previše teško pripisati kodove

Combined Nomenclature comprises about 10.000 different codes that describe the goods. Of these codes, about 250 codes that consist of or contain waste, which could be the basis for collecting statistical data on imports and exports of waste for different materials. Processing of a database of external trade statistics are extracted tariff numbers (CN codes) containing waste.

The choice of these codes was based on an assessment and identification conducted by German Bureau of Statistics, as well as amendments proposed by the Federal Environment Agency UBA. All selected codes were not suitable for collecting statistical data on imports and exports of waste and this figure has to reduce because:

- *Some codes contain waste and products in the same code*
- *Some codes may contain waste which is wholly or partly covered by the reporting in accordance with Regulation 259/93/ EEC on transboundary movement of waste.*

These are some of the conclusions about the appropriateness of using the foreign trade statistics for statistics of import/export of waste:

1. *For some types of waste such as scrap metal, paper and cardboard, glass and plastic waste, textile waste and combustion (ash and slag), rubber waste, foreign trade statistics to the relevant data on imports and exports waste and these data can be used as a supplement to the data based on the Regulation on the transboundary movement of waste.*
2. *For other types of waste such as scrap electronic equipment and waste from the agrifood industry, foreign trade statistics do not provide a good basis for statistics on import and exports of waste and products are usually combined in the same code of Combined Nomenclature.*
3. *The data of external trade statistics have higher frequency of production data is relation to the frequency that is required by the Regulation on waste statistics, and they are available on time and respecting deadlines.*
4. *Necessary data on import and export of waste can be easily removed from on existing database of external trade statistics, and therefore use these data for purposes of Regulation on waste statistics involve little or no additional cost.*
5. *The methodology applied in Germany could in principle be used by all EU member states and beyond.*

CN - Combined Nomenclature and EWC-Stat Classification are generally based on the main material or product. The Combined Nomenclature is much more detailed than EWC-Stat Classification, and for this reason is not too difficult to attribute codes to Combined Nomenclature for one of the

Kombinovane nomenklature za jednu od kategorija u EWC-Stat klasifikaciji.

categories in EWC-Stat classification.

Za potrebe izračuna statistike o uvozu i izvozu metalnog otpada, predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 6- neopasni metalni otpad. CN kodovi 79031000 (cink prašina), 79039000 (cink prah), i 81121300 (otpad berilija i ostatci) nisu uključeni jer mogu djelomično biti obuhvaćeni Regulativom o prekograničnom prometu otpada.

For purposes of calculating the statistics of imports and exports of scrap metal, codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 6. non-hazardous metal waste. CN codes 79031000 (zinc dust) 79039000 (zinc powder), and 81121300 (beryllium waste and residues) are not included because partially they can be covered by Regulation on the transboundary movement of waste.

Za potrebe izračuna statistike o uvozu i izvozu staklenog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.1 -neopasni stakleni otpad.

For purpose of calculating statistics on import and export of waste glass codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.1- non-hazardous glass waste.

Za potrebe izračuna statistike o uvozu i izvozu otpadnog papira i kartona predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.2-otpad papira i kartona.

For purposes of calculating the statistics of imports and exports of waste paper and cardboard codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.2- waste paper and cardboard.

Za potrebe izračuna statistike o uvozu i izvozu plastičnog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.4- plastični otpad.

For purposes of calculating statistics on import and export of plastic waste codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.4 - plastic waste.

Za potrebe izračuna statistike o uvozu i izvozu tekstilnog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.6 -tekstilni otpad.

For purposes of calculating the statistics of imports and exports of textile waste codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.6- textile waste.

Za potrebe izračuna statistike o uvozu i izvozu neopasne šljake i pepela iz toplinskih procesa predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 12.42 - neopasna šljaka i pepeo iz toplinskih procesa.

For purposes calculating the statistics of imports and exports of non-hazardous slag and ash from thermal processes codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level 12.42- non-hazardous sludge and ash from thermal processes.

Za potrebe izračuna statistike o uvozu i izvozu gumenog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.3 - gumeni otpad.

For purposes calculating the statistics of imports and exports of rubber waste codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level 7.3- rubber waste.

Obrađeni podaci statistike vanjske trgovine za ovih sedam grupa otpada su dobar način da se stekne uvid u tokove ovih kategorija otpada u Bosni i Hercegovini.

The processed data of external trade statistics for these seven groups of waste are a good way to gain insight into the flow of waste in Bosnia and Herzegovina.
