### PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U I KVARTALU 2012.

### PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 1<sup>ST</sup> QUARTER 2012

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u prvom kvartalu 2012. godine manja je za 28,69% u odnosu na isti period 2011. godine. Proizvodnja sortimenata četinarskih vrsta drveća smanjena je za 35,00% dok je proizvodnja sortimenata lišćarskih vrsta manja za 24,37%. Proizvodnja trupaca četinarara smanjena je za 33,55% dok proizvodnja trupaca lišćara bilježi pad od 22,86%. Najveći pad se bilježi kod proizvodnje ostalog grubo obrađenog drveta od 84,93% i ostalog dugog drveta četinarara od 62,62%. Najveći porast proizvodnje bilježi se kod proizvodnje ostalog dugog drveta lišćara od 110,92%. Kod ostalog drveta četinarara i lišćara radi se o proizvodnji manjih količina sortimenata čije variranje nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 1<sup>st</sup> quarter of 2012 is decreased for 28,69% compared to the same period in 2011. Production of coniferous (softwood) assortments records a 35,00% decrease while production of broadleaf (hardwood) assortments decreases for 24,37%. Production of coniferous logs is for 33,55% less than in the same period of 2011 while production of broadleaf logs recorded decrease of 22,86%. Most significant production drop of 84,93% has other roughly worked wood and other coniferous long wood of 62,62%. Most production increase of 110,92% has other broadleaf long wood. Both coniferous and broadleaf long wood assortments are regularly produced in small quantities and their variations do not significantly affect the total production of forest assortments.

## Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopštenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapremniskim metrima.

**Četinari** su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*), te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

**Lišćari** su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara, kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*), te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mehkkih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinarara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

**Trupci** su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

**Jamsko drvo** obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

**Ostalo dugo drvo** obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

**Prostorno drvo** obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemijskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

**Ogrijevno drvo** je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

**Ostalo grubo obrađeno drvo** obuhvata sitno tehničko drvo, kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruća sl.

## Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest.

Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters.

**Coniferous** are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*

**Broad leaf** are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

**Logs** are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

**Mining wood** include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

**Other long wood** include technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

**Cordwood** include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

**Fuelwood** is wood intended for heating or production of charcoal.

**Other wood, roughly worked** is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
